Keystone Pork Congress: a 'pig' success

BY SHEILA MILLER

LANCASTER — Nearly 600 hog producers turned out for the second Keystone Pork Congress, held at the Host Farm near Lancaster.

For two days, Wednesday and Thursday, these farmers ate and talked pork, learning about new management practices and hearing sales pitches from commercial exhibitors.

At their annual meeting, the Pennsylvania Pork Council also elected new officers.

Abe Fisher, Kinzer, will be taking over the presidency from Clyde Strock. And, serving as Fisher's vice-president will be Elwood Houser, Lebanon.

The council voted to oppose the proposed three-tenths of one percent check-off at the national level. They said they would rather see an increase in the ten cent check off presently in effect.

Reasons for the opposition were:

— losing track of the number of hogs;

— not being able to propose a new budget because of not knowing what funds would be available;

— not having enough funds when the price of hogs is low;

— adding a bookkeeping chore to the markets;

— and having too much money to spend often leads to unwise spending, they said.

The council went on to oppose the use of check off funds for the national political action committee.

In addition to their business meeting, the PPP members were given a commercial show that rivaled the Farm Show on a smaller scale.

Over 65 exhibitors displayed their wares, taking up two large rooms in

(Turn to Page A32)

Newly elected officers for the Pennsylvania Pork Producers Council are Abe Fisher, right, of Kinzer, Lancaster County, who will serve as president; and Elwood Houser, Lebanon, the new vice-president.

National FFA Week is February 16-23

LITITZ — Members of the Lancaster County Red Rose Future Farmers of America, 1100 strong, join the nearly 495,000 other FFA members in the United States in celebrating National FFA Week which starts February 16 and concludes February 25.

Throughout the week the county's 12 chapters are planning various activities including television shows, news releases, radio broadcast, window displays and many other activities to support the theme: "FFA - Preparing For Pr[illegible]."

The traditions of FFA have held strong and produced a mighty work force for food and fiber to meet the needs of our nation and the world. Successful agricultural leaders of today are the testimony. Vocational agricultural education is an American success story of learning by doing.

National FFA Week always holds George Washington's birthday in observance of his leadership in promoting scientific farming practices. Washington is considered the patron saint of the FFA and has come to symbolize the FFA Treasurer.

Organized in 1928, the FFA promotes leadership, cooperation and citizenship among high school vocational agriculture students. Vocational agriculture education in high school prepares students for careers in agricultural production, marketing, processing and service.

FFA members emerge prepared. While the Future Farmers of America is noted for its over 50 years of progress in agricultural leadership, it is in the "preparing" that members gain.

FFA members are prepared to face the future, to lead America's agricultural industry and are prepared to be somebody.

Feature stories on local FFA activities can be found in Section B and throughout the issue.

At Lancaster extension dinner

Hallowell sets timetable for milk fund, ag growth

LANCASTER — Pennsylvania Secretary of Agriculture Penrose Hallowell Tuesday evening said farmers will see milk security fund legislation in the state senate by the end of February.

He predicted passage of a fund by June—the traditional dairy month.

Hallowell also said he expected agriculture to be the number one industry in Pennsylvania by 1981.

His remarks came in an address to the annual meeting of the Agricultural and Home Economics Extension Association at the Farm and Home Center.

At the meeting three new directors were elected and two were chosen to serve a second term.

Reelected were James M. Eshelman, R2 Mt. Joy; and Mrs. Arlene Eshelman, R1 Willow Street.

New to the board are Allen K. Risser, Leola; Mrs. Thelma Hess, R1 Strasburg; and Kenneth M. Rutt, Quarryville.

In other extension business, the Extension Association's budget was reviewed. A balance of $12,415 last year was suplemented by a $78,000 appropriation from the county commissioners.

Expenses during the past year were $80,460 leaving an ending balance of $10,349.

Marion R. Deppen, Capital Region Extension Administrator, said he often had to complain about lack of funds.

"This year you see a smile on my face," Deppen said. The state appropriated an extra one million dollars to restore collapsed positions.

Included are Nancy Meyers' 4-H and Susan

(Turn to Page A26)

Friends and neighbors were out early Wednesday morning to help clean up the aftermath of the fire that destroyd the Richard Baylis barn. See related story on page A-23.

Charges illegal tolling agreement

LeHi takes on Dairylea in storm over A&P

BY CURT HARLER

ALLENTOWN — Dairy co-ops and the state's milk marketing system were rocked earlier this week by a flurry of charges and counter-charges concerning illegal tolling of milk.

Dairy circles are spinning from charges made by Robert P. Barry, President of Lehigh Valley Farms.

He asked the Pennsylvania Milk Marketing Board to investigate an arrangement by A&P to purchase the processing and packaging of milk from Dairylea Milk Producers Cooperative at Dairylea's Scranton plant at a price believed to be below cost.

Barry also asked the revocation of A&P's and Dairylea's Pennsylvania marketing licenses for knowingly and intentionally violating PMMB laws.

The contract for the 20 A&P stores previously was serviced by Lehigh Valley at a price of $1.56 per gallon for whole milk.

Lehigh said the Dairylea - A&P agreement was executed even though the state had determined milk was being sold below Dairylea's cost for fluid milk.

Barry said Lehigh believed Dairylea was selling milk to some stores at $1.42 for the same package Lehigh had offered.

Dairylea called the

Planning better milk yields ...by the numbers.

Jim Musser, of Penn's Peaceful Meadow Farm, reviews his latest CTR report with Penn Pro Frank Campbell, while (insert) Gary Varner, formulates another report on Pennfield's in-house computer

This Pennfield Computer readout can make your milk yields far more profitable .. without giving away one bit of effective nutritional quality In fact, it will help to eliminate waste as well as balance the nutrients provided by your home grown forage to meet the exact nutritional requirements of your cows.

This readout is a vital part of the Pennfield Computerized Total Ration Service And here's how it works:

1. We collect samples of your forage
2. Then we evaluate the quality of your forages. We determine the total digestible nutrients. The fiber content The protein content. The amount of carbohydrates.
3. The computer quickly spots any nutrients lacking in the forage. For your milking cows. And for your dry cows It immediately points out the overfeeding of nutrients Underfeeding, too Both, of course, may be different at different times of the year. And the printout will tell you what you need. And when.
4. Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows' nutritional requirements.
5. The result can be increased milk production at the lowest possible feed cost.

The Pennfield Computer Total Ration Service could bring on your greatest growth act. In your milk yield. And your profits

Try the Pennfield Computerized Total Ration Service There's no cost or obligation for this unique service to dairy farmers. Just phone us right now. Today. At Pennfield Feeds Local calls· Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll-free 800-732-0467. Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604.

Penn Pro is a total feed program from Pennfield Feeds.

W-36
starts where others stop.

Hy-Line® Variety W-36—The Recyclable Layer
If recycling is an important part of your operation, then you need the Hy-Line brand layer. She comes back quickly from the molt with strong peaks and the same outstanding features you noticed in the beginning. Superior shell strength. Uniform egg size Efficient feed conversion. And the tough shells that help you put more eggs in the carton. Ask your Hy-Line representative about recycling and he'll show you how your Hy-Line W-36 layers can help you strike the profit balance again... and again...and again.

Consistently impressive.

Constantly improving.

BY CURT HARLER, EDITOR

Lancaster Farming says...

We can get prayer back in schools

Remember the sign that mysteriously appeared on notice boards in public schools over a decade ago?

"In case of nuclear attack, all regulations against prayer in school temporarily will be suspended," it said.

It was meant to be a semi-humerous stab at the Supreme Court decision which banned prayer from schools.

With the exception of a relative minority of people, there was no humor in the removal of any sort of prayer from schools.

It hardly seems like 17 years since the Supreme Court handed down its verdict, but it has been that long.

But now, for the first time in almost a full generation of school children, there is a movement abroad to get prayer back in the schools.

Earlier this year, in a remarkable turn-around of past votes, both houses of Congress have voted favorably on proposals to reinstate school prayer.

While the votes were not binding on the Senate-House Conference committees, the members of Congress clearly went on record as being in favor of returning some sort of devotion to the schools

The U.S. Senate vote was 53-40, the House vote 255-122.

Congressmen Holt, a Maryland Democrat, and Crane, an Illinois Republican, have taken the lead in drafting measures which would get the prayer legislation onto the floor.

A relative minority of citizens were able to get prayer removed from school by judicial maneuvering.

President Jimmy Carter, himself a Baptist and brother of an evangelist, does not support returning prayer to schools.

"My preference is that the Congress not get involved in the question of mandating prayer in school," Carter has said.

"I believe the subject of prayer in school ought to be decided between a person individually and privately, and God. And the Supreme Court has ruled on this issue," Carter said—as if that clinched the argument

Those who feel prayer has a place in schools have their work cut out for them President Carter outlined the case against prayer quite well

"I personally don't think the Congress ought to pass any legislation requiring or permitting prayer being required or encouraged in school," said the leader of the country whose motto is "In God We Trust"

"Sometimes a student might object even to so-called voluntary prayer when it is public and coordinated. It might be very embarrassing to a young person to say, 'I want to be excused from the room because I don't want to pray'," Carter said.

While admiting he did not know all of the Constitutional aspects of this difficult and sensitive question, Carter concluded, "I think it ought to be an individual matter between a person and God."

Farm people don't seem to agree.

Many outsiders, attending a rural PTA meeting or other school-related gathering, would be shocked to hear public prayer start the session It is, in fact, contrary to the letter of the law

Perhaps the most substantial good to come from the banning of prayer is increased enrollment at church related schools of all denominations—Catholic, Protestant and Jewish

There are times, then, when our leaders have to be shown were to lead

Nobody is asking folding donations for a campaign to get prayer back into schools All that is needed is pro-prayer action as fervent as action by anti-prayer factions

Invest 15 cents and 15 minutes. Write your federal legislator. Let him know how you feel about the Holt-Crane proposals. Send along a card to the Chairmen of the Senate and House Judiciary Committees and urge them to report out the school prayer bills.

This is one cause that prayer alone won't win.

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

THE ADULTRESS

Lesson for February 17, 1980

Background Scripture:
John 8:1-20.
Devotional Reading:
Ephesians 4:25-32.

The scribes and the Pharisees knew their man all right. This Jesus of Nazareth betrayed a compassionate streak which they could use to catch him on the horns of a dilemma. At last, they had him where they wanted him: he would have to choose between love and law.

They would spring their trap with a woman caught in the act of adultery. This time, they were certain, the Nazarene would not be able to escape their trap with a few clever words as he had before.

What Do You Say?

It is interesting to speculate on how the scribes and Pharisees knew where to find an adulterous woman. That would seem to be an area of knowledge lying beyond their official expertise. Nevertheless, they found and brought her to Jesus in the outer precincts of the temple. Notice how craftily they bait him: "Teacher, this woman has been caught in the act of adultery. Now in the law Moses commanded us to stone such. What do you say about her? (8:5). Yes, they knew their man all right.

But Jesus knew them even better than they knew him. He knew that they wanted only to trap him, embarrass him. He also knew that they were convinced that they had him trapped. So, he did not answer them immediately. Instead, he bent down and began to write with his finger upon the ground. What did he write? We will never know, but it is obvious that his silence only made them even more anxious and confident. They were certain that he did not know how to answer!

When the tension had reached what must have seemed a breaking point, Jesus stood and devastated them, not with an argument, nor a recitation of the law, but with a challenge: "Let him who is without sin among you be the first to throw a stone at her" (8:9).

They Went Away

Jesus knew his adversaries far better than they knew him. He knew what was in their hearts. He knew them, not as exalted religious leaders, but as human beings who are no less dependent upon the mercy of God than the most despised sinner. And because he knew them, he had snared these men with their own trap.

Notice that none of them questioned him or argued with him. None of the accusers tried to justify himself. Without one word, they each slipped away. One thinks of the old saying, "People who live in glass houses shouldn't throw stones." And as Jesus made it clear, that means all of us, for we all live in glass houses and none of us can afford to "throw stones" at anyone else.

But Jesus also "knew" the adultress. In fact, he did not address her as an adultress, but as "Woman" for he knew that, despite her sin, there was a sinner worth saving, a life worthy to be redeemed: "Neither do I condemn you; go and do not sin again" (8:11).

Whenever Christians are more prone to condemn than to redeem, let us remember those words.

NOW IS THE TIME

By Max Smith, Lancaster County Agricultural Agent
Phone 394-6851

TO BECOME PESTICIDE RE-CERTIFIED

The Pennsylvania Department of Agriculture has made it very easy for private applicators to become re-certified later this year Most certificates will expire this September. The attendance at a meeting where the pesticide program is discussed is all that is necessary. The months of February and March are filled with farmer meetings; producers are urged to attend one of these meetings, fill out the proper re-certification blank, and then be in line for receiving a new certification card this fall. Most sponsors of these meetings will annouce a part of the meeting for pesticides and pesticide re-certification Attend one of these meetings and be in a position to become re-certified.

TO CONSIDER NO-TILL PLANTINGS

This type of farming may not be for everyone but hundreds of producers have been successful during the past decade. Many crops can be planted into existing sod or vegetation with good results. The use of herbicides is very important to kill existing growth and to control weeds Improved soil erosion control has always been in favor or no-till planting methods In addition, at the present time the saving of fuel has been experienced using the no-till method as compared to the conventional tillage programs. This system might be one way to get the cross planted with less time and expense.

TO UTILIZE LIME FOR BETTER WEED CONTROL

Perhaps you never heard the suggestion to use lime for weed control; however, indirectly lime is important to get good herbicice weed control. Both research work and farm experience has indicated that herbicides will not control weeds very good in sour soils. Therefore, for best weed control with chemicals the soil lime requirement must be satisfied. Many poor weed control experiences have been reported on sour soils A complete soil test will reveal the amount of lime needed. A well limed soil will give dozens of other better results in addition to herbicide action.

TO KEEP SMALL CHILDREN AND MACHINERY SEPARATE

The spring cropping season will be getting started in another month Under current farming methods various pieces of farm machinery will be put into operation and things will be really moving. Small children like to become a part of this action and ask to ride on machinery, or even operate some of the smaller tractors and etc. It might take nerve to refuse them at times; however, for their own protection they should not become involved Many serious accidents have happened because "Dad" or "Grandad" took them along. Where there is small children all machinery operators should be expecially careful of their exact location Farm machinery and small children do not mix

Livestock market and auction news

Omaha Cattle

Thursday, February 14
Report supplied by USDA

Closing prices on slaughter steers were 1.25-1.75 higher and heifer prices ranged 1.50-2.00 higher. Cows were 2.50-4.00 higher and bulls 2.00-3.00 higher. Two-way feeder steers were 2.00-2.50 higher.

Four day receipts this week 15,600; last week 13,700; year ago 12,800.

The fed cattle trade again followed an irregular pattern characterized by wide day-to-day fluctuations. Prices advanced sharply in an aggressive trade Monday, lost part of the upturn on an expanded Tuesday run and then stabilized at midweek. Supplies were poorly distributed over the trading period and contributed to the uneven trade. The run included a rather liberal percentage choice steers and heifers although many were muddy or mixed 3-4 yield grade. Slaughter steers made up approximately 43 pct and heifers 34 pct. Cows comprised 13 pct and feeders 8 pct.

STEERS: Ten loads Choice 3 1125-1250 lbs. 69.25-70.00, several loads Choice with end prime predominantly 2 1100-1200 lbs. 68.75-69.00. Some Choice and Prime 3-4 1225-1300 lbs. 68.00-68.25, load 4 1309 lbs. 65.00. Choice 2-4 1000-1300 lbs. 67.00-68.50, some muddy or large percentage 4 64.50-66.50. Mixed Good and Choice 2-3 1000-1250 lbs. 66.50-67.50. Good 2-3 62.50-65.50. Good and Choice 2-3 1200-1400 lbs. holsteins 61.50-62.00.

Average of LS-124 detailed quotations for Choice 900-1100 lbs. Steers this week 68.38; Choice 1100-1300 lbs. 68.28. Average weight steers this week 1187 lbs. as compared 1177 lbs. last week. Average weight heifers this week 1040 lbs. as compared 1020 last week.

HEIFERS: Two loads Choice 3 1023 lbs. 69.00 Monday, several load Choice and Prime 3-4 1000-1050 lbs. 68.50-69.00. At close, load and part load Choice with end Prime 3-4 1000-1025 lbs. 68.00. Choice 2-4 900-1075 lbs. 66.00-68.00. Mixed Good and Choice 2-3 900-1050 lbs. 64.50-66.00. Good 2-3 61.00-64.00.

COWS: Utility and Commercial 2-4 51.50-54.00, few 54.50-55.00. Cutter 49.50-52.00; Canner and Low-Cutter 46.50-50.00.

BULLS. 1-2 1300-2200 lbs. 57.00-63 00, individual 1 64.00-65.00.

FEEDERS: Medium Frame 1 907-1075 lbs. steers 68.00-70.00, three loads large frame 2 1135 lbs. holsteins 64.00.

Figure it for yourself.

You're money ahead when you feed Milk Replacer No. 22.

Trying to figure a way to get calves off to a healthy start at less cost?

You're money ahead when you feed Milk Replacer No. 22. This high-energy product contains 20% fat and extra levels of milk sugar along with just the right balance of vitamins, minerals, and milk proteins — plus antibiotic.

For every 50 lb bag of No. 22 you feed, you sell an extra 600 pounds of milk.

That's extra money in the bank, and your figures will prove it.

Build your own starter for less.
After two or three days on Milk Replacer No. 22, your calves will be ready for an 18% protein starter. By using your own grain, soybean meal, and Vigortone's Kalf Ayd No. 23, you grind and mix your own starter for a lot less than commercial products.

Not only will your 18% starter ration be fresher because it's homebuilt, but it'll be highly fortified with vitamins, minerals, trace elements, and antibiotics — thanks to Kalf Ayd No. 23.

Your calves will do better, and your farm record book will, too.

Now is the time to compare.
See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's low-cost dairy feeding programs with any other you name.

Hawaii gets market reports via satellite

WASHINGTON, D.C. - Reports on prices paid for vegetables, fruits, poultry, eggs, and ornamental crops in San Francisco and Los Angeles are now available to Hawaiian growers and wholesalers via satellite under a new system initiated by the U.S. Department of Agriculture.

Barbara Lindemann Schlei, administrator of the department's Agricultural Marketing Service, said the timely transmission of selected West Coast market reports give Hawaiian traders a basis for comparing mainland prices with their prices on identical items shipped to the islands from California ports.

Previously, this information was available only through mailed reports.

Selected reports included in the service and covering San Francisco area market activities are: Ornamental Market, Monday; Egg Prices to Retailers, Monday; Processed Poultry Delivered to Restaurants and Institutions, also Monday.

DO YOU HAVE A PLANNED FERTILIZER PROGRAM FOR BETTER CROP YIELDS?

THIS MAN DOES!

WHAT IS A PLANNED FERTILIZER PROGRAM?

First - **You** must start with a soil test to determine **your** soil nutrient levels

Second - **Your** crop rotation, tillage practices, and manure applications must be taken into account.

Third - **Your** yield goal must be established and crop removals determined.

Fourth - **You** need a dealer with flexibility and knowledge to be able to balance **Your** program.

Pellets and price don't necessarily make a program.

Dairymen get scoop on feed

Framed by an intricate system of scales and conveyors, Albert Moyer, explains his modern feeding equipment. All feed ingredients are electronically weighed and mechanically mixed before delivery into a 100 foot long feed trough. The formula is based on chemical analysis of the hay, corn silage and haylage, and balanced with the necessary grain, protein supplements and vitamins and minerals. Moyer's herd production level is 17,000 pounds of milk per cow.

Professor Dick Adams explains the importance of paying close attention to feeding dry cows so that they are in proper condition for heavy lactation, yet not too fat. (Photos by Newton Bair)

Crops and Soils Day coming up in Lancaster

LANCASTER — The Lancaster County Extension Service will hold their 19th annual Crops and Soils Day on February 19.

The meeting, which will feature exhibits and displays of crop seed, lime, fertilizers, and agri-chemicals, will be taking place in the Farm and Home Center, starting at 8:30 a.m.

John Yocum, superintendent of the Penn State Southeast Field Research Laboratory in Landisville, will discuss production challenges in growing small grains, corn, and tobacco.

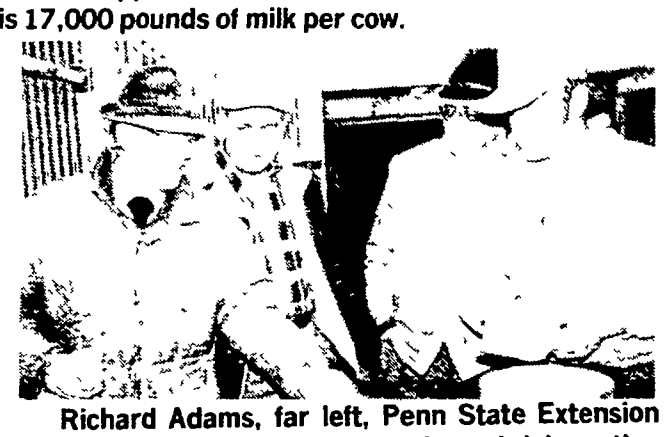
Two representatives from the Pennsylvania Department of Agriculture will be on hand to speak on pesticide re-certification and seed testing and quality. These subjects will be handled by Dave Thompson and Wendell Ditmer, respectively.

Gasohol will be a topic of conversation in the afternoon when Jim Garthe, Penn State agricultural engineer, will cover this popular subject.

David Mathews, director of crops research for Agway, will be on hand to talk about nutrient losses in growing and storing forage crops.

Lebanon County's Newton Bair, Extension agent, will be presenting the trial results for the burcucumber herbicide tests.

Attendance at this meeting will qualify licensed private and agronomy crops category of commercial applicators to receive update training and a Pesticide Applicator Training Certificate.



Richard Adams, far left, Penn State Extension Dairy Specialist, tells why a balanced dairy ration is necessary for efficient milk production and good herd health. Also pictured from left, are Albert Moyer, Lebanon; Jack Reed, manager of Agway, Lebanon; and Richard Van Lieu, Lebanon, dairyman. Forty-two farmers and agri-business representatives attended the meeting held in Moyer's dairy barn.

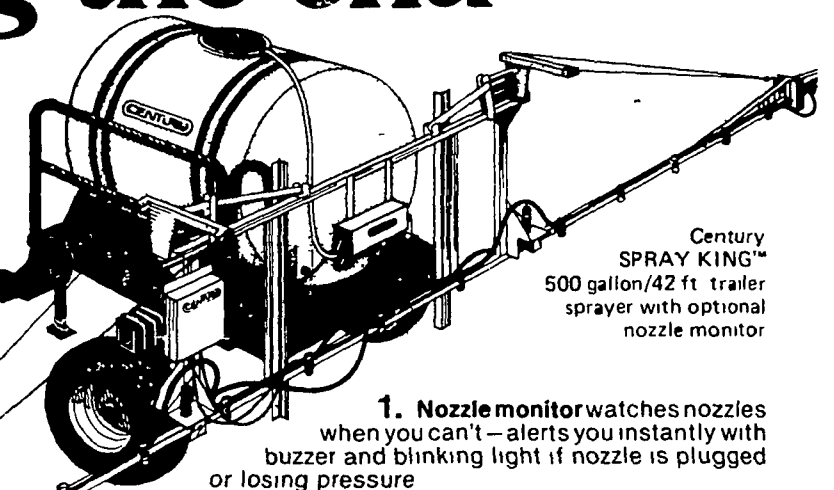
Announcing the end of costly hit-or-miss spraying.



Century SPRAY KING™ 500 gallon/42 ft trailer sprayer with optional nozzle monitor

Century helps assure accurate spraying with all these available advantages:

1. **Nozzle monitor** watches nozzles when you can't—alerts you instantly with buzzer and blinking light if nozzle is plugged or losing pressure
2. **No-drip nylon nozzles** prevent under or over application—keep herbicide from dribbling onto ground, burning crops Won't rust or corrode Wear four times longer than aluminum or brass
3. **Large ⅝-inch E.P.D.M. jumper hose** increases flow to outer nozzles—provides even pressure and proper output
4. **Heavy-duty 1½-inch square tubing** on all booms gives greater, longer-lasting strength than round tube booms
5. **Two-speed fast pressure control** lets you increase or decrease pressure quickly, easily as you spray

This spring, get accurate weed control with these features and more See your Century dealer Or write for free 1980 catalog

Letters To The Editor

Dear Editor,

There have probably been more false statements made about the Beeferendum in the press and by producers than ever made about any other program. It is not a government program, not a tax, it is workable as far as collections are concerned, and it is needed in this age of increasing criticism of all animal products, milk and butter, as well as beef and pork.

No one else is going to promote our products for us -- and consumer education programs on the dietary value of beef are needed. It is becoming more and more difficult to answer the large numbers of falsely written and distorted criticisms of beef as a food and as an industry.

We have a great industry -- the Beeferendum can provide money for us to get on the offensive and meet our critics head-on.

Who's supposed to do this -- not the retailer who will sell anything as long as there's a mark-up.

Not the government, especially since many of the governmental agencies are expressing concern that Americans are eating too much animal products, and beef especially.

This will probably be the last chance for such a program – your vote on the Beeferendum is too important to be based on misinterpretation and misstatements. Think about the facts – then vote your conscience.

L.L. Wilson
State College, PA

Dear Editor,

I am a cattle feeder who is concerned about the future of the cattle industry The passage of the Beeferendum is essential for the survival of this industry.

The Beeferendum is a self-help program that would provide the funds to fight anti-beef propoganda, promote the nutritional value of beef, combat beef substitutes, counter extremes of the cattle cycle, expand foreign markets, and increase demand for beef.

The assessment rate will be 2/10 of 1 percent (20 cents per $100) of the value of cattle.

It will be a value-added plan so that anyone who owns the animal will pay his fair share on the value he adds.

Breeding cattle and dairy cows will be exempted from assessment until they are slaughtered. A producer may get a refund upon request.

The program will be administered by the Beef Board comprised of 60 cattlemen nominated by state or regional cattle organizations and approved by the Secretary of Agriculture.

My fellow cattlemen, please vote "YES" for the Beeferendum.

J. Paul Espy
Tyrone

Dear Editor,

It appears that many people have been under a misapprehension concerning the proposed designation of French Creek in Chester County as a State Scenic River in believing that the French Creek legislation would include a state power of eminent domain and other state regulatory powers. However, the true facts are quite to the contrary. From the start, the draft legislation for French Creek expressly rescinded such powers.

Those of us in the French and Pickering Creeks Conservation Trust who worked on the original studies to see if French Creek qualified as a Scenic River, were opposed to using eminent domain as the basic policy of the Trust since it was incorporated in 1967 has been against condemnation for scenic purposes. Thus the Trust insisted from the very beginning that Scenic River Designation should not involve state condemnation or any other state regulatory powers These restriction on state action were agreed to by the Department of Environmental Resources and an express provision to this end was inserted in the draft legislation.

During my eight years in the Pennsylvania State Legislature, I was a member of the House Agriculture Committee which took an active part in fighting condemnation of farm lands, for example the Barley Farm in Lancaster County. I personally sponsored many bills to protect farmers against eminent domain. As owner and operator of a dairy farm myself, I am naturally concerned with this issue.

Both the Trust and I welcomed the stand of the Grange in opposition to eminent domain, and the recent Grange sponsored meeting regarding French Creek which was the subject of Lancaster Farming articles. This meeting was helpful in dispelling the concerns of some landowners which apparently had arisen from unfounded rumors. For example, it had been suggested to them that if French Creek became a Scenic River, the public would be permitted to come on private property, or that farmers would lose the right to irrigate or to put up buildings less than two hundred yards from the creek. As was brought out at the meeting, these rumors were untrue.

Since the recision of state paramount power regarding French Creek had been agreed to previously, further action on behalf of the French Creek landowners was really unnecessary, and the positive result of the meeting was primarily to reassure the public. In addition, however, the State Grange is also joining with DER to sponsor further legislation removing the threat of eminent domain in connection with all future scenic river designations. This certainly is a praiseworthy development.

Big slaughter, low prices paint near-term hog picture

WASHINGTON, D.C. — For pork producers the next few months promise more of the same—continuing large slaughter and low prices. But some improvement may begin after midyear.

Last December 1, producers reported 67 million hogs and pigs on U.S. farms, 11 percent more than a year earlier, and the biggest December inventory since 1970.

All of the increase came from 14 percent more market hogs. The number of hogs kept for breeding held about steady.

There were 19 percent more heavy market hogs that will reach market weight during first quarter 1980. Those that will reach market weight in the second quarter were up 7 percent. This means that hog slaughter during January-June may be near record levels.

Producers indicated December-May farrowings will be about 7.2 million head, roughly the same as a year ago. Actual farrowing may differ, of course, due to changing feed costs and hog prices. But if intentions are realized, hog slaughter after midyear would be near the high levels of second-half 1979.

With the current large output, consumers will be eating the most pork since 1971, 36 to 38 pounds per person in the first half of 1980 alone.

Moreover, large supplies of competing meats probably will boost total red meat and poultry consumption to record levels, too.

This means consumers will be able to switch to other meats if the price of one increases relative to the price of others. This is likely to prevent any substantial rise in meat prices anytime soon.

Furthermore, incomes aren't expected to keep pace with inflation. Unemployment also is expected to rise, reducing the buying power of many Americans.

High interest rates and heating costs will leave less spending money in the paycheck. So consumers may not be willing to spend as much of their income on pork and other meats as in the past.

The large supply of meats and prospects of a sluggish economy suggest hog prices may range in the upper $30's during the first quarter of this year, and the mid-$30's during the second.

If the economy recovers as anticipated, farmers could see a July-December average in the low $40's. And it could get better later in the year if spring farrowings were to taper off.

Returns near $40 per hundredweight would cover cash expenses for most farrow-to-finish producers but would not cover total costs. The return to labor and management would be small.

There is little farmers can do now to affect prices in 1980 because it's too late to significantly change the number of hogs that will go to market.

Marketings in the first half will come from current inventories. Second-half marketings will come either from sows currently farrowing or from those already bred for farrowing this spring.

But farmers can vary the weight at which they market hogs to get the best return. First, keep weights down when market prices are declining.

The lowest hog prices are expected in the spring, so by keeping weights down during this period, farmers can cut feeding costs and reduce the amount of pork reaching the retail market.

Prices are expected to strengthen in late spring or early summer, so feeding hogs to heavier weights at that time could be profitable.

ABS has booklets on prostaglandin

DE FOREST, Wi. — To help cattlemen and dairymen better understand the use of prostaglandin as an aid to artificially inseminate beef cattle and dairy heifers, American Breeders Service has just published two new technical booklets on "Synchronization of Beef Cattle With Prostaglandin" and "Planned Breeding of Dairy Heifers With Prostaglandin."

"For years ABS has been helping cattlemen and dairymen breed more productive and profitable cow herds," says Russ Berna, director of marketing at ABS. "Now with our knowledge of prostaglandin even more producers are turning to ABS for herd improvement," adds Berna.

With prostaglandin, the heat cycles of beef cattle and dairy heifers can be controlled to occur within a precise time interval.

This allows cattlemen to concentrate their A.I. program and dairymen to plan-breed their heifers at a pre-determined date and time. Heat synchronization and planned breeding also increases the opportunity to make faster genetic progress by using the best A.I. proven sires available.

Both ABS booklets describe procedures for using prostaglandin to plan-breed dairy heifers and synchronize the heat cycles of beef cattle. In addition, important management and A.I. practices necessary for a successful breeding program are highlighted.

Cattlemen and Dairymen can receive a free copy of either "Synchronization of Beef Cattle With Prostaglandin" or "Planned Breeding of Dairy Heifers With Prostaglandin" from their local ABS representative. Or contact American Breeders Service, DeForest, Wisconsin 53532.

Md. firm told to stop violations

CRESAPTOWN, Md — Cumberland Stock Yards, Inc., operator of a livestock market at Cresaptown, Md., has been ordered to stop violating trust account and payment requirements of the Packers and Stockyards Act.

The firm, which draws livestock from western Maryland, consented to the order.

It neither admitted nor denied the charges in an administrative complaint filed by the U.S. Department of Agriculture, and waived oral hearing.

Cumberland Stock Yards, Inc., was ordered to cease and desist from:

Failing to properly maintain its custodial account for proceeds due consignors of livestock; and

Issuing insufficient funds checks and failing to pay when due the proceeds due consignors.

The firm was also suspended for seven days.

The P&S Act is a fair trade practices law. It promotes and maintains fair and open competition in the buying and selling of livestock, meat and poultry.

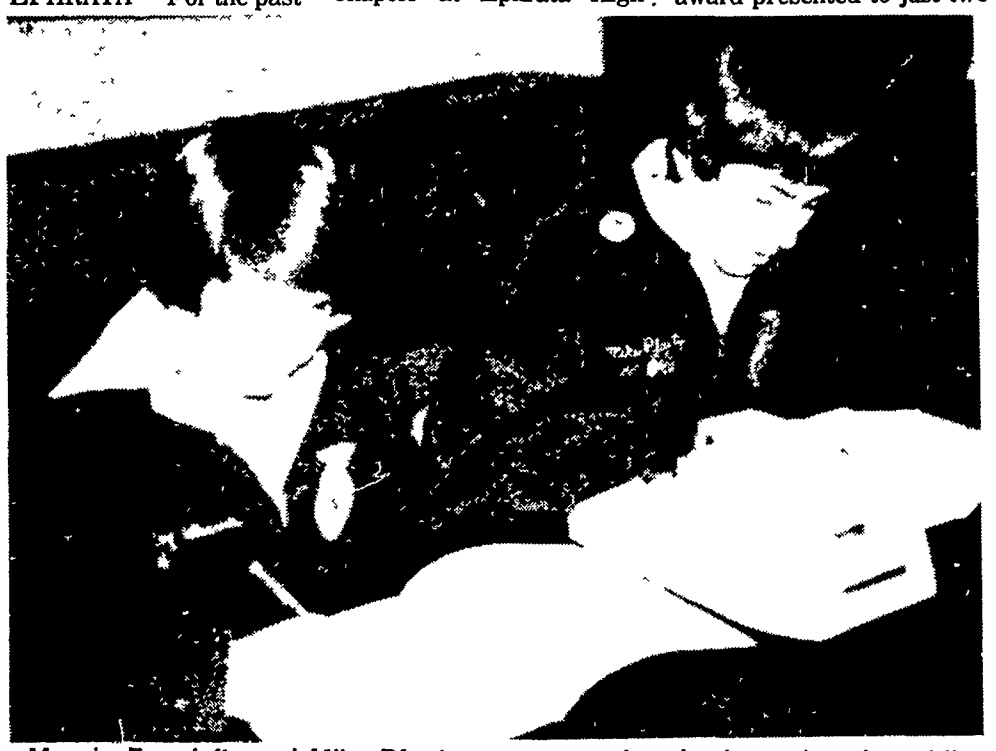
Cloister members show consistent strength

BY SALLY BAIR
Staff Correspondent

EPHRATA — For the past six years, the Cloister Future Farmers of America Chapter at Ephrata High School has received the national chapter award, an award presented to just two or three chapters in each state. The gold emblem is representative of the best FFA has to offer, and it symbolizes the excellence Cloister provides in its program.



Marvin Fox, left, and Mike Pfautz go over project books, using the adding machine for accuracy. Marvin is in his third year as a Cloister FFA Chapter member and Mike is in his second year.

Cloister chapter is one of the four largest chapters in Lancaster County, with 140 total members, including graduates The chapter consistently has winners in county, regional and state contests, and has been known to have large delegations participate in and come home winners in national contests.

Lew Ayers, one of four officials FFA advisors and actual organizer of the program, says simply "It speaks well for our activities. We have enough activities that members can choose any avenue they're interested in. Last year we had five members on national judging teams. We have a state officer and an American Farmer."

He added, FFA offers students the opportunity to be involved. Here our students show a lot of livestock, mostly pigs and dairy cattle."

Last year four Cloister graduates went directly into farming and 12 are involved in ag-related jobs. One graduate went to college and two have non-farm jobs. Overall, Ayers says, about one fourth of their students are from non-farm areas.

The chapter is active in FFA-sponsored projects, but it supports its members by giving annually: one Holstein calf, two purebred Duroc gilts, and a pen of three lambs, and two pens of market hogs. Interested students must fill out applications and go through

(Turn to Page A24)

Learning to operate a table saw is part of the work in the vo-ag course at Ephrata High School. Here Marvin Fox is at the machine. He is in his third year as a member of Cloister FFA.

Lancaster sets March 4 as county dairy day

LANCASTER — Lancaster County Dairy Day is scheduled for Tuesday, March 4, at the Farm and Home Center.

Featured at the meeting will be a farmer panel to discuss "Getting a Grip on Mastitis."

Panel will include Don Ranck, Paradise, who will talk about staph and strep infection; David Windle, Cochranville, on coliform infection; Jay Frey, Washington Boro, on mycoplasma infections; and Penn State Veterinarian Lawrence Hutchinson.

Panel moderator will be Penn State Dairy Specialist Stephen Spencer.

The Dairy Day is scheduled to begin with coffee and donuts at 9 a.m.

A demonstration on screen testing milk to detect antibiotics will give farmers a handle on discovering problems before they become major troubles.

Farmers will be able to prevent bulk tank contamination and may save a load of milk with this method which can be used right on the farm.

A movie on nutrient management for water quality also will be part of the program, according to County Dairy Specialist Glen Shirk.

The film concerns water and waste material handling around the farm to prevent pollution.

Shirk noted that pollution is a growing concern with increased fertilizer usage and manure spreading on local limestone soils. He said the problem could hit both family members and livestock.

Farmers will have a chance to have their restricted pesticide applicators private license renewed at the Dairy Day meeting.

David Thompson, Pennsylvania Department of Agriculture's pesticide coordinator, will talk on recertification.

Farmers should bring their original certificate with them to the Dairy Day meeting so they know their applicator's number.

Those who attend the session can have their license updated.

Garden Spot Vo-Ag teacher Donald Robinson will talk on managing alfalfa for yield and quality.

Stephen Spencer will take the stand again in the afternoon to inform farmers about stray voltage on dairy farms.

A tricky problem which can occur even on Amish farms where there is no electricity, stray voltage can cause herd health problems and have an effect on milk letdown.

Spencer also will talk about heat reclaimers.

Dr. Hutchinson will give a short presentation on raising healthy calves and heifers.

Rounding out the program will be Penn State's new dairy specialist, Michael O'Conner.

O'Conner will talk on prostaglanding, a new and recently approved breeding tool which is useful for synchronizing heat in dairy heifers to aid artificial insemination.

It is not approved for lactating dairy cows.

Lunch for the Dairy Day will be available at the Farm and Home Center.

Also on the dairy datebook is a manure managment session slated for March 17. A farm tour on March 19 and 20 to several manure managment systems will follow the inside session.

Stable by any standard

Olympic series telescopic conversion hoists by Omaha Standard

We believe Omaha Standard s name on a telescopic conversion hoist means a tough piece of equipment that'll outlast the truck We set out to prove that Omaha Standard tested the Olympic hoist with an off-center load suspended out from and completely off the platform with one cylinder disconnected! This test produced an offset load equal to 500,000 in /lbs of torque—the equivalent of suspending over three tons out 80" from the centerline of the truck and body

Here you see it...great torsional stability!

Body twist was negligible the stability shown by the Olympic was excellent We believe that the off-center load test demonstrates what many truck owners have known all along Omaha Standard s Olympic Series, twin telescopic conversion hoists are the finest available on the market today

An Omaha Standard body, matched with the right Olympic hoist it s a tough combination for *all* your hauling

Dairymen cited for herd averages

HALIFAX — Two area dairymen were honored for having high producing herds last past year at the sixtenth annual District III meeting for Atlantic Breeders Cooperative members held Tuesday at Camp Hebron Halifax, Pa

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were Michael and Paul Miller's Great View Farm; and Robert Schaffer, represented by Leonard Waldron.

All herds were at least 15 percent above the state average for milk or butterfat production last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. Awards were presented by Ed Sauder, Atlantic's Field Supervisor for this area.

Leonard Waldron, left, representing Robert Schaffer; and Michael and Paul Miller, of Great View Farm, received certificates of merit for having top DHIA averages.

Reports by District III Director Harold Bollinger of Newmanstown, and management representative Larry Roth, Lancaster, informed members that 1979 was the most successful business year in Atlantic's history. Service Technicians provided 308,000 services, and semen sales increased to direct-herd breeders and through domestic and international distributors.

A 25-minute movie was shown which used on-farm interviews to tell how members make good use of their Cooperative's services and follow sound management practices to further their herd's progress.

Atlantic members who were patrons in 1969 received a cash refund totaling over $137,700. New equities will be issued to members active in 1979.

Members present voted for District representatives for the coming year. Election results will be announced in the next issue of the Cooperative's monthly newsletter, since more than one meeting is held in most of Atlantic's 16 Districts.

Landis museum features spinning, weaving

LANCASTER — The Landis Valley Associates will meet Tuesday, February 19 at 8 p.m. at the Pennsylvania Farm Museum.

Rosalia Smith, Tour Guide Supervisor at the Farm Museum will discuss the history of spinning and weaving of wool and flax. Smith will demonstrate spinning on a drop spindle, wool wheel, and Saxony wheel; and demonstrate weaving on a tape loom.

Smith, a resident of Akron, teaches fraktur classes at the museum. She currently is working on a spinning workshop for the 1980 Institute of Pennsylvania Rural Life and Culture.

USDA to purchase surplus chicken

WASHINGTON, D.C. — Assistant Secretary of Agriculture Carol Tucker Foreman has announced that the U.S. Department of Agriculture's Food Safety and Quality Service is purchasing 11,016,000 pounds of whole frozen young chickens.

The purchase follows an announcement on January 19 to remove surplus supplies of chicken from the market. The surplus resulted from President Carter's January 4 suspension of trade with the Soviet Union.

The poultry will be donated to hospitals, nursing homes and other institutions, according to Foreman, and was purchased for $.4633 to $.5280 per pound–a total cost of $5,489,000.

Offers were accepted from seven of 23 firms submitting bids.

UNIPEL® 13-34-10
fertilizer can get your corn crop off to a super start:
It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly Helps plants establish a good root system – the starting point for top yields Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest
This is the Starter Special that corn growers know from good experience It's highly effective as a banded starter And it's SAFE no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs /acre
How can we fit UNIPEL 13-34-10 into your corn fertility program?

Fire destroys 61 hogs

QUARRYVILLE — "It could have been a lot worse," said Judy Baylis, R1 Quarryville. She explained that she and her husband, Richard, usually keep 60 head of calves in their barn that burned to the ground early Tuesday morning.

The fire, which Judy discovered a little before 3 a.m., destroyed 61 head of hogs, ranging in size from babies to finished slaughter hogs.

"I heard a noise like something falling, and when I rolled over in bed, I saw the glow in the window. By the time I realized what was happening, the barn was totally in flames," she recalled.

"Even though we lost the hogs and the buildings, we have so much to be thankful for. The wind was blowing the heat away from the house and our veal barns. I'm thankful because I had three sleeping children upstairs."

According to Quarryville fire chief Jim Herr, their company arrived at the scene in about eight minutes. By the time they sped from the fire house, down the winding Route 372, to the farm located midway to the Buck, the barn was fully involved.

The Quarryville volunteers were assisted in controlling the fire by companies from Rawlinsville, Bart and Refton.

Herr said the blaze was not considered suspicious, although the state police fire marshall, Dennis Gehrhart, could not determine the cause.

When Baylis saw the fire, it appeared to be on the second floor, reported the fire chief. There were no heat lamps in the barn, and a kerosene heater had run out of fuel the Saturday before the fire.

Herr noted there was a water heater run by propane gas in the barn, but he did not say this was a possible cause. He also ruled out the fire being caused by a tractor because the diesel tractor that was in the barn had not been used for months, and the gasoline tractor was kept outside.

The fire claimed the old bank barn, the tobacco shed and several other smaller sheds along with a tractor, hay wagon, and corn planter. The damage estimate totaled $85,000, $75,000 for the buildings and $10,000 for the contents.

Judy Baylis said that neighbors and friends stopped by on Tuesday to start the clean-up ordeal. But, the clearing away of the charred structure was delayed one day until the insurance people could see the damage.

"By 8 o'clock this morning, people were calling us up and asking if we were ready to get started," she said. By Wednesday afternoon, the crew of neighbors had pitched in to gather the charred building remains on a heap.

"We haven't been in farming all of our lives, and we are so grateful for all of our friends who have helped us pull through this tragedy, Baylis said. "It would have been too much for one person to try to clean up — we would have probably just given up." SM

In an early morning blaze, 61 hogs were lost on the Baylis farm near Quarryville.

Tobacco vote coming up

LANCASTER — Tobacco farmers will once again have the chance to vote for or against a referendum which calls for production quotos, according to Ray Brubaker, County Executive Director for the Agricultural Stabilization and Conservation Service.

All tobacco producers are eligible to vote on February 25, he stated. Ballots will be sent to those farmers who are ASCS cooperators, along with their allotment of farm acreage.

If a tobacco farmer who is not on record at the local ASCS office would like to vote, he or she should stop in at the office to "register".

The question that will be decided is: "Are you in favor of marketing quotas for cigar-filler, type 41, tobacco for the three marketing years beginning October 1, 1980?" SM

Lancaster to run estate sessions

LANCASTER — Estate planning, wills and taxes will be the topic for discussion Thursday, February 21, 7:30 p.m. at the Farm and Home Center.

Wayne Kelly, Professor of Farm Management, Penn State University, will be the speaker for the evening.

The meeting has been planned in an effort to update public understanding of the laws dealing with estates. A review of laws governing estates for farm families will be included.

Cloister FFA Chapter

(Continued from Page A17)

personal interviews. Final selection is made by the students.

Ayers observed, "We get good support from the school. We are fortunate to have high school administrators who support us. We also have good parental support. In ninth grade we talk with the parents and explain project requirements and what's involved in joining FFA. This year we had 40 ninth graders."

The FFA members themselves are enthusiastic about their chapters and the many achievements they have accomplished. Marvin Fox, Lititz R1, says, "A lot of credit goes to the teachers. We have a teaching base that makes us able to go to contests."

Fox, 17, is in his third year in FFA and is vice-president of the Chapter. "The decision to join FFA wasn't hard for me. I lived on a dairy farm all my life and I'm interested in agriculture. My brother was in FFA." His parents, Mr. and Mrs. Richard Fox, milk 42 Holsteins, but Fox says one advantage of FFA is that "you have all areas of study. You can branch out and learn about many things."

As vice-president, Fox says, "Being an officer gives you an opportunity to see how it is to be in a leadership position. It adds to your responsibility. There is no question that it is helpful to you later on.

Fox sees FFA contests as a "bonus." "When you study, your fulfillment is knowledge. But there is a bonus in the contest." Fox went to the national dairy products contests in his freshman year.

True to FFA tradition, Fox said, "When I went to Kansas City it was the first time I flew, and I make it my goal to try to get out again; to see if I could do as good to go again. County officers are always speaking about setting a goal and working toward it. You may not always make the goal, but you are working toward it and not wandering."

He said FFA Week is a good time to tell about FFA. "A lot of people don't know FFA exists. FFA Week gives people an idea of what goes on in FFA; what it's all about."

Dave Smith, 14, is in his first year of vocational agriculture and FFA. He comes from a small farm at Denver R2, where his parents, Mr. and Mrs. Stanley Smith raise bull calves, hogs and capons.

He said he chose vo-ag because, "I think it will help me in the future. In the 12th grade there is the work experience program, which helps you get you started on a job. I like to be with animals, and I think I will learn a lot of helpful things. Smith has two brothers in FFA, and added, "They kind of helped me along and helped me make the decision."

Smith said, "The vo-ag course helps you get wider knowledge and each year we do something different It is a lot more than just being a farmer. There are milk products, carpentry, plants and others."

He is planning to participate in the public speaking contest and is looking forward to the leadership opportunities offered through FFA. "FFA Week is a good way to inform other students," Smith said, "It helps younger students decide if they want to join, and gives them an idea of what goes on."

Mike Pfautz, 15, is also following in his two older brother's footsteps by joining FFA. He said, "They kind of influenced me." Mike lives at Stevens R1 with his parents, Mr. and Mrs. Leroy Pfautz, where they raise purebred Duroc breeding stock. He said, "I want to be a hog farmer, and I think this is a good place to learn things."

Pfautz is also one of Ephrata's many winners in the national dairy foods contest, having received a bronze emblem in Kansas City. He said, "It was the first time I flew, and it was really interesting. It's nice to go to Kansas City and to get as many chances to go as you can. The convention is interesting and there were good speeches.

He said he feels the public speaking aspect of being a member will be helpful to him, adding, "I like politics and I like to be involved with what's going on in local government."

Pfautz enjoys showing, too, saying, "It's a lot of fun to show, but the animals don't always cooperate with you." Last year he showed reserve champion at the Ephrata Fair. At the Farm Show he had the first and second place pig and earned first place in his class as showman.

Pfautz is definite, "I wanted to come into FFA ever since I was in the third grade. I want to be a farmer, and FFA helps you to know about so many different things. FFA is a good program, and it is good to tell everybody about it."

Senior Ron Good, 17, is in his fourth year as an FFA member and is currently on the work experience program, employed five hours daily by Shotzberger's in Elm. Good works mostly on small garden tractors, doing almost anything to get them in good working condition, as well as setting up new equipment

Good said, "FFA is the main reason I have the job. I was in a lot of contests and fairly active They called and offered me the job." He won the small engine contest at the state, and was first individual at the national contest at Eastern States. "I was also in the ag mechanics contest and was ninth in the nation in Kansas City."

Work experience is valuable, Good said, "Because it gives students a job and they are learning a trade, doing something useful."

Traveling to Kansas City for the ag mechanics contest was not Good's first trip there. He also went as a freshman on the dairy products team.

Good is now chapter president, after serving one year as vice-president. "You learn to take responsibility, and you learn that if you don't take the initiative, no one else will."

He feels the outside activities are a big plus for the FFA program. "I have been to Penn State for three years and to Kansas City twice. Where else can you get that opportunity?" he asks.

For the Cloister Chapter, FFA week will offer one more opportunity to get involved and tell the community what they're doing.

Ron Good goes to work on a tractor as part of his work experience program. Good is president of Cloister FFA Chapter.

MR. DAIRY & BEEF PRODUCER

Who Are You Going To Believe?

Some people and groups are known for building. Some people and groups are known for tearing down.

The Beeferendum group, over the past five years, has worked with every state Dairy and Beef group to BUILD a program that will help solve the industries pressing problems.

There are persons and groups that have NO PLAN or solutions but they are trying to tear down an honest working program with lies, distortions and half truths. For example they state the Beeferendum is a "TAX" but forget to mention any producer may request & receive a refund on request.

WHAT IS BEEFERENDUM?

IT IS NOT: A Government Program to be run by Washington

IT IS: A Program Administered by a beef board whose members are beef producers selected by other beef producers in their state. Cattlemen initiated the program, cattlemen will pay for the program and cattlemen will "FLAT OUT" run the program without government.

IT IS NOT: A Tax

IT IS: A self-help program financed by 20¢ per $100 of the value you add to the animal. An average 40 cow dairyman would invest less than $20 per year and that could be refunded on request.

IT IS NOT: A permanent order

IT IS: A program that as few as 10% of those voting can request a new referendum.

CONSIDER THIS

- People are beginning to eat less beef. Recent consumer data shows that beef demand is indeed slipping. Consumers are evidently believing the half truth & misleading statements made by food faddists over the past several years.
- This means smaller markets & lower returns for everyone who produces beef - including dairyman.
- We must promote the nutritional - 1-value of beef, 2-develope new markets, 3-support new product research & 4-combat beef substitutes.
- This can only be accomplished successfully by pulling our resources. Combining efforts of all beef producers can result in far more effective programs than any of us could afford individually. Other commodity producers have proved this.
- Eggs, apples and cotton have had success in similar referendums with no government interference and good producer acceptance of the benefits.

- Beef spend Less on Promotion or research than any other food product.

Are you a building person or are you a negative tearing down person? We encourage you to "Take Charge" VOTE "YES" on Beeferendum

QUESTIONS ON THE PLAN MAY BE DIRECTED TO THE FOLLOWING:

PENNA. BEEFERENDUM

Five County residents were elected to terms on the Lancaster Extension Association Board. From left are, James Eshelman, Mt. Joy, reelected to second term; Allen K. Risser, Leola; Mrs. Arlene Eshelman, Willow Street, reelected for second term; and Mrs. Thelma Hess, Strasburg. Not present was Kenneth M. Rutt, Quarryville.

Extension dinner

(Continued from Page A1)

Doyle's home economist positions in Lancaster County. In all, seven jobs in the Capital region were restored.

Deppen also talked about the need for research to expand ag production and to help solve the energy shortage.

Deppen outlined several possibilities to solve the energy problem, including using Pennsylvania's hardwood forests. He said wood chips, mixed with the state's high sulfur coal, would produce a non-polluting energy source.

Hallowell, too, saw energy as an area where agriculture can make a major contribution to the nation.

He said Pennsylvania's woodlots and forests are an untapped resource, another reason to be optimistic about the decade of the 80s.

Hallowell noted Pennsylvania agriculture has been the number two industry to steel for years. Tourism is a close third.

He said the decline in steel, coupled with less travel due to the fuel shortage and the increased opportunities for agriculture, should make agriculture number one in '81.

He said the Department will focus on marketing, and plugged the Pennsylvania product slogan "Pennsylvania Agriculture—We're growing better."

He said the Department has about a half million small stickers for free distribution to farm markets and food retailers. They can use them to piggyback on the state farm product promotion.

"Pennsylvania Agriculture has a lot to look forward to in the 80s," he said. "Those who prosper will be those who turn adversity into opportunity."

He noted a group of 60 Japanese are coming to Pennsylvania on September 15 to look at Pennsylvania farm products.

"Here's an opportunity to trade agricultural products for televisions," Hallowell said.

The Secretary also said Pennsylvania has the greatest number of Holstein cows which are registered, on test, classified for type and holding proper health charts.

He said such cows are in demand overseas and represent another area where Pennsylvania farmers can boost their incomes.

He said the reason foreign cow sales have slowed recently is farmers in the United States are willing to pay a higher price for good cows today.

He predicted some form of tax relief will be available to farmers in the near future.

He spoke of the bill introduced by Representative Noah Wenger, Stevens, and called Wenger "part of the great team of Lancaster County legislators."

He mentioned HB 1983, modeled on Amos Funk's proposal to insert restrictions in farmland deeds. He said such a bill could work for Lancaster County even if it were not applicable in all counties

Hallowell told Extension Association members Act 319 will be ammended. As it stands, the Act requires a rollback be charged on the sale of farmland even if the use doesn't change. The ammendment would allow no penalty to be charged if the land's use did not change

He said the Department favored a reduction in the state inheritance tax charged upon a farm owner's death. He said the high taxes now charged are a prime reason farms are split up and sold off.

Hallowell praised the Lancaster Extension staff, calling them "one of the best in the state."

The staff reported spending 30 percent of its time on youth projects. Farm products took 32.6 percent of its time.

There are 118 4-H clubs with 3742 boys and girls helped by 386 leaders.

Extension reported holding 1458 meetings attended by over 46,000 persons. Agents also reported offering individual assistance to 48,200 people. — CH

Agriculture Secretary Penrose Hallowell predicted passage of a milk security fund by June during his talk at the Extension Annual meeting.

Lehigh charges

(Continued from Page A1)

charges a "crybaby publicity barrage."

Dairylea said Lehigh's charges were totally false and said the prices cited by Dairylea also were totally false.

But Dairylea refused to disclose the actual prices saying it would never begin to tell anyone about the details of any business agreement.

At A&P's Montvale, N.J. plant company officials said they could not comment on the case as it was being handled by their legal department.

"We are charging the lowest price we are allowed by law in those 20 stores," was all company spokesman Bill Vitulli would say.

Lehigh's Barry maintained the laws were intended to protect the price paid to dairy farmers.

Barry said consumers are paying between $1.80 and $1.94 for the same package of milk at A&P.

"That gives A&P 38 to 52 cents per gallon on what is supposed to be an economy package," Barry said.

He called the margin "an outrageously high profit for any chain store to extract."

He said it results in an extraordinarily low payment price to farmers.

Barry said he felt the Dairylea agreement amounted to illegal tolling of milk.

"Earl Fink (PMMB Executive Secretary) has the power to pull the licenses," Barry said. "The regulations are liberal and he can attempt to do it.

"If he doesn't, why should anybody abide by the law?" Barry asked.

Fink said Thursday he had assigned a team to investigate the Lehigh charges. He said if the charges in the complaint were substantiated that PMMB would hold a hearing.

Even should Fink move to revoke license as requested by Lehigh, the action could be slowed down in court for 30 to 90 days by Dairylea.

"If PMMB is unwilling to move against A&P and Dairylea they put Lehigh in an untennable position," Barry said.

He called Dairylea's pricing "idiotic" and said only a desperate co-op could sell milk at a price as low as Dairylea.

"We worked hard to move from a $5 million loss to $800,000 profit and we'd hate to lose it to the bad managment of another co-op," Barry said.

"They are where we were five years ago. Their last financial statement showed them about $4 million in debt," he said.

He said Dairylea's action could only end up costing the farmer money.

Dairylea took strong exception to the charges. Dairylea said Lehigh is "desperate."

"We're annoyed to perceive anyone trying to keep a customer by using a government agency to browbeat the customer," said Dairylea's Bruce Snow.

Snow said Dairylea was fully audited by PMMB before the deal with A&P was consumated. He said the deal was made last Friday, February 8.

On Saturday, February 9, a hearing was held to give PMMB better control over tolling.

Regulations were promulgated to require a 45-day notice on such contracts and requiring a three percent margin.

Dairylea charged PMMB failed to have a public hearing on the matter before taking action.

Snow said Dairylea asked to comment on the matter and PMMB refused to allow comment.

He said Dairylea's legal council said the ammendment to PMMB rules is illegal because it is ambiguous and because of the manner in which it was promulgated.

Snow also pointed out Dairylea was servicing the A&P account before the rule was instituted.

They had started the day before PMMB gave its ruling.

PMMB's Fink agreed that Dairylea's agreement with A&P was started before the regulation took effect.

But, Fink said, the regulation was proposed in December, was open to comment for 30 days, and PMMB voted to promulgate the regulations on Saturday, February 2.

The regulation was published in the Pennsylvania Bulletin on February 9.

Since Dairylea's agreement went into effect the day before the regulation was published Fink said the rules do not apply to the agreement.

That did not seem to make Dairylea any happier about Lehigh's charges.

"Lehigh, for years, has taken accounts away from other people. They should be willing to meet competition with competition rather than force," Snow maintained.

In its charges, Lehigh also asked a state-wide hearing to review retail minimum pricing as now structured to avoid over-control.

Lehigh recommended a major change to allow all dealers and retailers to sell at competitive prices, but not below cost.

A hearing set for Tuesday may touch on that subject. The February 12 hearing will give the industry a chance to tell PMMB how to improve its regulations on tolling.

But the meeting should have little or no effect on the Dariylea deal.

And it probably will be a while before dairy circles stop spinning from the charges.

Rules change for returning U.S. animals from Canada

WASHINGTON, D.C. — Rules for animals returning to the United States after being exhibited in Canada have been amended, the U.S. Department of Agriculture reported Thursday.

Pierre Chaloux of the USDA's Animal and Plant Health Inspection Service, said the amendment will allow animals and poultry to be exhibited in Canada and returned to the United States within 90 days without the need for Canadian health or test certification.

Horses, however, must have been tested with negative results for equine infectious anemia prior to entering Canada and returned within 90 days of the date the horses were tested.

Offspring of U.S. animals born in Canada during the 90-day period will not need tests to enter the United States.

Chaloux said the new regulations also will permit foals of Canadian mares to enter the United States without testing for equine infectious anemia, provided the accompanying mares were found negative to equine infectious anemia tests before giving birth and imported within 60 days of the test date.

The amendment was published in the February 8 Federal Register.

A final impact analysis statement has been prepared and is available from Program Services Staff, Room 870, APHIS/USDA Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782.

Beeferendum D-day comes this week

BY SHEILA MILLER

LITITZ — This week is D-Day for the Beef Research and Information Act, commonly called the Beeferendum. The close to 10,000 registered voters in Pennsylvania will cast their ballots, for or against the proposed check-off.

The cattlemen registered represent about one-fifth of the cattlemen in the state. They will be voting from February 19 through 22 on whether or not to establish a beef board.

The research and information program would be funded by an assessment of up to two-tenths of one per cent of the value of cattle sold by producers. For example, on every $100 sale value, 20 cents would go toward the program.

The referendum is being conducted by the Agricultural Stabilization and Conservation Service, but it would be monitored by the Agricultural Marketing Service.

At the end of the cattle chain, the slaughter point, the total value of the assessment on the animal would be deducted and forwarded to the beef board. The only time money is exchanged is at the time of slaughter.

The beef board will be made up of cattleman delegates representing each state or geographic area based on its share of U.S. cattle industry.

Under this referendum, cattle for breeding purposes or commercial milk production are exempt from assessments until the time they are slaughtered.

And, farmers can request a refund for their assesment if they show a receipt of payment with their request to the board.

If a farmer simply slaughters his own animal at a plant but plans to use the meat for himself the animal is not assessed because it has not been sold.

There are mixed emotions among farmers and cattlemen about this referendum. If passed, it will have a long-range effect on the beef industry.

The important thing to keep in mind is to vote, whether pro or con, so that the outcome of the ballot casting will reflect the true sentiments of Pennsylvania cattlemen.

pfizer genetics

Pfizer Genetics' Trojan Hybrid Seed Corn is tested by the most superior method of on-the-farm testing known to the seed industry. This special test, designated as TST, is designed to make the most statistically valid comparisons among hybrids on a field scale.

Jacquar, the grand Champion Charolais bull at the Farm Show, went on to capture the grand championship at the Dixie National in Jackson, Mississippi. Pictured are Mr. and Mrs. Walter Heistand, Manheim, owners of the bull, and Cliff Orley of Keystone Cattle Service at halter.

Lancaster bull wins Dixie National

JACKSON, Miss. — The grand champion Charolais bull at the Dixie National show, held last Sunday, was a Lancaster County bull.

RCC Royal Jacquar, who also won top Charolais honors at January's Pennsylvania Farm Show, won his junior yearling bull class and went on to be tagged the top white bull of the show.

Jacquar is owned by Mr. and Mrs. Walter Heistand, Manheim, and the Royal Charolais Company, Youngwood.

The bull didn't have long to rest after cleaning up at the Dixie. He travelled to San Antonio, Texas where he competed with over 200 top Charolais.

During the Thursday morning show, Jacquar succeeded in placing at the top of his class, but fell short of the grand championship in tough competition.

Heistands will be returning the bull to their farm near Colebrook where they plan to use him to service some of their top females.

The young bull, who is not yet two years old, will be an important celebrity in the Heistand's 75 head herd of big, white Charolais. SM

TROJAN T1058 THE HYBRID OF THE '80's

Few 105-day hybrids can stand up to T1058 for consistent high-yield potential in a variety of soil and weather conditions.

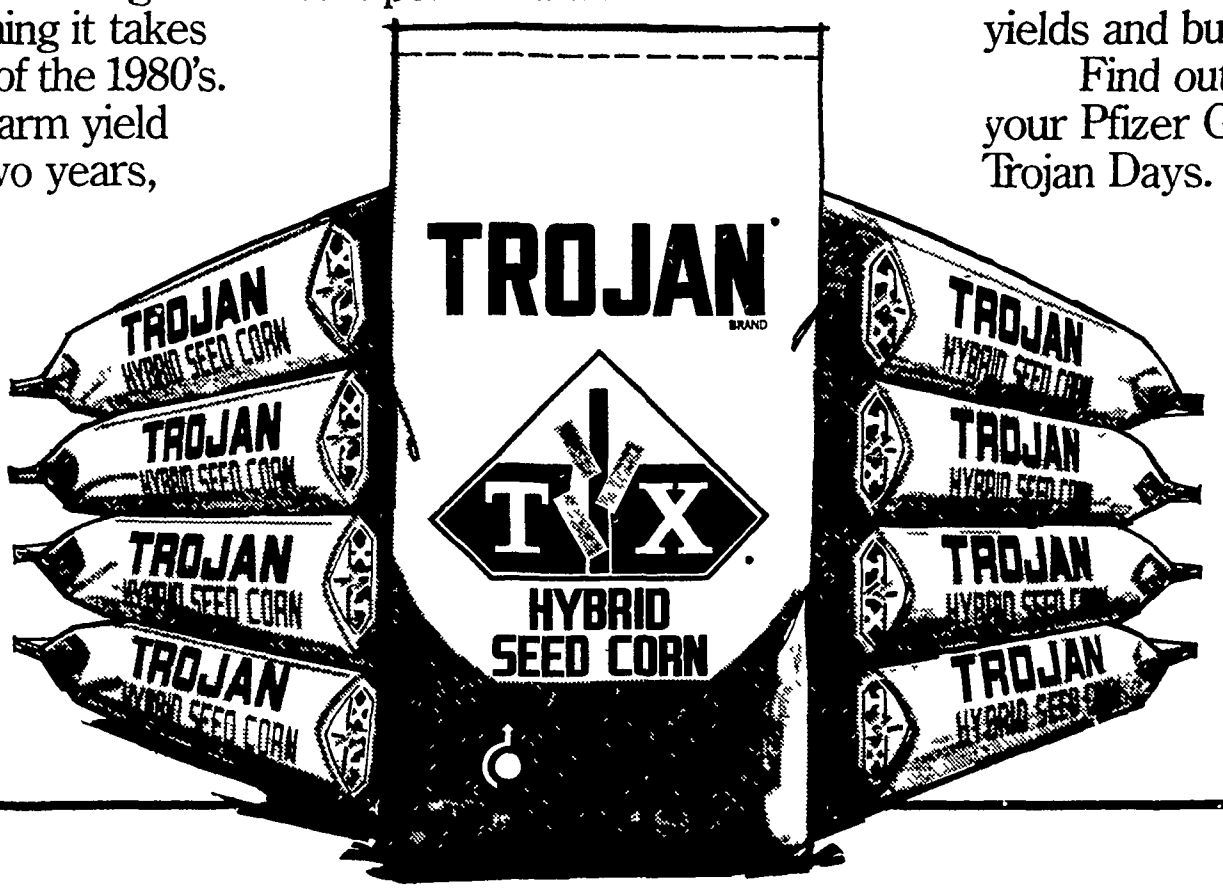
The record shows this strong-standing, medium-height champion has everything it takes to be the classic corn of the 1980's.

In 328 TST on-farm yield trials over the past two years, T1058 has delivered the high yields farmers have come to expect from Trojan hybrids.

Obviously, there's a special science to delivering this consistent performance. And no one applies that science more skillfully than the creators of Trojan T1058.

Year in, year out, the industry's finest research team is at work, making Pfizer Genetics the name to count on for bigger yields and built-in profitability.

Find out all about T1058 at your Pfizer Genetics Dealer's Trojan Days.



HYBRID CHARACTERISTICS OF TROJAN T1058.

Seedling Vigor:	Very Good	Drought Tolerance:	Very Good
Leaf Habit:	Semi-erect	Ear Height:	Medium
Plant Height:	Medium	Test Weight:	Very Good
Stalk Strength:	Very Good	Dry Down:	Excellent
Disease Tolerance:	Very Good	Method of Harvest:	Combine or Pick
Root Strength:	Very Good	Population:	Medium High
Type of Cross:	Single	Trojan Relative Maturity:	105

PFIZER GENETICS HAS IT DOWN TO A SCIENCE.

Four area dairymen honored by ABC

MT. ZION — Four area dairymen were honored for having high producing herds this past year at the sixteenth annual District III Meeting for Atlantic Breeders Cooperative members held Tuesday at the Mt. Zion Fire Hall.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were Restful Acres (Frank Graybill); Marvin K. Meyer & Sons; David Brandt; and Harold Heck.

All herds were at least 15 percent above the state average for milk or butterfat production last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires.

Awards were presented by Ed Sauder, Atlantic's Field Supervisor for this area.

Reports by District III Director Harold Bollinger of Newmanstown, and management representative Harry Roth, Lancaster, informed members that 1979 was the most successful business year in Atlantic's history.

Service Technicians provided 308,000 services, and semen sales increased to direct-herd breeders and through domestic and international distributors. Atlantic sires maintained their rating among the nation's best for transmitting profitable traits, Roth said. A new marketing-distribution center was constructed last year.

A 25-minute movie was shown which used on-farm interviews to tell how members make good use of their Cooperative's services and follow sound management practices to further their herd's progress.

Atlantic members who were patrons in 1969 received a cash refund totaling over $137,700. New equities will be issued to members active in 1979.

Members present voted for District representatives for the coming year. Election results will be announced in the next issue of the Cooperative's monthly newsletter, since more than one meeting is held in most of Atlantic's 16 Districts.

Certificates of merit were presented to Frank Graybill, Restful Acres, left; David Brandt; and Harold Heck. Not present was Marvin K. Meyer and Sons.

A stitch in time will make Grange deadline

HARRISBURG — Almost 3000 contestants from all parts of the state are expected to enter garments in the Pennsylvania State Grange's 22nd Annual Sewing Contest. Contest deadline is April 30, 1980.

"The competition is open to both men and women, and to youngsters twelve years old and under" according to Mrs. Ruth Hoover, Director of Women's Activities for the State Grange.

"The competition is not limited to just Grange members. Anyone may enter as long as they are sponsored by a Grange member," Mrs. Hoover added.

At the close of the contest on April 30, judging at the local, or Subordinate Grange level begins.

This will be followed by county-wide, and then state level judging. State winners will then be judged in the National competition.

Almost 2900 garments were judged in last year's competition.

There are five classes in this year's contest. They are:

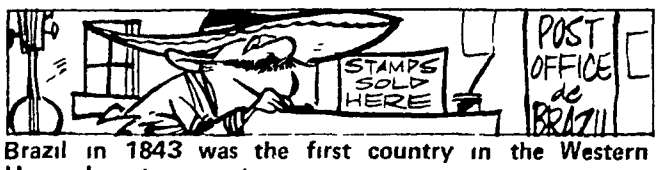
Class A, Adults – any type garments made by a contestant for a person 13 years of age or over for self or another person.

Class B, teens – any type garment made by a contestant 13 to 17 years old for self or another person of the same age group.

Class C, childrens – any type of garments made by a contestant for some one else twelve years of age and under.

Class D, boys & girls – any type garments made by a contestant 12 years of age and under for self.

In addition to the State and National Grange, co-sponsors of the contest are: Simplicity Pattern Co., The Singer Co., La Mode & Le Chic Buttons, and Dritz Sewing Notions.



Brazil in 1843 was the first country in the Western Hemisphere to issue stamps.

Pork Congress

(Continued from Page A1)

the convention center. In one of the rooms, the pork producers seemed to congregate around a hot dog grill where one of the exhibitors was cooking up free samples. In the other room, the crowds seemed to migrate to the ice arena.

The producers heard from various experts on new and old management rules. The experts ranged from college professors to panelist farmers who shared their experiences in growing hogs.

Professor Louis Moore presented an outlook for hogs and feed in 1980.

He pointed out that Pennsylvania ranks seventh in the nation for slaughtering hogs, killing 85 per cent of the hogs in the Northeast; and that the state has 34 per cent of the slaughter plants in the Northeast

In a comparison with beef, he noted that the per capita consumption of pork was 70 pounds in 1979 and is predicted to go up three pounds, whereas beef, at 102 pounds, is predicted to drop by three.

Why the change in diet? According to Moore it's because of the $1 per pound difference in price between the two meats.

When one of the producers questioned why Moore felt they should be happy about this situation, he said that with the lower price for pork in the supermarket, the consumers will continue to choose pork over beef.

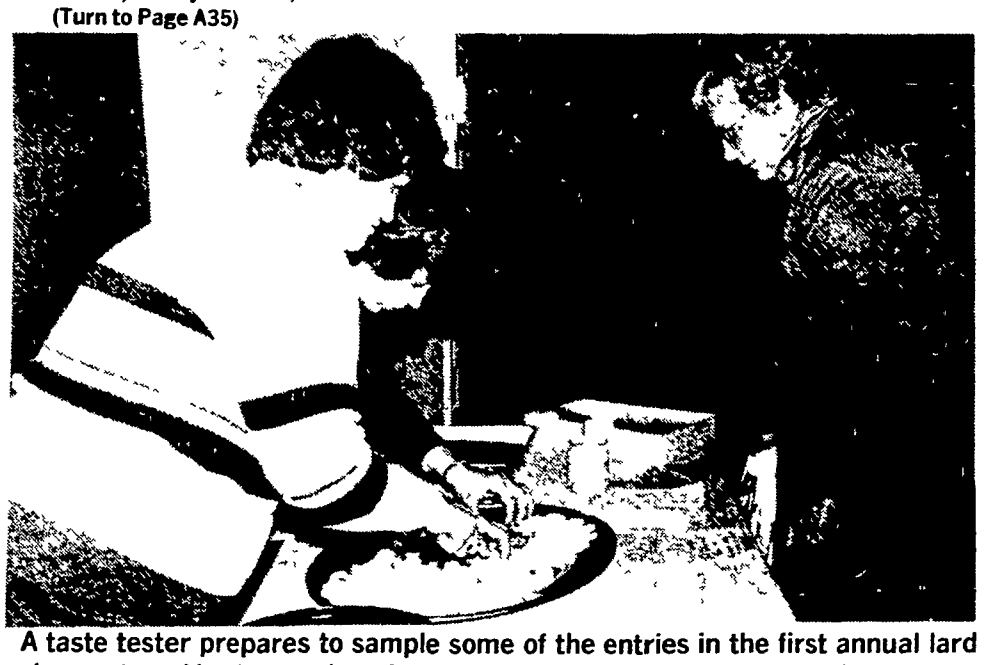
And with the numbers of hogs on the production line showing no signs of decreasing, the fact that consumers are buying will keep the hogs moving and they won't pile up. As a result, the price the farmer gets for the hogs won't drop.

Moore advised the producers to watch their feed, watch the supply of beef, watch their hog numbers, keep an eye on chicken, and keep an ear tuned to the general economy.

In the management seminars, hog producers learned about managing replacement gilts from John Hurtgen, a veterinarian from the University of Pennsylvania. Another veterinarian, Wally Brandt,

(Turn to Page A35)

Robert Hall was selected as the outstanding 4-H Swine producer. Presenting the award is Clyde Strock.



A taste tester prepares to sample some of the entries in the first annual lard recipe contest. Hard at work and keeping the trays full are Ann Arnold, Lebanon, forefront, and Sandy Bachman, Annville.

ATTENTION PENNSYLVANIA ALFALFA GROWERS.

Now that you can use Furadan at seeding, here are four good reasons why you should.

Here's the big news about Furadan® insecticide-nematicide in Pennsylvania alfalfa. Furadan 10G & 4F are now cleared in Pennsylvania* for seeding time application. And they are the only products you can use at seeding to control alfalfa blotch leafminers and potato leafhoppers. Here are the reasons why you should be using Furadan.

1. Save time and fuel with fewer trips.
You can stop two of your biggest alfalfa insect problems while you save fuel-wasting sprays. Because you apply Furadan 4F at the same time you put on herbicides. So one trip can take care of everything.

2. No seedling injury.
With Furadan, don't worry about seedling damage from chemicals applied below-ground. You can put Furadan right next to the seed and it won't affect germination. You'll be getting your crop off to a strong start.

3. No crop injury.
You can protect your high value alfalfa without running over it. Because now you won't have to leave tracks from ground application equipment.

4. More uniform stand.
When you take a look at the field right before cutting, you'll see a deep green crop with an even, uniform stand.

That's the Furadan payoff: more high quality, high protein alfalfa.

This season, take advantage of Furadan protection at seeding. Because Furadan stops more pests and saves more alfalfa. Read the label carefully and use only as directed. But use Furadan. From FMC Corporation, Agricultural Chemical Group, 2000 Market St., Philadelphia, PA 19103.

*A Section 24C special local needs registration has been granted for Furadan in Pennsylvania.
Furadan 4 Flowable is a restricted use pesticide "For sale to and use only by certified applicators or persons under their direct supervision, and only for those uses covered by the certified applicator's certification."

FMC

Furadan is a registered trademark of FMC Corporation

Ask the VMD

Leon Riegel Tim Trayer Edgar Sheaffer

In case of emergency

A reader asks:

I would like to get a first-aid box ready for the barn. We have both cattle and horses, and eventually will get a few head of sheep and hogs. What do you recommend to keep in a first-aid kit for livestock?

Dr. Sheaffer comments:

The following is a list of items I recommend as basics to include in your first-aid kit. These supplies are most helpful in an emergency situation.

In regard to the medications listed, you must remember that most medications are dated and therefore should be used before they expire. Expired medications should be discarded and not used.

The first-aid kit supplies should be reviewed every six months. Any outdated medication should be replaced.

Bandage Materials

Sheet cotton — for use under pressure wraps over wounds of legs and feet;

Roll cotton — for cleaning wounds, for use with alcohol when giving injections, and for making an emergency splint;

Gauze rolls — for use over cotton to make a bandage tight.This is especially good for hooves;

Gauze squares — for use in applying a wound dressing directly on a wound;

Track wraps of heavy elastic bandages — for providing support, controlling swelling and/or bleeding when applied over cotton and gauze;

Tape — either medical adhesive tape or electricians tape is satisfactory;

An old but strong bed sheet or bath towel — for applying pressure around the animal's body. When used properly, this will control bleeding of a cut milk vein in cattle, or prevent a traumatic hernia from enlarging until your veterinarian arrives.

Injectable Medications

Antibiotics — usually prociane penicillin G is adequate. Always keep refrigerated so that it is effective until the expiration date on the bottle;

Tranquilizer or sedative — like promazine, Acepromazine or Rompum. Be sure you are familiar with dosages, indications and contraindications for any tranquilizer or sedative that you use. Make sure that your veterinarian knows what you have on hand so that he or she can direct you how to use it when needed;

Epinephrine or adrenalin — used for shock and allergic reactions where the cardiovascular and respiratory systems are impaired;

Antihistamine — useful in most emergency situations for treating allergic reactions to vaccines, insect stings, other medications, etc;

Analgesics for pain and inflamation — injectable dipyrone can be used for intestinal pain, colic, in all species. Many of the newer antiprostoglandins are effective as a quick acting analgesic. Also, oral aspirin can be used for pain or to bring down a fever;

Tetanus antitoxin — this is most important in horses and sheep to provide temporary protection against tetanus or lock jaw.

Topical Medications

Antiseptic cleaning solution — hydrogen peroxide is good as an initial cleanser but should not be used repeatedly because it destroys delicate tissues. Mild soaps like Safeguard, Dial, Phisohex, or Castile can be used initially to clean a dirty wound. Many times, however, cold running water is a better cleaner than either soaps or peroxide;

Wound dressing — Nitrofurozone or Nolvasan ointments can be used under gauze and cotton on a wound to prevent local infections;

Tamed iodine antiseptic — useful for puncture wounds of the foot and also for the navel of newborns;

Eyewash — for removing foreign materials and cleaning an injured eye. An antibiotic eye ointment should also be included to medicate an injured eye until the veterinarian arrives;

Milk of Magnesia — an antacid and laxative.

Instruments

Needles and syringes for giving injections;

Forceps — for removing splinters and other foreign material from wounds;

Surgical scissors — blunt — for trimming damaged tissue and hair around a wound;

Bloat tracar — for relieving gas bloat in cattle and sheep. Your veterinarian can instruct you in the proper use of a bloat tracar.

Restraint Equipment

Rope;
Halter;
Nose lead for cattle;
Twitch for horses;
Snare for pigs;

Miscellaneous Equipment

Hose — many times cool running water is the best way to clean a wound or to cool a hot swollen leg;

Blanket — for warming animals that are chilled or in shock;

Clean bucket — for applying warm or cold medicated solutions to injuries.

Miscellaneous Medications

Linaments;
Epsom salts;
Leg sweats.

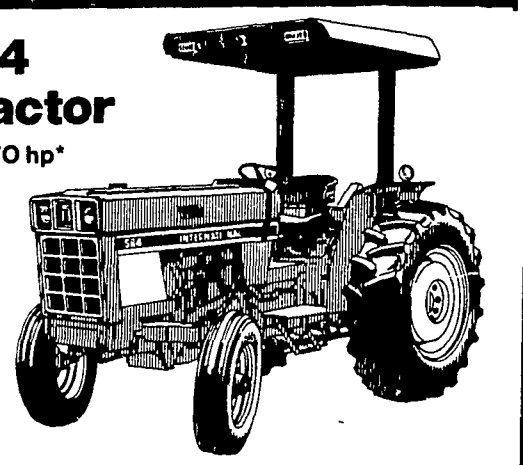
If you have a question you would like to have answered by the team of doctors at Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, PA 17543.

The National FFA Center is located near historic Mount Vernon, in Virginia, on 37 acres which once was part of Washington's estate.

INTERNATIONAL

584 Tractor

52 PTO hp*



The 584 tractor combines big, responsive power and quick, easy handling to make every job go faster and easier. Big pull for plowing and disking, independent 540 PTO for baling and forage harvesting, plus all the hydraulic power you need for loading. Utility and row-crop models

- 206 cu in IH multi-range diesel engine
- Synchronized (8F/4R) transmission with fast in-line shift
- Big 12.5 GPM hydraulic pump—no need for an optional pump to handle a loader
- Hydraulic disc brakes, differential lock, Dyna-Life® clutch, 3-point draft sensing hitch, power steering, split-deck controls and much more

Curt Shreiner, Pa. Pork Cook-Out King receives his award for promotion from Eugene Wingert.

Commercial exhibitors numbered close to seventy at the second Keystone Pork Congress.

Pork Congress

(Continued from Page A32)

spoke on handling new feeder pigs and finishing health problems.

Gene Isler, an animal scientist from Ohio State University, gave suggestions on sow selection and culling. And two agricultural engineers covered methane gas generation from manure and solar energy in swine housing.

Many of the women attending the Keystone Congress were involved with the Porkette program. They heard from the National Pork Queen, Ann Starr, and had demonstrations on preparing their favorite meat in different ways.

A lard recipe contest not only provided delicious goodies for the Congress participants to taste, but the monies collected from the contest will go to heart research and porcine valves.

Instructions on how to do cardio-pulmonary resuscitation was an educational part of their program.

During their banquet on Wednesday evening, the Pork Producers honored Robert C. Hall, R1 Julian, Centre County. Hall was selected as the outstanding 4-H swine producer.

Hall, a member of 4-H for eight years, helps his father on their 112 acre farm. They raise 250 to 300 hogs in their farrow to finish operation, along with thirty purebred Yorkshire sows.

Curt Shreiner, the Pennsylvania Pork Cook-Out King, was recognized for his outstanding contributions and promotional efforts.

Dwight Younkin, a Penn State Extension animal scientist was selected as the outstanding man of the year.

Younkin has served as an Extension specialist since 1953. He received his degree in animal husbandry from Penn State in 1951, and while at Penn State was a member of the Block and Bridle Club, the livestock judging team, Phi Kappa Phi, and Gamma Sigma Delta.

He was honored by the swine producers of the state for his contributions to the industry through swine breeding, feeding, and related activities.

After accepting his genuine pigskin jacket, Younkin stated that he enjoyed working with the producers — but all he did was just sit back and let them go.

Dwight Younkin was voted the outstanding man of the year.

It was said that through Younkin's foresight the first Pork Congress was held. And with the success and turn out for the second annual event, there's sure to be another next year.

PORK IS NUTRITIOUS
PORK, DELICIOUS AND NUTRITIOUS FOR YOU AND YOUR FAMILY

THINK OF IT AS A GLASS OF WATER THAT WON'T BREAK OR GO DRY.

Simple, bright ideas make Shenandoah products better Like our valves and troughs For proper dependable watering, the valve simply has to work full time So our highly sensitive water level control makes sure the water doesn't go down And fewer moving parts mean there's less chance of it breaking down Then there are the little differences we build in like heavy duty frames and stainless steel troughs that make our waterers so durable And your job so easy

At Shenandoah, we make the best products we possibly can And that's a bright idea

Shenandoah
Bright ideas in farm equipment.

Farm museum program to feature antiques

LANCASTER — The 1980 Antiques Lecture Series will be held at 8 p.m. each Wednesday evening in March at the Pennsylvania Farm Museum of Landis Valley. This year's topics are furniture, procelain, wood carvings, and pottery.

For the first lecture, March 8, Vernon Gunnion, Curator of Collections at the Pennsylvania Farm Museum, will discuss "Furniture of Southeastern Pennsylvania". Gunnion will focus on the walnut and cherry furniture of the later eighteenth and early nineteenth centuries.

The second lecture, "Chinese Export Porcelain for the American Market", will be delivered by Nancy Schiffer on March 12. Schiffer, an author and appraiser, was formerly Curator of Collections at Tryon Palace Restoration, New Bern, North Carolina.

The third lecture, to be held March 19, features Milton E. Flower speaking on "The Wood Carvings of Schimmel and Mountz." Flower prepared a catalogue of Schimmel and Mountz carvings in conjunction with an exhibition at The Abby Aldrich Rockefeller Museum in Williamsburg, Virginia

The fourth lecture will be held March 26. Donald Winer, Curator of Fine Arts at the William Penn Museum, Harrisburg, will examine "Redware, Forms and Shapes". Winer, a potter, will use miniature examples of redware pottery to illustrate his lecture.

Each lecture will begin at 8:00 p.m. Admission is by ticket only; tickets are one dollar for each lecture or four dollars for the entire series. Tickets go on sale February 20 at the Farm Museum. For further information, please call the Farm Museum at 717/569-0401.

Montour Co. to hold storm water meeting

DANVILLE — Local residents will have their first opportunity for public input in implementation of Pennsylvania's Storm Water Management Act 167 on Tuesday, February 19.

That is the date set by the Montour County Conservation District for a public meeting to review and discuss designation of watersheds to be studied under the act.

The meeting will be held at 7:30 p.m. at the district office in the First Ward School Building, corner of Pine and Mahoning Streets.

According to Walter Loncosky, district chairman, state officials have indicated studies should be completed on five watersheds within the county. One of these, Sechler's Run, was completed prior to passage of Act 167.

The public meeting will give local residents an opportunity to discuss additions to the basic plan as well as to suggest priorities of study. Local recommendations will be forwarded to the state for consideration.

Although it will take two years to implement Act 167, local people should participate in the early stages of the program if local wishes are to be incorporated in the work plan.

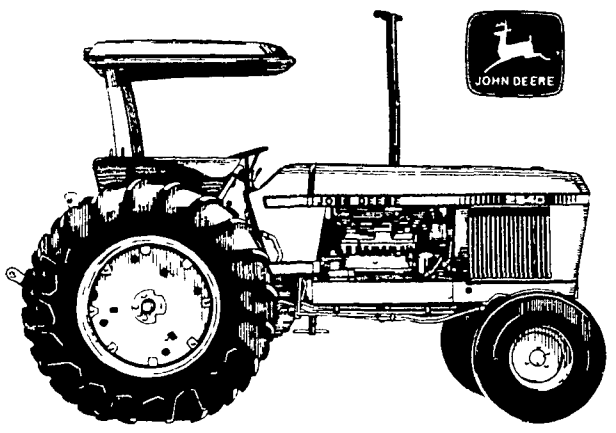
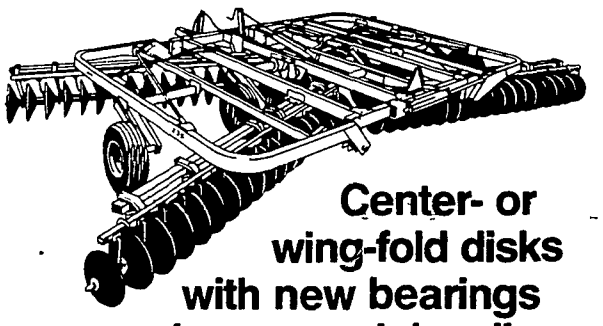
NEW PROFILES OF PERFORMANCE


The new 80-hp 2940 — bigger engine, smoother shifting, easier riding, more pull power

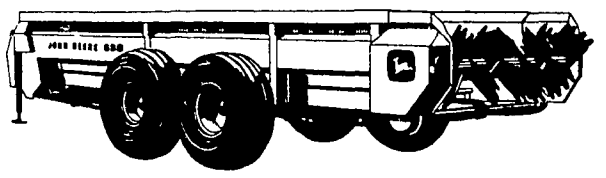
Now 80 horsepower looks better than ever with the John Deere 2940 A beefed-up 6-cylinder engine the new synchronized TSS transmission and Hi-Lo shift as standard equipment for 16 forward and 8 reverse speeds, larger fuel tank capacity, hydrostatic steering, new electronic instrument panel, and a new completely adjustable seat all add up to performance And now you can stretch that 80-hp performance even further by equipping your 2940 with John Deere's new mechanical front-wheel-drive option On-the-go engagement or disengagement is just one of many features that can help you keep going when you hit soft or wet conditions The John Deere 2940 — it's real 80-hp performance

New 235 Level-Action™ Disk


Center- or wing-fold disks with new bearings and new crank leveling

New Dura-Flex™ gang bearings feature 4-lip seals that keep grease in and dirt out They are standard equipment — and backed by a simple 2-year warranty

A new crank lets you fine-tune fore/aft leveling from the front of the disk And you can set new combination scrapers for soil types from sandy to gumbo Weight per blade is 100 to 125 pounds, sizes from approximately 17 to 25½ feet Let us show you one of these simply tough hydraulic-fold disks

400-bushel capacity


This John Deere 680 Spreader's 400-bushel capacity makes it the biggest spreader we have ever engineered And most likely one of the largest you'll find anywhere You'll like the hydraulic shift control and lifetime-warranted all-steel sides You'll also appreciate the fully hinged shielding and tandem walking-beam wheels, too Stop in to visit with us about the 680 Spreader

Honaman explains logic

Alien farm ownership bill sails through House vote

BY DICK WANNER
Staff Correspondent

HARRISBURG — When a bill passes the Pennsylvania House of Representatives by a vote of 186 to 3, as the non-resident alien farm ownership bill did recently, it makes one wonder what the tiny minority of dissenters was thinking about.

"They were worried about the constitutionality of the bill," Mrs. June Honaman, a Lancaster County representative and a member of the House ag committee reported. "They didn't want us to sell our farmland to non-resident aliens, but they voted against the bill because they weren't sure it could stand up against a constitutional challenge.

"Our research leads us to believe that it is in keeping with the constitution, and I know a lot of other states have already passed similar legislation," she said.

Mrs. Honaman is the prime sponsor of the measure, House Bill 1773, which is now being considered by the Senate.

It would prevent non-resident aliens, either individuals or corporations, from buying more than 100 acres of agricultural land in the Commonwealth.

Impetus for the bill came not so much from the immediate threat of a mass buyout of Pennsylvania farmland by absentee oil sheiks for Japanese businessmen, but from the spectre of what could happen without protective legislation, Mrs. Honaman explained.

"We're not sure how much Pennsylvania farmland is owned by non-resident aliens, but we do know it's not a lot," she said, " not nearly as much as is the case in Florida of California, for example."

But with similar legislation now existing in 25 other states, it would seem logical to assume that foreign nationals with a yen for American farmland would have to go to states without protective laws.

Besides, Mrs. Honaman pointed out, other countries, notably Japan and OPEC nations, have rather strict rules governing the purchase of their land by outsiders.

Another point she brought up was that non-residents who realize a capital gain from the sale of landholdings pay a much lower capital gains tax on their profits, a tax quirk that could lead to speculative abuses.

She said the IRS estimates that last year, the capital gains rule for foreigners cost the U.S. Treasury some $14 million in tax revenues.

That's the difference between the capital gains tax paid by foreigners who profited from the sale of farmland, and the tax that would have been paid by U.S. citizens if they had been doing the selling.

Big numbers, small growers attend organic meeting

BY DICK WANNER
Staff Correspondent

LANCASTER — There's a lot of interest in organic gardening, these days, and if you needed proof of that, you had only to be at the Lancaster Farm and Home Center last Saturday along with 200 other people who came to hear M.C. Goldman, executive editor of ORGANIC GARDENING Magazine.

If you needed more proof than the size of the audience, you'd have gotten it when Goldman told his listeners that his monthly magazine, published in Emmaus, near Allentown, goes out to a million-and-a-half subscribers.

However, this reporter has been attending farm gatherings in these parts, off and on for nearly a decade, and there were not a lot of familiar farm faces in the crowd.

Although organic methods seem to work very well in small plots, there is little support for the organic movement in commercial agriculture, and the audience last week seemed to bear out that fact.

Not that organic gardening isn't important.

"There are 35 million Americans with home gardens," Goldman told his listeners. "Not all of them are organic, of course, but the value of the food they produce has soared to $14 billion annually. Homegrown food is better for you. It takes less energy to produce and it certainly takes less energy to get it onto your table."

In response to questions from the audience, Goldman outlined the basic principles of organic gardening.

He said composted garden and kitchen wastes could replace purchased fertilizers in home gardens. Weed and insect pests can be controlled by biological agents - predators, parasites and specific disease organisms - instead of chemicals. Or weeds can be pulled out and bugs can be squashed.

One of Goldman's interested listeners was associate Lancaster County Ag Agent Arnold Lueck. After the meeting, Lueck said he thinks organic methods are good for the small-scale production of crops of all kinds.

"The big advantage this technique has for home gardeners is the attention it focuses on the soil itself. Once a garden's soil needs are satisfied, and the soil is fertile, good things begin to happen.

"But for the average and large farming operations, organic methods cannot provide enough soil nutrients to support high, economical yields. There simply aren't enough sources of organic matter to supply the needs of the millions of crop acres required to produce our livestock feed and human food."

Lueck said farmers and ranchers use fertilizers to boost crop production to more profitable levels.

Nor does Lueck believe in the feasibility of biological controls for weed and insect pests.

"Insects, plant diseases and weeds are major threats to commercial agriculture," he said. "Biological methods can just not adequately control all of these pests. Consumers demand pest-free fruits and vegetables. And that's what farmers have to produce. They can't do that job without chemicals."

Lueck did say there's a trend now to reduce the use of pesticides in agriculture.

"There was a period in the Sixties when chemicals were probably used too freely, and they were building up in the environment. Fruit and vegetable growers for some time have been using an approach called integrated pest management.

"It is a combination of organic and chemical methods and it's an approach I think we'll be seeing more of the years ahead," he said.

Spring time is forest fire time

HARRISBURG — Spring may be weeks away but already officials in the Department of Environmental Resources are concerned with the increasing number of wildfires across the Commonwealth.

Eugene F. McNamara, Chief of DER's Division of Forest Fire Protection, said that while wildfires are normally a spring-time problem, 25 fires involving 120 acres have been reported in the first five days of February.

"If firest conmtinue to increase this month at this rate we may break the record of February, 1976, when there were 173 fires affecting 916 acres."

McNamara said there has been one fire-related death in Columbia County caused when a sixty-one year old man suffered a heart attack while attempting to put out a brush fire as it spread out of control.

"Current conditions for fire are ideal," McNamara said. "Vegetation is dry, the ground is frozen and high winds can spread even a small fire quite rapidly. The situation is especially critical in the valleys and areas of the state which have no snow cover."

People who dump hot ashes from coal stoves and fireplaces outdoors have created another problem.

"This problem will probably continue until people use common sense and realize that ashes - hot or cold - should be deposited in a fire-proof container equipped with a tight lid," McNamara said.

TWO DAY PUBLIC AUCTION

SATURDAY, FEBRUARY 23
10 A.M.
SUNDAY, FEBRUARY 24

Weber reflects on FFA achievements

MOHNTON — Ten years ago, Glenn S. Weber, Mohnton R2, was eastern regional vice-president of the Future Farmers of America. In reflecting on the years that have passed since his involvement in the FFA program, Weber said, "It was really a highlight. It was a goal I had no idea I would ever achieve. Being a national officer was a real turning point. You learn a lot about yourself and what you can and what you cannot do."

Weber graduated from Garden Spot High School in 1966 where he got his start in the Grassland FFA Chapter. He was state FFA president that year. After graduating from Penn State in 1972, he taught vocational agriculture for two years at Manheim Central High School before founding the County Acres Farm Stores in the Reading area, of which he is general manager.

An FFA member for seven years, Weber participated in a lot of local activities before aspiring to a higher office. He said, "I would definitely say that we are all products of our past. The past experiences make us the kind of people we are. In FFA I had the chance to have a variety of experiences, and it was broadening and challenging."

He credits his ag teacher with a lot of the success he had. "I credit my ag teacher with providing the background. I just can't give him too much credit."

He stressed that challenges are offered at all levels of involvement, recalling, "As a 9th grader it was a challenge to take the opportunity to get up and say the creed. I was as thrilled to do that as to prepare for national convention."

He encouraged FF members to start now b becoming involved and t accomplish one day at time. "If they start wher they are, in a few years the will be astonished Sometimes they tend not t see the opportunities in th classroom."

Weber said, "Member should start moving step by step. If they reach out and

(Turn to Page B3)

Kings Potato Chips and the Country Acres markets are two divisions of the Weber family business. Here Weber spreads a load of freshly made chips on the conveyor before running them through the salter. But most of his work is with the markets.

At his office, a converted chicken house on the farm where he grew up, Glenn Weber recalls what FFA meant to him.

Weber talks about FFA

(Continued from Page B2)

take the first step in their area of interest, they can have the momentum going in FFA which will carry over in other areas." He said his FFA activities tend to provide momentum to go onto more challenging activities. "It was a progression of activities. My FFA work definitely affected me and contributed to the kind of person I am now."

There are carryovers from FFA to other areas of life, Weber says, noting, "It helps you in dealing with people as well as the personal development of all kinds of skills such as public speaking. It is also a socializing experience for members from farms to get out into other groups. It offers a lot of the first kinds of socializing for some members. It also serves as a confidence builder."

Weber admits that the never seemed to excell in contests. "I was a member of the parliamentary procedure team that went to the state but didn't win. I learned a lot - about losing as well. I had some successes in contests but never really won a state contest."

Now Weber can be found judging FFA contests and in other ways supporting FFA. He said, "I feel I have a debt to repay the FFA and so when I'm asked to judge in a contest I feel I need to contribute what I can. Other students are now benefitting and participating as I did. I can remember the judges when I was in contests."

After a visit to the national convention last Fall, Weber says, I felt so at home there. In a sense it seemed to be the same. The spirit and the challenge is still there."

Nevertheless he feels FFA has changed since he was a member, and for the good. "It now caters to all students interested in agriculture, not just rural youth in farming. It offers any phase of agriculture to urban and rural youth."

He recalls that admitting girls as members as an "issue" when he was a state officer. He now says, "It was the best thing that happened to FFA."

Despite some changes, he notes, "Students are taking advantage of the opportunities in the same way as when I was an officer. They are still being challenged. It has remained flexible and relavent. It had done an amazing job of being relavent to the needs of the students. It has broadened and stayed abreast of the times. Having just been to the national contests, I am really impressed with the contests and with their strength in terms of numbers. It is a viable organization."

Now FFA boasts over ½ million members, which Weber says is 100,000 more than when he was in office. "New programs have strengthened the total program," he declares.

FFA is a broadening experience for members and Weber states, "It helps you see beyond the immediate self, and helps you become more aware of issues and how they affect agriculture and the community." In Weber's case his awareness helped encourage him to make a bid for the state legislature in the 99th district several years ago. He didn't make it, losing by a disappointing 500 votes. He said, "I never worked so hard at anything, but it was a lesson in learning to fail."

He said he probably never would have run for the office if it had not been for his FFA experience. He currently serves on school board of the Eastern Lancaster County School District, and is a member of the Akron Mennonite Church.

He says now he wants to concentrate on his business and his small farm where he has horses and dairy heifers. "Working at home helps me regroup my thoughts," he said.

Weber is now totally involved in the day-to-day management of his convenience speciality stores, but his FFA experience is never far behind him. "The experience of being a national officer can't be described in one word. It was very valuable in making relationships throughout the country. It meant spreading the FFA story through business and industry. You gain so much in return." — SBB.

National wool growers elect 1980 officers

SALT LAKE CITY, Utah — At the concluding business session of the recent 115th Annual Convention of the National Wool Growers Association in San Diego, Calif., members of the nation's oldest livestock organization elected officers to labor for the interests of sheep producers in this country during the next year.

Re-elected for a second term as chairman of the board of directors was R. J. Rich, a sheepman from Burley, Idaho, and the only leader of the 115-year-old association to follow his father's (R. C. Rich) footsteps in assuming this post.

R. C. Rich is the oldest living past president of the NWGA, serving from 1936-1940.

Also re-elected to a second term is Don Meike, Kaycee, Wyoming, vice chairman; and Norman Rousselot, Sonora, Texas, secretary. Newly elected to the position of treasurer was Steve Gilmore, Salt Lake City, Utah.

These four individuals are board officers and also serve on NWGA's Executive Committee.

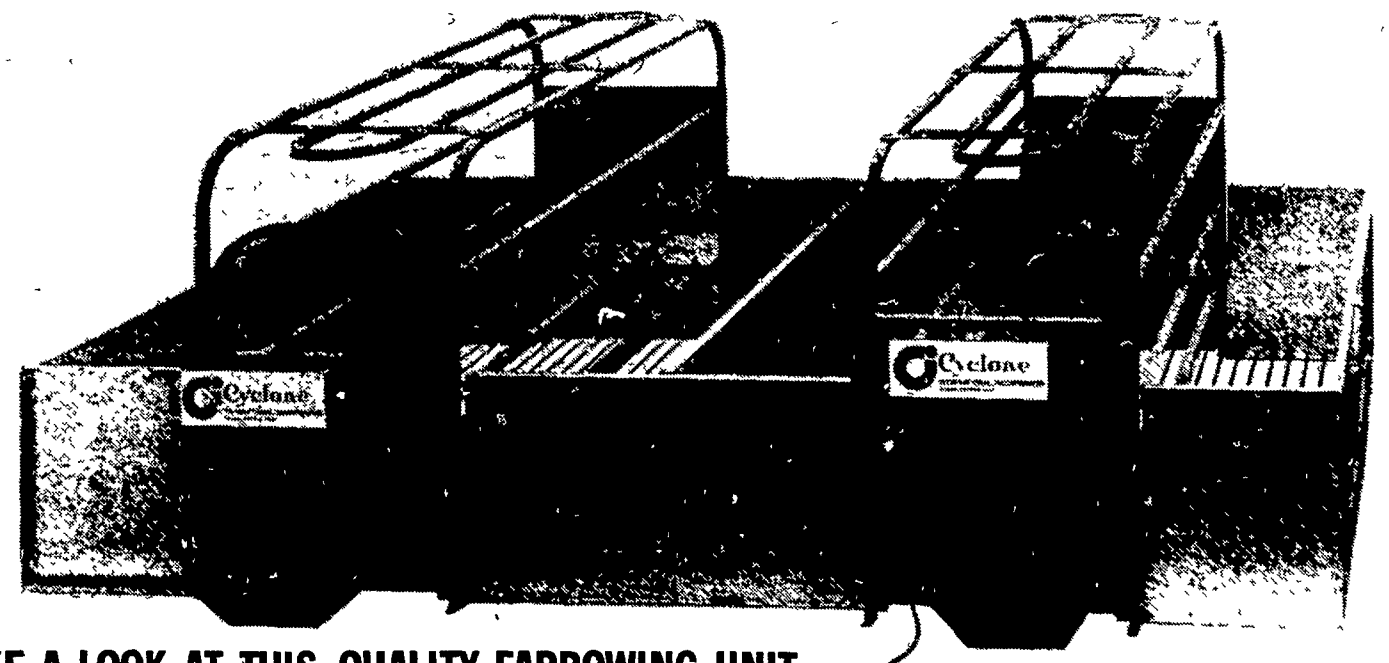
Other Executive Committee members elected include the following Members-At-Large: Norman DalPorto, Jackson, Calif., (second term); Cornelia Swayze, Tunbridge, Vt. (second term); and T. L. Watts, Pinon, N. M. (first term). Marvin Cronberg, Salt Lake City, Utah, was reappointed president and chief operating officer of NWGA.

These officers work with the Board of Directors, who are presidents of state and area wool growers associations affiliated with NWGA.

The association has two offices: the headquarters in Salt Lake City, from which the NWGA official magazine, the National Wool Grower, is published and mailed to over 20,000 subscribers; and a governmental affairs office in Washington, D.C.

National FFA WEEK is scheduled in February to honor George Washington who was an outstanding farmer as well as a great leader.

Cyclone EQUIPMENT SYSTEMS FOR CONFINEMENT HOG PRODUCTION



TAKE A LOOK AT THIS QUALITY FARROWING UNIT

Designed and constructed specifically to meet the needs of the sow, this Cyclone unit has been shown to significantly reduce mortality rates . . . particularly when used with electric heat mats in the floor and properly placed slatted floor. It incorporates; draft panels to shield pigs from drafts, embossed for maximum rigidity and reinforced on the edges to assure stability . . adjustable bottom rail . . . maximum handling ease through doors which can be opened from either direction . . . welded steel bars, by eliminating nut and bolts, make cleaning easier . . . 16 gauge square steel tubing with smooth edges to protect hogs from injury . . . adaptable to either dry or liquid feeding (feed front also serves as a door) . . . adjustable backup bar to prevent injury of pigs at birth . . . epoxy coated for easy cleaning and long life.

TRI-COUNTY SWINE SYSTEMS

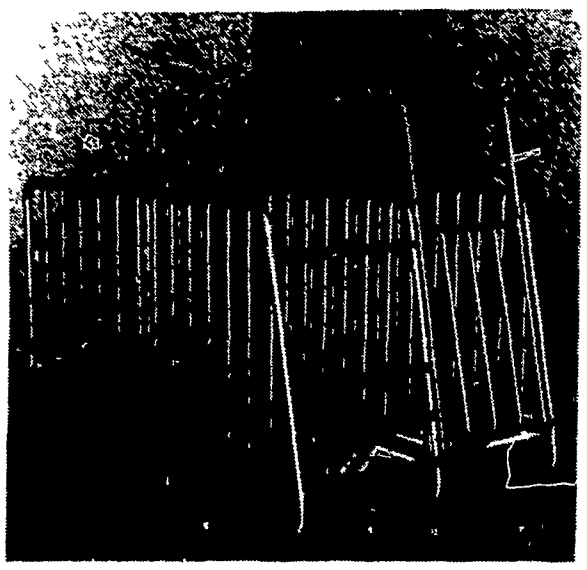
COMBINING MODERN CUSTOM BUILDINGS WITH "SILVER LINE" EQUIPMENT — FOR CUSTOMER SATISFACTION

"WHEN IT'S TIME TO BUILD, REMODEL OR REPLACE EQUIPMENT - IT'S TIME TO CALL TRI-COUNTY

GESTATION STALLS

"Silver Line" Gestation Stalls are solidly constructed of 1½" steel tubing and ½" pipe. Several basic patterns provide the versatility needed for installation in the variety of today's confinement systems.

★ STANDARD STALLS



SPECIFICATIONS

- overall length - 84"
- overall height - 42"
- width between stalls 21½"
- slotted floor anchor tabs

OPTIONS

- Recessed back leg support, adaptable to various flush systems
- Front gate - This makes an ideal breeding stall
- Choice of lift gates or hinge gates

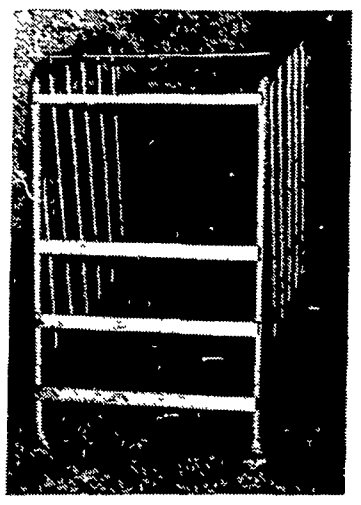
★ TETHER STALL

Tether systems provide some advantages worth considering.

- Lower equipment costs
- Reduced amount of Floor Space needed per sow.
- Simplicity - no gates or pins to bother with
- A New approach to breeding

SPECIFICATIONS

- overall length - 42"
- overall height - 39"
- width - variable



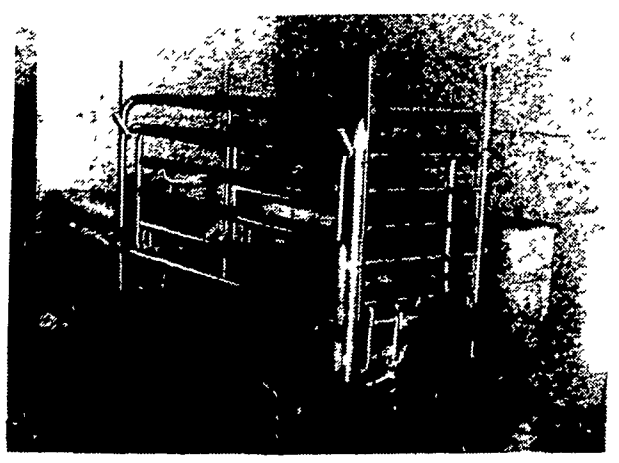
★ TETHER COLLAR

The Tether method of confining sows is definitely growing in popularity. Here is a durable collar with simple swivel snap adjustments

FARROWING CRATES

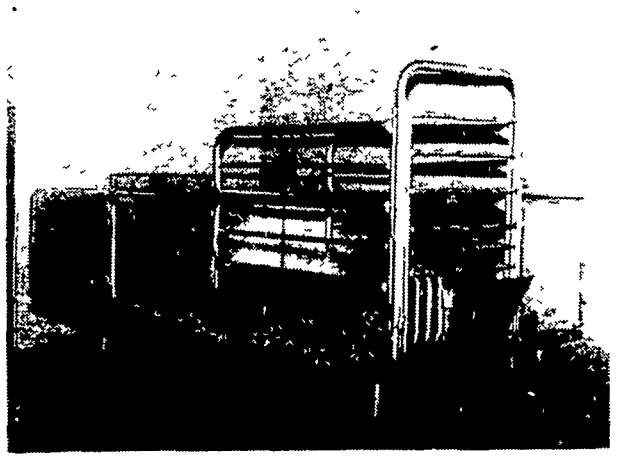
The "Silver Line" offers an up-to-date choice between the Quickside conventional crate or the New Tether crate. With either choice, convenience, durability, and economy are standard features.

★ QUICKSIDE CRATE



- 1½" steel tubing & ½" pipe
- Heavy-duty construction
- Unique "Quickside" affords Maximum adjustment with minimum effort. Width adjusts from 21½" to 25½" height adjusts from 9" to 11½"
- Assembles easily with 4 bolts and 4 clip pins.

★ TETHER CRATE



- Simplicity of design - Quick Assembly, No adjustments necessary, No cumbersome framework.
- Maximum access to sow as well as little pigs.
- Constructed of heavy duty 1½" steel tubing and ½" pipe

STANDARD FEATURES

★ EZ-tilt Feeder - 14 ga. gal. ★ Creepwings assemble quickly without pins ★ Choice of water Bowl bracket or adjustable nipple bracket. ★ All Panels 16 ga. gal. ★ Choice of lift or hinge gates.

- Sanitary - Cleaner pigs, healthier pigs.

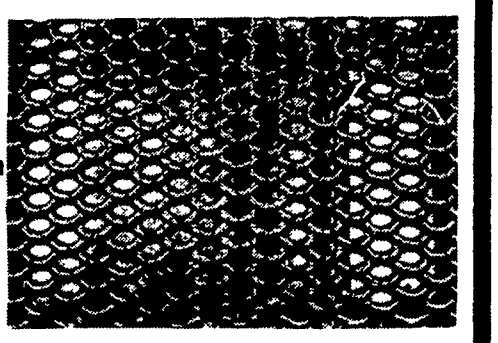
SIZES IN STOCK: 5x7, 4x8, 3x6

★ CUSTOM SIZES AVAILABLE AT NO EXTRA CHARGE

CUSHION COATED FLOORING

★ Cushion Coated Expanded Metal

★ Cushion Coated Woven Wire



The ultimate in swine flooring systems. Used extensively in Farrowing & Nursery, as well as Breeding & Gestation Facilities.

- Warmth minimizes mastitis and other sicknesses
- Traction - prevents injuries and abrasions
- Comfort - rounded edges are easy on feet and knees
- Healthy - non-porous - reduces bacteria - lowers mortality

SIZES IN STOCK: 5x7, 4x8, 3x6

SUPPORT FRAMES

(See Farrowing Crate Pix)

- 5x7 size
- 12" on center supports 1" angle
- 4 leg positions
- 2" Angle Main Frame
- Perimeter - 3/8x1 bar stock

Increase the number of pigs weaned/litter by elevating Farrowing Crates on a support frame, with woven wire or Cushion Coated flooring. Tri-County provides what it takes to do it right; a heavy duty frame, and your choice of flooring.

NURSERY CAGES

The "Comfort Cage" is another unique item in the Silver Line

- SIZES - 3'x6', 4'x4', SINGLE & DOUBLE DECK
- GALVANIZED WOVENWIRE FLOORING
- THE NEWEST TROUGH DESIGN
- WIDE CAGE GATE
- SIMPLICITY OF DESIGN

Regional Star Farmer plans dairy future

BY RUTH ANN BENEDICT
Staff Correspondent

WAYNESBORO — Jesse Reichard probably did not know when he bought his first Holstein heifer back in 1966 that in 14 years he would own a herd of 18 registered Holsteins, including two bulls.

Now, at 17, he owns a herd of 18 and was named Regional Star Farmer for the South Central District in Agriculture Production at the 51st FFA Convention in January. Jesse is the son of Mr. and Mrs. John Reichard, Pump House Rd., Waynesboro, and is a senior at the Waynesboro Senior High School.

Currently engaged in farming with his father on a 140 acre farm, Jesse's milking cows can be found on his brother Edgar's farm located not far from the home farm.

But cows are not his only bag!

Jesse is a very active member in the Blue Ridge Chapter at the Waynesboro School. He is the president of the Blue Ridge FFA Chapter and served as treasurer in 1978. In 1979 he was treasurer of the county FFA group.

He has received his Star Green Hand, Chapter Star Farmer, County Star Farmer and has won a Production Credit Award on his project books over the past years.

In the four years Jesse has been involved in FFA at Waynesboro, he has increased his projects from just five his first year to nine enterprises this year, while widening his exposure to all areas of agriculture production.

Currently Jesse's FFA enterprises include dairy herd, swine marketing, broilers, alfalfa, clover hay, wheat, oats, rye and corn.

This past growing season he harvested 46 acres of corn, six acres of oats, 24 acres of clover, five acres of rye, 16 acres of alfalfa, and 10 acres of wheat for a total of 107 acres.

During the past two years Jesse has purchased a stacker and a tractor, enabling him to do some custom stacking for farmers in the surrounding area. This past fall he made some 215 stacks not including those on the home farm.

When asked about the future, this prospective young farmer talks in phrases of "I would like to see".

Jesse faces reality and recognizes the fact that it is hard to get started in the dairy business in this day and age. This fact alone stops many young people, but Jesse wants to be in the dairy industry even if he is not directly working and owning a dairy farm.

He has plans and dreams which include building a

(Turn to Page B6)

Much of Jesse's success can be attributed to his keeping good records, staying on top of things and in staying active in a wide range of activities other than FFA.

TRI-COUNTY SWINE SYSTEMS IS PLEASED TO ANNOUNCE THAT WE HAVE RECEIVED THE REGIONAL DISTRIBUTORSHIP FOR PAX EQUIPMENT

Star Farmer plans future

(Continued from Page B5)

milking parlor on his father's farm which currently is not set up for milking. Jesse even has a site picked out which he feels would be excellent since the location would provide good drainage for a manure pit.

"I would like to be a dairy farmer", said Jesse. I do not have the cows that I would like to have, but hopefully that will come. If I do not dairy farm I would like very much to be a herdsman. I love to show cattle and I would like to do my own artificial inseminating."

While he attended an artificial inseminating course last April, he really has not gotten into doing artificial inseminating on his own yet.

Jesse's love for showing dairy cattle can be expressed through his winnings at 4-H and FFA cattle shows. This past summer at the South Central FFA District Show Jesse came home with reserve senior and grand champion honors. At the state FFA Show he won first with his Holstein aged cow and third with his two year old Holstein.

When asked how the FFA has helped him, Jesse replied, "It has helped me in many ways. The key to success is in being active not only in FFA but in everything around you - community work, Young Farmers, Junior Holstein Clubs, 4-H work and church work. FFA allows me to put most of what I have gained back into my enterprises or projects, as well as supplying personal growth. It also teaches a person a lot about leadership abilities."

Jesse Reichard knows the score, but he is optimistic and has the type of attitude that makes good prospective farmers.

Jesse Reichard, left, Pump House Rd., Waynesboro, shows his FFA awards to his parents John and Esther. Jesse received his Keystone Degree and was named Regional Star Farmer in Agriculture Production at the FFA Convention held at Harrisburg.

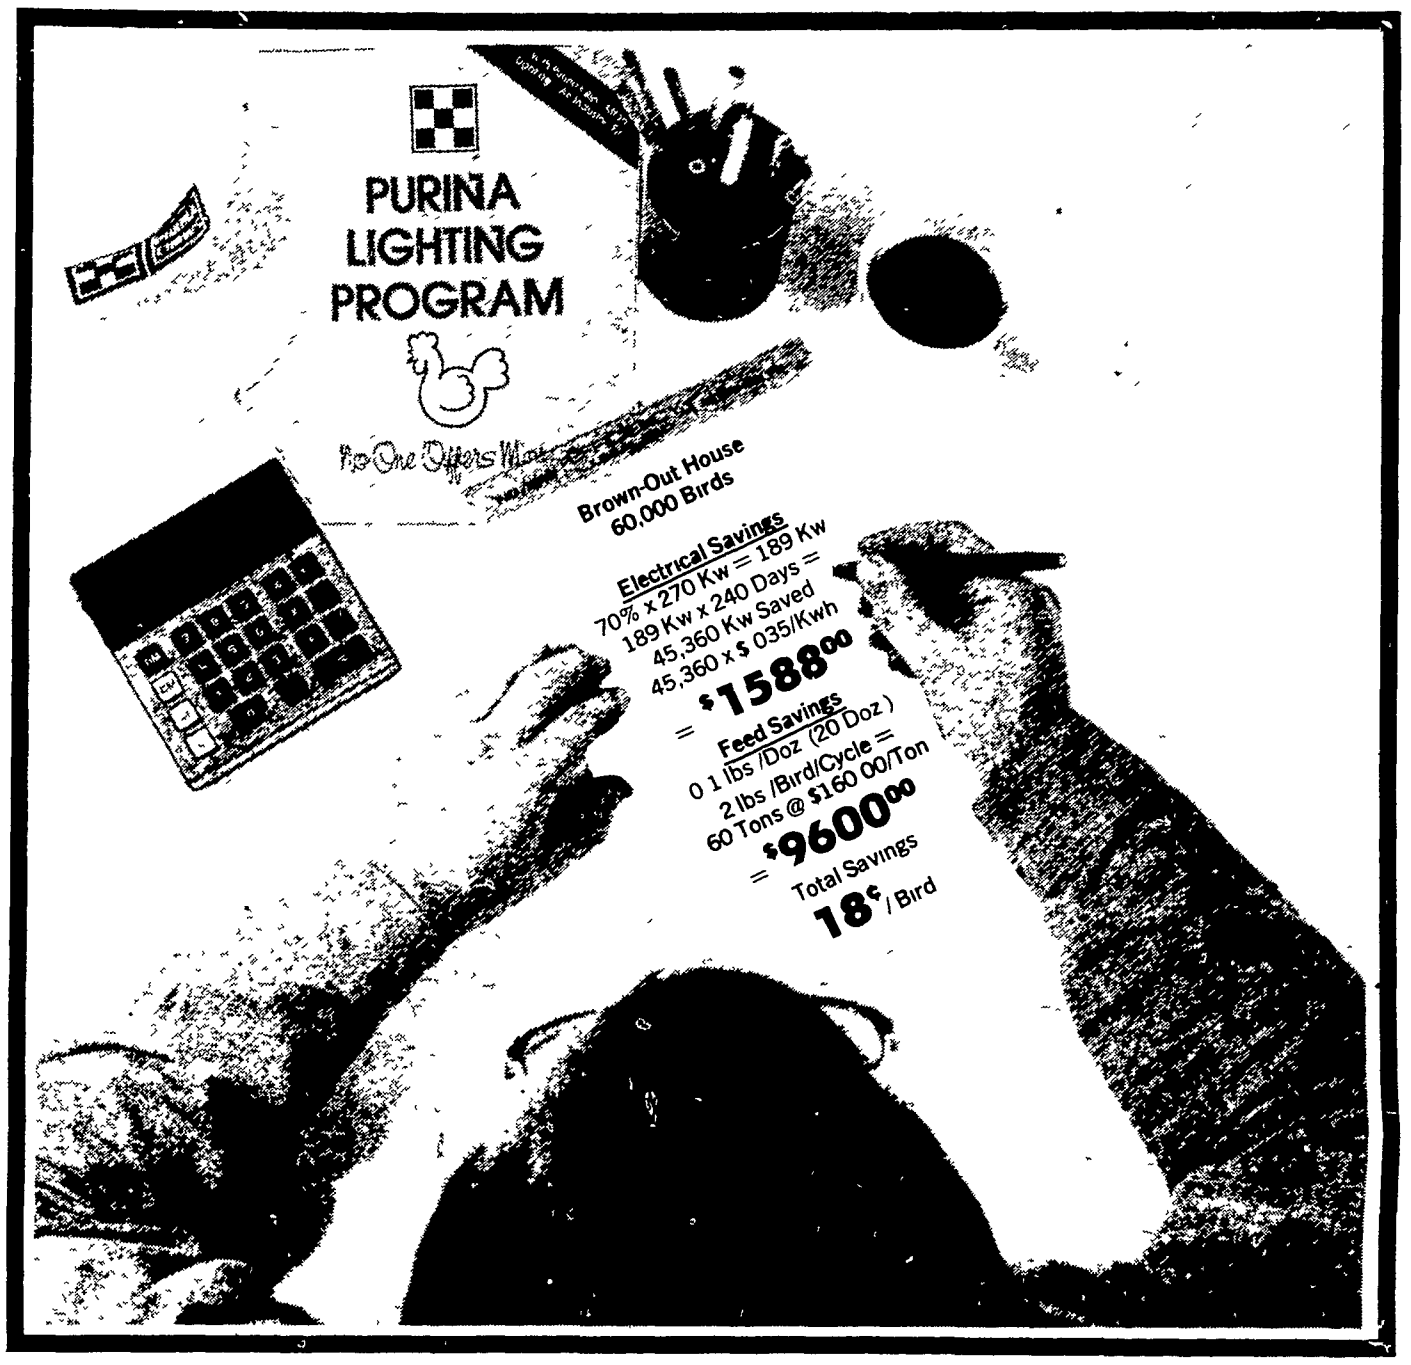
Over One Million Lancaster County Birds Have Proven

Bio-Mittent™ Lighting Makes Cents



Field results of Bio-Mittent lighting programs have confirmed what Purina research results have shown. Here are what three managers have had to say about their results:

"The most significant feature of the intermittent lighting program is a feed savings over birds that previously were on a full-fed program. I feel there is a potential for 40¢/bird increased income from using the intermittent lighting program. Mostly, this income is a feed savings, but some is associated with increases in egg size plus the potential for an extra 3 or 4 eggs per bird year" (Note, hens in some cases in this operation had been mechanically restricted with smaller egg size resulting.)

"Intermittent lighting does not affect production. It does definitely save electricity. We experience less mortality with the experimental group (Bio-Mittent lighting). We have put four more houses on the program."

"I don't know why producers don't use Bio-Mittent™ Lighting just to save some electricity. We've also seen some improvement in feed conversion even though our house isn't light-tight."

Dale Gerber and Randy Hertzog, a ninth grade student, go over a project book together as preparation for some future work. Gerber works at Warwick High School where he is advisor to the FFA chapter.

Gerber supplies leadership to Warwick

LITITZ — After being plagued twice by the threat of losing the vocational agriculture department, Warwick High School now has a vo-ag and Future Farmer of America program that has turned around and is gaining ground.

Still one of the smallest chapters in the county, the FFA chapter has grown from 34 to 55 students in the past year, with the freshman group filling space to capacity.

A lot of the credit for the change in the program has to go to Dale Gerber, vo-ag teacher and FFA advisor. Gerber, however is quick to pass on the credit. He acknowledges that the program was "exceedingly weak" when he took the job, but he credits the community, Superintendent John Bonfield and the school board for their support and the decision to "do it right and turn the program around. The decision to keep the program was made before I was hired." Furthermore, he notes, "I receive excellent cooperation, here, the most I have ever experienced." We have really good quality students, and we get excellent cooperation with the guidance counselors."

Gerber said he really enjoyed the challenge at Warwick and feels that the vocational agriculture program is really meeting a need today. "We try to meet the students where they are. We are vocational, and we constantly talk careers. Research shows that 35 percent of all occupations in Lancaster County are ag-related. The one requirement for someone to take the course and join FFA is to express an occupational interest. We are occupational oriented."

Gerber pointed out that there are nine high schools and three vo-tech schools in Lancaster County offering vo-ag courses, adding, "We have the most in any county in the state." While he is the only teacher at Warwick with one teacher's aide, he notes that most districts are multiple teaching units. "In other counties the single teacher is predominant. We have a very proficient system in Lancaster County and it is self-perpetuating." He said the very high standards and performances by several of the large chapters serve to help other chapters strive to achieve more.

He said Lancaster County's unique position as one of the most productive counties in the state, leading in many agricultural fields, contributes to the outstanding support FFA receives in the county.

Gerber graduated from Penn State in 1964 and taught at Donegal and Gettysburg for short times, and at Northern York School District for 10 years. He also spent two years teaching agricultural engineering at Penn State.

He explained that there

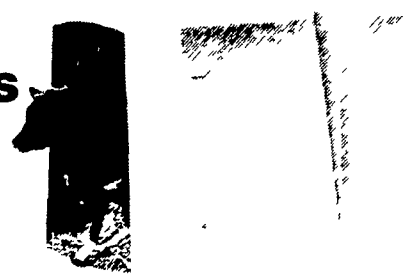
How many calves did you lose last year?

fiberdome
CALFhutches start them out right



Raising calves is a tricky business That's why modern calf raisers are going to individual hutches to help save more calves by cutting down on pneumonia, scours and hoof problems Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns

You can be assured of this kind of healthier environment with Fiberdome CALFhutches Their unique one-piece construction of heavy gauge fiber glass makes them weatherproof, so they will last indefinitely with normal care No joints for moisture and bacteria to creep through A white gel-coat finish keeps them cool in summer

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage

Warwick FFA

(Continued from Page B8)

is been a big change in FFA since the years he was involved as a member." It has really opened up. There are eight major areas in which we work including production agriculture, ag mechanics, natural resources, forestry, ornamental horticulture, ag supplies, ag marketing and ag professions."

He added, "Agriculture today offers something students want. The enrollments indicate we have good things to offer."

Gerber notes that vo-ag and FFA are closely intertwined, because of the original FFA charter in Congress, 51 years ago. He said they must adhere to many state and federal requirements, which also makes them eligible for state and federal monies without which many districts couldn't afford to have an ag program.

He strongly supports the FFA motto of "learning to do. "He said, "The ideal behind FFA is take academics and take skills and provide an avenue to take them into the real world and apply them. If you study forestry, for example, you work with the game commissioner. FFA recognizes out of school work and through their contests encourage the application of the knowledge learned in class.

"The neat part of FFA," he said, "Is the leadership training. FFA is exceedingly strong in parliamentary procedure and public speaking and actual leading opportunities."

Gerber uses a true-type model cow to point out some finer points of dairy judging in his Warwick High School classroom.

Another important part of FFA, Gerber says, is the "social aspect. It offers social and cultural growth to rural students who may lack the opportunity elsewhere."

While he contends he got into teaching somewhat by accident, he says he wouldn't stick with it, if he didn't enjoy it. He also says simply, "We are not doing anything here that is not being done in other vo-ag departments."

Nevertheless, he admits, "I offered discipline, organization and structure, and most students want that. They want to learn. Our students are very active here. We offer many specialties, so students may channel their interests. We teach what we can see has occupational value in it."

Last year he said he had five of seven graduates in ag-related jobs. "I get a lot of calls for students."

Asked how he increased participation, he said, "The program sold itself. In a year's time they could see the difference." He also offers credit to seven men who serve on an advisory council. "They are the backbone of the program."

Gerber exudes optimism about the situation at Warwick. "I have never had better cooperation, and it is really a pleasant surprise to have businessmen and farmers tell me how important they feel it is to have a good ag program. A lot of people feel it is important in this community."—SBB

Hearings to begin on embargo legislation

WASHINGTON, D.C. — Sen. Herman E. Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, announced Thursday that hearings will begin February 25 on legislation to ease the economic impact of the Russian grain embargo on farmers.

Talmadge said the hearings will focus on the National Agricultural Security Act of 1980 (S. 2258), an 8-point bill he introduced earlier this week, and other legislation dealing with the effects on farmers of the suspension of grain shipments to Russia.

The hearings will begin at 10 a.m. Monday, February 25, in the Agriculture Committee hearing room, 324 Russell Senate Office Building. They are expected to continue for several days.

Talmadge said he will seek to move legislation through Congress as quickly as possible. He said witnesses will be asked to keep their verbal statements brief in order to expedite the hearings.

Persons wishing to testify should contact Denise Alexander, 202/224-0014.

Sire Power INC

DIRECT HERD CUSTOMERS

LOOK WHAT WE'RE OFFERING

Sire Power, Inc. has initiated a series of seminars designed specifically for Direct Herd customers.

Meetings have been set up in Maryland and Pennsylvania to accommodate your interests, suggestions, and questions.

TOPICS TO BE DISCUSSED

1. Up-to-date methods and procedures on semen handling and tank care and maintenance.
2. Up-to-date procedures and information to improve your breeding efficiency.
3. Direct Herd techniques and training schools.
4. New type and production proof information and pictures of Daughters of Sire Power's bulls.

Milk orders, USDA hit by milk reform group

BINGHAMTON, N.Y. — National Association for Milk Marketing Reform President Martin Schanback, testified last week before the U.S. Department of Agriculture Committee hearings in Binghamton, New York.

Schanback put forth six broad questions related to agricultural cooperatives, the food industry and our government agripolicies.

He called on Congress to examine the real problems of the dairy industry and to act on those issues that affect all of the dairy industry.

Schanback particularly questioned over-order premium pricing above Federal Order prices.

He asked, "Are these prices obtained through abuse of market power, in regulated markets to cover higher overhead costs, marketing mistakes, inefficient operations, overbuilt facilities and membership or merger activities, which have eliminated competitors?

Schanback criticized the Department of Agriculture for failing to hold hearings to investigate the need for revising Federal Milk Order No. 2 to reflect the huge increases in transportation costs.

MANURE SYSTEMS

Manure - Liability or Asset?

We have the equipment and experience to convert what is often a major liability into a valuable asset.

- Mechanically automated manure scraping equipment
- Transfer systems to move manure to storage or field
- Processing equipment to remove odors from stored manure
- Separators and dryers for easier handling and sale of finished manure products.

Let us convert your manure liability into a manure asset.

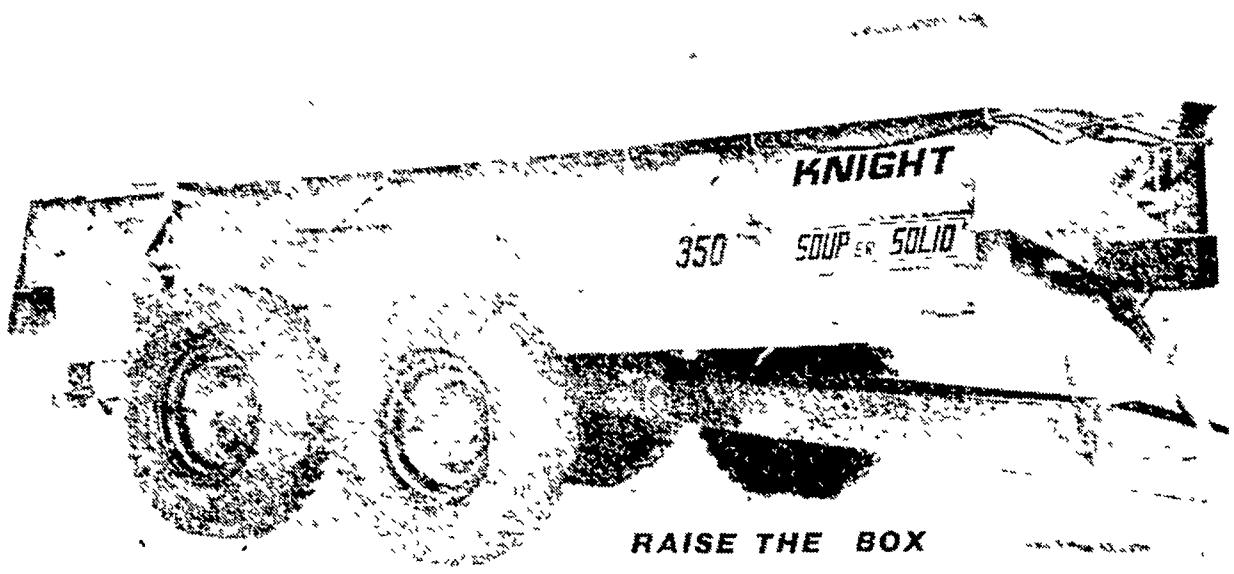
KNIGHT

KNIGHT HAS THE FEATURES THE COMPETITORS WISH THEY HAD!

350 SOUP-er-SOLID Manure Spreader



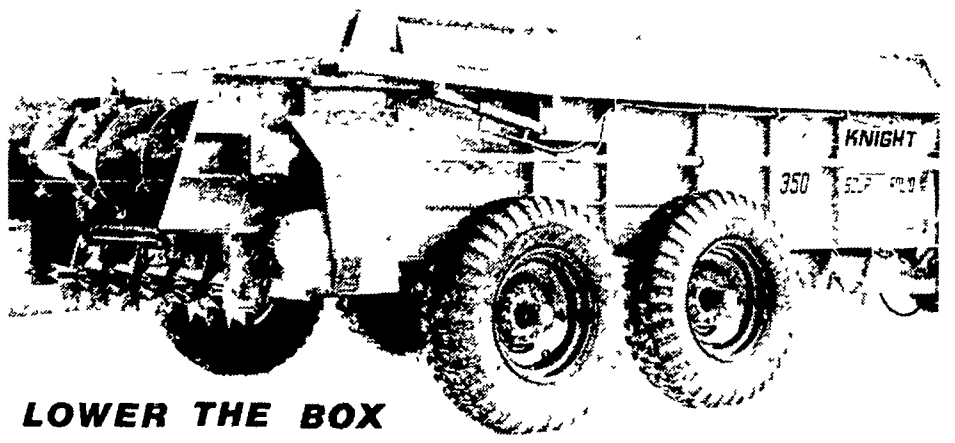
AND SPREAD YOUR SOUPY MANURE FAST !

All bodies made of copper bearing steel, welded into one unit - ward off rust and corrosion from weather and manure acids.

Heavy auger style beater with alloy steel "ripper" teeth makes easy work of spreading frozen and solid pen manure.

Sides are Curved in To Prevent Sloppy Manure From Running Out

One Spreader To Haul and Spread Most Types of Manure



LOWER THE BOX
AND SPREAD YOUR SOLID MANURE

A unique spreader with a tilting design that lets you haul and spread your soupy manure fast, and haul and spread your solid manure with the same unit.

With over 30 years of experience, Knight gives you strength and durability in this quality unit. It's based on the design of the very popular 350 Knight Manure Spreader.

You can depend on a Knight
Since 1945

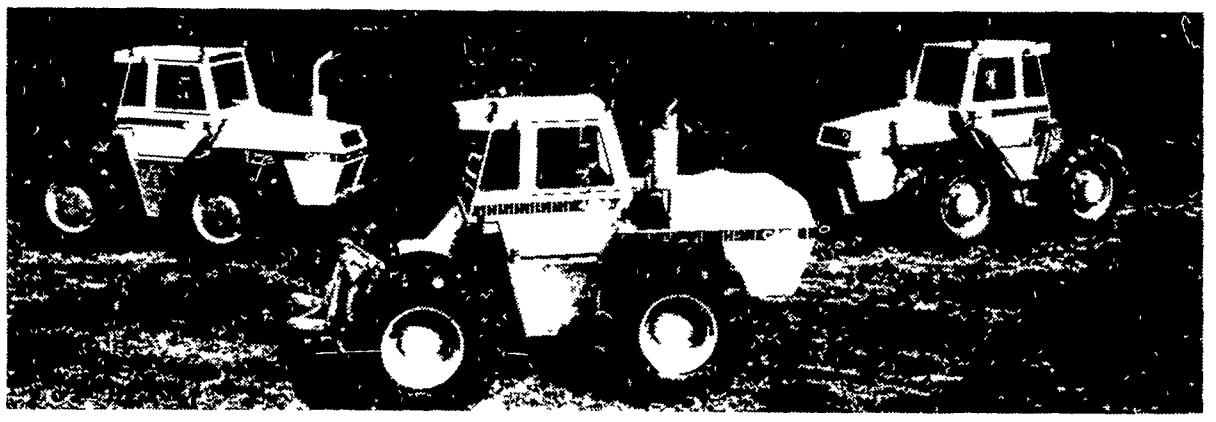
WHY DO MORE FARMERS PREFER CASE 4 WHEEL DRIVE TRACTORS THAN ANY OTHER BRAND?

case

STEIGER

JOHN DEERE



Model 4690:
256 eng hp* (191 kW), PTO 219 hp* (163 kW)

Model 4890:
300 eng hp* (223 kW), PTO 252 hp* (188 kW)

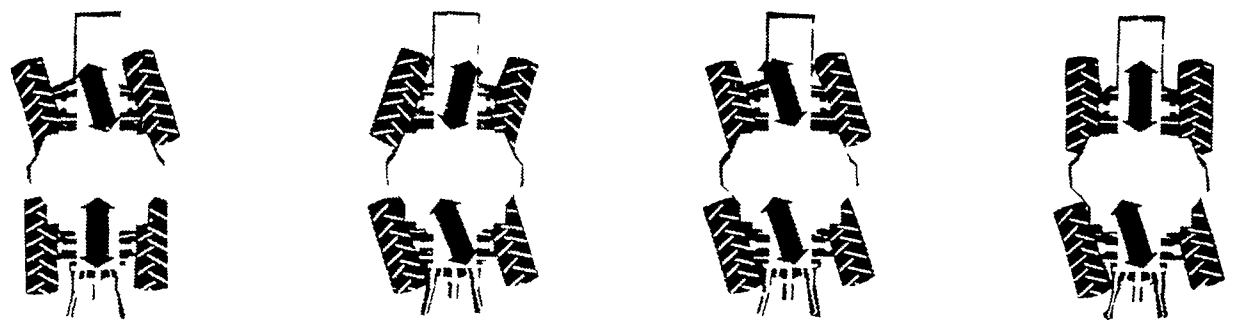
Model 4490:
213 eng hp* (158 kW), PTO 174 hp* (130 kW)

*mfr's ratings

CASE IS #1 IN 4-WHEEL DRIVE TRACTOR SALES

Here are a few of the reasons why!

Only Case gives you advanced design solid state selective steering



FRONT wheel steering Automotive-style control Ideal for row crops, most field work, road travel

COORDINATED steering Rear wheels and front wheels are electronically coordinated for sharp, full power turning

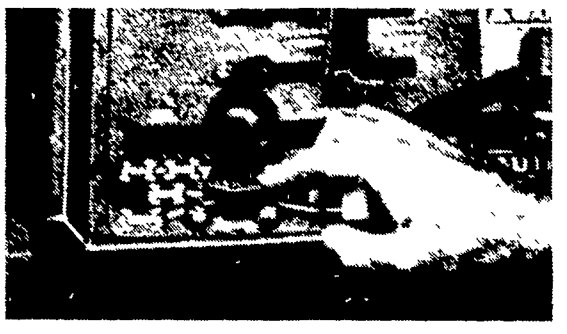
CRAB steering counteracts implement drift on sidehills Controls implement overlap Makes four tracks (eight with duals) for maximum traction

REAR wheel steering with electronic rocker switch "fine-tuning" makes implement hook-ups much easier Great for maneuvering around yards and buildings

If you don't think 4-way selective steering makes a difference you haven't test-driven a CASE 4 WD tractor.

1. On the go power-shift transmission = no power loss. Standard in all 4-wheel drive models.
2. PTO shaft to utilize full engine horsepower without a safety cut off switch.
3. The best visability on the market - sit in our cab and see for yourself.
4. 3 point hitch with quick coupler.
5. More horsepower to the drawbar for your fuel dollar.
6. 2 wheel drive steering for corn planting, cultivating & row crop work.

Only From CASE: FINGERTIP STEERING SELECTION AND AMAZING ELECTRONIC SENSING



Flick...flick...flick! As easily as you'd operate a light switch you can switch on-the-go from front to rear to coordinated to crab steering. When you switch to front steer, rear wheels center automatically.

THINK SPRING!

WE ARE READY - IF YOU ARE FOR THAT FANTASTIC DEAL ON THAT NEW 4-WHEEL DRIVE TRACTOR

CASE - A CLASS OF ITS OWN

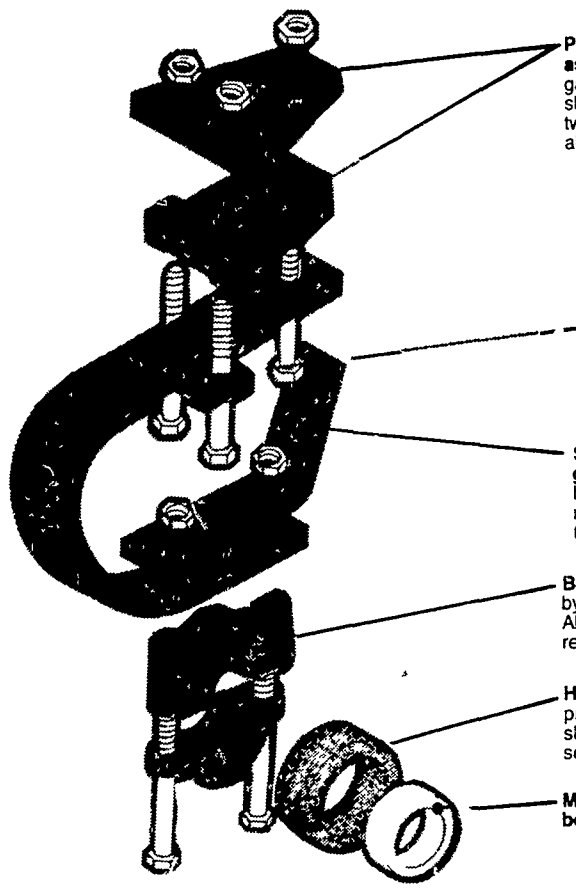
WHAT YOU NEED IS A KRAUSE ROCKFLEX DISC

WHY?

BECAUSE OF KRAUSE SUPERIOR "ROCK-FLEX" BEARING ARM



Proper bearing alignment assured. Arm is mounted on gang beam with 3 bolts Lip on shank base clamp prevents twisting, assures proper alignment

Bearing arm flexes over obstacles Helps absorb shock so disc gangs ride up over rocks or stumps Arms are tempered alloy steel

Scrapers flex with disk gang Special mounting bracket allows scrapers to remain next to disc blade at all times

Bearing assembly protected by malleable cast housing Also allows drop out bearing replacement

Heavy rubber inner ring also protects bearing Absorbs shock, provides self alignment

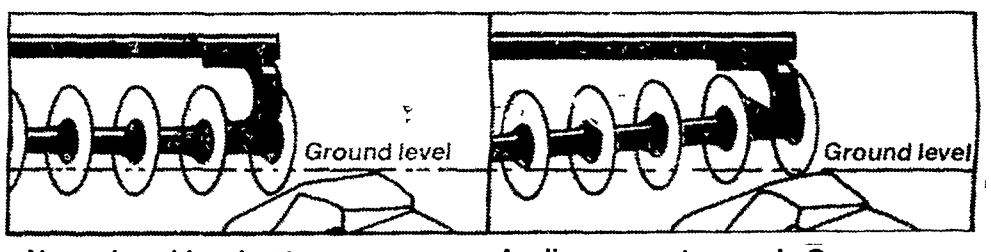
Maintenance-free sealed bearing.

AND HERE'S WHY IT MEANS GOOD NEWS FOR YOU!

Unique C-shaped bearing arm:

- Flexes over obstacles
- Protects disc blades from breakage
- Protects tie rods from bending
- Protects spools from breakage
- Absorbs shock — minimizes bearing wear
- Improves trash clearance

A Krause innovation! The "Rock-Flex" bearing arm was invented by Krause in 1965.



Normal working depth.

As disc encounters rock, C-arm compresses, allowing gang to ride up over obstacle.

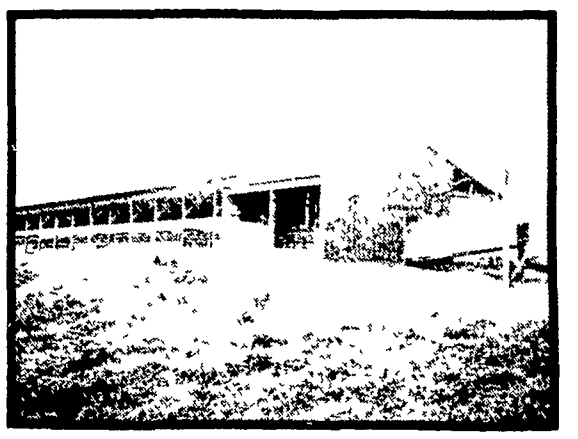
James Caldwell 355-4454

When The Owner Reads This, He May Decide To Keep It Himself . . .



Look at the approach to the home, sit up to dinner and view your own private setting. First your eyes fall on the small beef barn, the cattle roaming inside a 4 strand barb wire fence around the rolling pasture....

Look a little further and you see 2 pretty ponds in front of your modern hog setup and sitting a little higher, the Nebraska hog finishing building.

Your own lane going from your house past all this and even beyond out to a twp. road. Your eyes come across the property line which breaks the horizon. As you look back to the house you see a nestled corner of pines.

All this is pretty, BUT! . . .the big thing is, it includes two 20-crate farrowing houses, 250 head nursery, 600 head Nebraska finishing house, 5000 sq. ft. equipment building, a 2-story barn with additions, feed bins to all buildings, 2 ponds, a small cattle barn, a real nice rancher with modern cherry kitchen, stone fireplace, and all on 128 acres near Myerstown, Berks Co., Pa. The best part . . yes, only $425,000!

Mrs. Charles Hess bakes for Central Market

BY SALLY BAIR
Staff Correspondent

The Lenten season is coming and that means it's almost time for Fastnacht Day, the traditional time to use all the fat in the home before beginning the Lenten observations.

For Mrs. Charles H. Hess, Pequea R1, and her family, it means preparing for a very big day at Central Market where she has a stand every Tuesday and Friday. Actually the busiest day for the Hesses is the Monday before Fastnacht Day because that is when they will prepare the dozens and dozens of fastnachts needed to satisfy their regular customers.

Last year they baked about 260 fastnachts, which is a lot of mixing, raising and deep frying!

In their farm home, Mrs. Hess and her three daughters routinely turn out dozens of loaves of bread, pies, rolls, muffins and other edible delights each Monday and Thursday prior to their market days. But to prepare for Fastnacht Day several extra relatives and friends pitch in. All the available space in their large kitchen and dining room is quickly covered with fastnachts: some are raising; some are cooling and some are waiting to be packed in bags by the dozen and half dozen.

Fastnacht Day is really Shrove Tuesday, a religious holiday preceding Ash Wednesday which marks the beginning of the six weeks of the Lenten season. Mrs. Hess says that it was a tradition for Jews to get rid of all the fat in the house for the forthcoming Lenten observance. To use up the fat, they made fastnachts, which must be deep fat fried.

Daughter Grace said, "If you eat a fastnacht you have luck all year."

How does a fastnacht differ from a doughout? The most noticeable difference is that they're made without the hole, and Mrs. Hess explains that they are made with yeast instead of baking powder. "They are made with a bread dough instead of cake dough," she adds. She said they use their potato bun recipes for a basic recipe for fastnachts.

Mrs. Hess notes, "Fastnachts are getting to be a bigger thing." Her daughter Grace says she can remember when she was younger and they were able to accomplish the baking on Tuesday morning before market.

The Hesses deep fry their fastnachts in lard, with daughter Mary usually manning the ladle. They use "an old kettle," and for the great number of fastnachts they need for the big day, they also use a roasting pan which covers two of their gas stove burners. The lard is strained as needed, and added to as the day progresses.

Fastnacht Day is a big day, so they try to arrive at market earlier then their normal 7:45 arrival.

The market stand is really a family tradition which Mrs. Hess took over from her mother-in-law, Mrs. Abram Hess. Before, that, their grandfather had the stand. Mrs. Hess recalls that helping to make fastnachts was the first job she had in her new family after she got married. "I helped my mother-in-law; I didn't even know what they were before then."

One year when Grace was working as a nurse's aide at the hospital and returned from her shift at midnight she started in baking fastnachts for the next day's work. Before the others got up early in the morning, she had 85 dozen mixed up and raising. As it turned out there was a prediction of snow, and when Grace returned to the kitchen after a brief rest she was dismayed to find that they had stopped making fastnachts altogether, figuring it would be a slow market day.

The stand has changed in many ways throughout the years it has been a Hess family tradition, it even changes according to the seasons and holidays. January is a traditionally slow month, but Christmas finds the stand filled with Christmas cookies. In the summer it is filled with produce from the Hesses' extensive garden.

There are homemade pickles and relishes, along with jams and jellies. There is pumpkin already cooked, or cubed, waiting to be cooked, and there is a wide array of homemade items, including quilts, braided rugs and crotcheted items. Homemade egg noodles are also offered.

Normally the Hesses take about 30-40 loaves of bread each week, but Mrs. Hess recalls when they once took about 200 loaves. "Then we were the only ones with homemade bread. Now there are five or six stands which have it." She says that during tourist season they take as many as 60 loaves.

There are also "Nellie Blythes" offered, a goodie which resembles a doughnut "hole" and which is made from a cake-like dough and deep fried on the morning of market. Mrs. Hess said she has learned that Nellie Blythe was "one of the first women's libbers in 1890, but she didn't go far."

All of the items made by the Hess family are made from scratch from long-standing family recipes. In fact, it is Elizabeth who knows the proportions best. She says, "They call me their walking recipe book."

They weigh all their ingredients, and purchase bread and cake flour in hundred pound lots. They have huge storage units, with bins for the flour for ease of storing.

The farm kitchen in which they bake resembles any other large farm kitchen, with a few exceptions. The storage bins for the huge amounts of flour take up one corner of the room and part of a built-in porch. There are two electric wall ovens and one gas oven-range combination.

At any given time the day before market, all the ovens and several burners on top of the stove might be going. Eight loaves of bread can go in one oven at a time, and at least that many pies of varying sizes can be baked in the gas oven simultaneously. There are also potato buns to be baked, and cinnamon flops, along with a small quantity of bran muffins and a new version of whoopie pies developed by Elizabeth which are made with bran, hone and whole wheat. She said they developed this one because so many people request goods without sugar. Mrs. Hess added that their number of whole wheat loaves has been increasing over the years.

Mrs. Hess thrives on the work of her market stand. "I like meeting people," she says simply. "It never gets boring." She has a sister who comes to market to help her, so it is a sociable time as well as a work time. One visit to the stand and it is obvious that Mrs. Hess and her family are well-known and loved. Many people stopped by to say hello and to inquire about Elizabeth who has just returned from a vacation to Puerto Rico and Florida. One man said, "They really have something going."

Mrs. Hess remarked, "The older people come in early. By 10:00 a.m. it is so crowded you can't get around." In the summer busloads of tourists contribute to the crowded conditions.

The Hesses say they can "sort of tell" what will sell at market. One year there was a big snowstorm on market day on Fastnacht Day, but Mrs. Hess says, "We sold everything right in Marticville."

Usually they have very little left over when market is done, and if they do they sometimes share with a neighbor. Elizabeth said, "Sometimes it seems we never get to eat a pie. Once in a while we hit it wrong. When they predict snow, market day will be busy, but when it is snowy, it is not so busy."

When asked how she learned to do her baking, Mrs. Hess replied, "My mother baked bread and when we reached age 13 she taught each of us to bake it." She said she in turn taught her children to bake "when they finished with school." The recipe she uses for market is "Grandma's recipe."

Mrs. Hess has been married for 44 years, and has four daughters and three sons. She and her husband have 35 milking cows, raise ducks and do their own butchering. Mrs. Hess says that the Central Market was built the "same year as I was born, and I started standing at 17." She is now 67 years old.

In addition to taking an active part in the market stand, daughter Elizabeth also has a cake decorating business, in which she makes about 100 cakes annually, in every shape and using every decoration imaginable. She sometimes takes orders at market, but doesn't regularly supply cakes for the stand there.

At the end of their busy day of baking, which concludes mid-afternoon before market day, there are boxes of wrapped bread and counters filled to overflowing with lovely pies. The baked goods are transported to market by van.

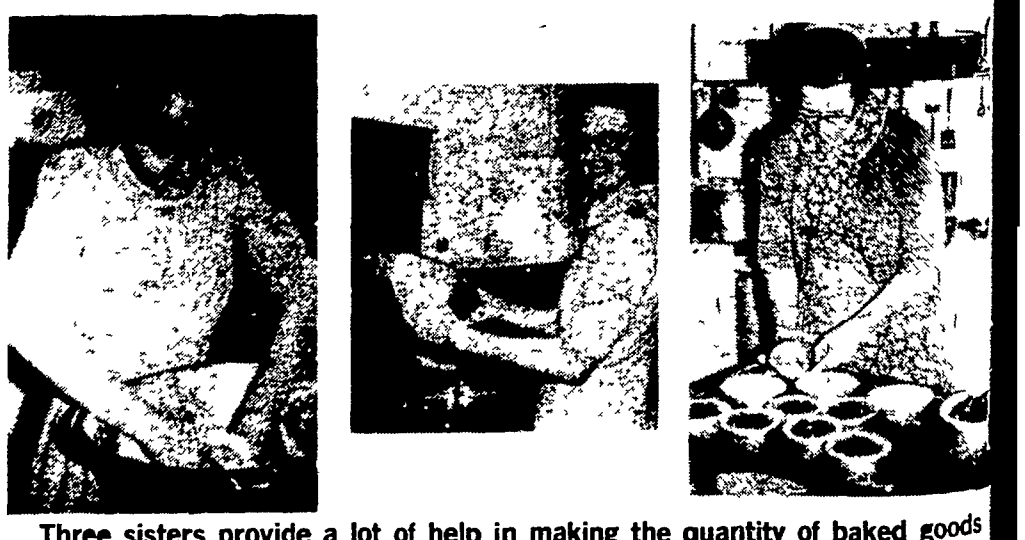
Standing on market has been a way of life for the Hess family for a long time and is likely to continue to be with the enthusiasm shown by everyone, led by Mrs. Hess.

If baking fastnachts is not on your schedule to get rid of your household fat before Lent, perhaps you should consider a stop at Central Market. Fastnachts from Mrs. Hess will surely help you get through the year with luck, and will make a tasty pre-Lenten treat for any family.

Mrs. Charles Hess packs fastnachts for the Central Market stand. Working in her farm kitchen with her three daughters, she will make dozens more to be sold on Fastnacht Day next Tuesday.

Homestead Notes

At Market, Mrs. Hess cheerfully greets customers and helps them make their purchases.



Three sisters provide a lot of help in making the quantity of baked goods necessary to satisfy regular customers. On the left Grace mixes pie dough. Mary (center) removes bread from one of the three ovens in use on baking day. On the right Elizabeth puts the finishing touches on cherry pies for market.

Ida's Notebook

Ida Risser

Recently, I went on a "retreat" with some women from my church. It was a pleasant day and I'll tell you why I enjoyed it.

One of the first surprises was traveling to Camp Donegal in York County with three other women who were several years my senior. Usually, I'm oldest in the group and feel as though I'm the one bringing up old times. Well, this time I just sat and listened as they reminisced about times past.

As we passed buildings, they recalled dances held there, which they attended without their parents knowledge; where people lived who were now deceased and how it was to visit Safe Harbor in their youth.

Our speaker for the day was a chaplain at a local hospital. We were given time for small group discussions and also for quiet meditation. As it was a blustery day some opted for the cozy fireplace in the large meeting room. But some did as I did and bundled up to take a walk through the large wooded area nearby.

As I walked through the brown oak leaves covering the ground and stepped over fallen trees, I worked my way downhill to a babbling brook.

It was very quiet there and only the sound of flowing water disturbed my contemplation.

I feel that God is always with me but one becomes more aware of it in such surroundings and a feeling of peace descends.

As time passes, one feels the necessity to again climb the hill—back to people, problems and pressures. Yet, one is somehow better for having withdrawn from them, if only for a short while.

Farm population three percent of total

MEDIA — Based on the newest definition of a farm, six and one-half million people were living on farms in 1978. People on farms represented three percent of the total resident population of the United States.

The definition of a farm has undergone several changes as the country has developed. The newest definition, adopted for the 1974 Census of Agriculture, is a place in rural territory which had, or normally would have had, sales of agricultural products totalling $1,000 or more for the reporting year.

The previous definition, used since 1960 defined farms as places of 10 or more acres with at least $50 in sales of agricultural products and places under 10 acres with a minimum of $250 worth of sales. The new definition now is in general use in various governmental surveys.

On being a farm wife - And other hazards

Joyce Bupp

This was the week of hearts and flowers, luscious sweet candies, special remembrances and an outpouring of the most beautiful sentence in the English language, "I love you."

Farm wives thrill to that lilting and touching phrase with the same tender emotions it evokes from sweethearts of all ages everywhere. We can never hear it enough.

But, I contend, there are some other phrases, unique to our livelihood, that also set farm women awash in a sea of rejoicing and gratification. While they never quite reach the pinnacle of "I love you," meaningful words like these set our hearts to soaring:

–guess we don't need a new tractor this year after all;

–I put an extra payment on the farm mortgage;

–there isn't a sign of bugs on the alfalfa;

–the water pipes to the back pens just thawed out;

–all the combine parts are in stock;

–I got the heifers chased back in by myself;

–looks like you won't have to help me tow the truck to start it;

–we have another heifer calf;

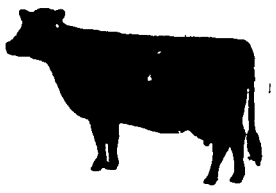
–let's stop and have lunch on the way home from the auction;

–cattle prices are up;

–feed prices are down;

–the milk check's here.

No, you'll never find those words on any flowery card. But I sure do like to hear them any day.



Keep warm and safe

UNIVERSITY PARK — If you are using a portable heater, safety is of prime importance. Your chances of freezing to death in your home are small, but fire, asphixiation from lack oxygen, or carbon monoxide poisoning are much greater dangers, unless you take adequate safety precautions.

Keep the heater at least three feet from anything that could burn: furniture, draperies, according to the Penn State extension service.

Provide plenty of ventilation in the room. Cross ventilate by opening a window an inch on each side of the room. It's better to let in some cold air than to risk carbon monoxide poisoning.

Always be alert to fire when you are using a portable heat source. If you feel drowsy, it may be a sign of inadequate ventilation.

Keep firefighting equipment. This may be a commercially purchased fire extinguisher or dry powder, a tarp or heavy blanket, sand, salt, baking soda or water.

Choose a cherry recipe for Washington's birthday

Celebrate the first President's birthday with one of our special cherry recipes. The Black Forest Crepe here combines the ever-popular crepe with delicious whipped cream and cherry pie filling.

Whether you celebrate Washington's birthday on the official date or holiday, something made from cherries is always welcome on your table. This week we are featuring several kinds of cherry desserts in honor of our country's first president. Try one, and perhaps you won't need to wait for an official occasion to please your family with a cherry cherry surprise.

BLACK FOREST CREPES

12 dessert crepes
1 21-ounce can cherry pie filling, chilled
2 tablespoons cherry liquer
3 ounces semi-sweet chocolate
1 cup whipping cream
¼ cup toasted slivered almonds

Mix pie filling and liquer; set aside. Melt chocolate over low heat; cool. Whip cream. Fold in chocolate (mixture will look speckled). Spoon 2 tablespoons chocolate mixture down the center of each crepe. Roll up. Place two crepes on each plate. Top with 1/3 cup cherry mixture, remaining chocolate mixture and almonds.

SWEET CHERRY STREUSEL

¾ cup sugar
¼ cup butter
2 eggs
½ teaspoon vanilla
1¼ cup flour
½ teaspoon baking soda
½ teaspoon baking powder
1/8 teaspoon salt
½ teaspoon cinnamon
½ cup buttermilk
2 cups cherries

In large bowl cream sugar and butter until light; beat in eggs and vanilla. Stir together dry ingredients; add alternately with milk to creamed mix; beat after each addition.

Pour into greased 9"x9"x2" pan. Arrange cherries, cut side up on dough and sprinkle with topping. Bake at 350 degrees for 30 minutes.

TOPPING:

1/3 cup flour
¼ cup sugar
2 tablespoons butter

Mix well until crumbly.

Debra Shultz, Halifax

CHERRY DESSERT

1 can cherry pie filling
1 package Dream Whip
1 large container of cream cheese
1 cup confectioners sugar
1½ cups miniature marshmallows
1 package of graham crackers

Crumb the graham crackers and mix with ¼ cup of softened butter and ¼ cup sugar, and spread into oblong pan, 8"x12". Bake at 375 degrees for eight minutes.

Mix together the confectioners sugar, cream cheese and marshmallows in a bowl. Put the Dream Whip in another bowl and mix as directed on package. Mix Dream Whip with the cheese mixture and put in on top of the graham crackers. Put the cherry pie filling on top. (Blueberry or lemon pie filling may be used in place of the cherries.

Mrs. Robert L. Snyder, Sunbury

CHEERY CHERRY CHEESE PIE

1 8-ounce package cream cheese, softened to room temperature
1½ cups confectioners sugar
almond extract
½ teaspoon vanilla extract
1 9-ounce carton non-dairy frozen topping
No. 2 can cherry pie filling
8" graham cracker pie crust

Mix together the cream cheese and confectioners sugar until smooth. Add a dash of almond extract and the vanilla extract. Fold in the whipped topping and mix until well blended. Pour into a graham cracker crust, either a prepared one or one you have made yourself. Top with the cherry pie filling. Chill and serve. (Other fruits may be substitued for the cherries.)

Mrs. Thomas Todd, Jr., Federalsburg, Md.

CHERRY STEAMED PUDDING

½ cup sugar
2 tablespoons butter
1 egg
1½ cup sifted flour
2 tablespoons sifted flour
2 tablespoons baking powder
¾ cup milk
1 tablespoon vanilla
1 quart sour cherries

Combine sugar, butter, egg, salt; add sifted flour and baking powder alternately. Add vanilla. Into hot, well-buttered jelly glasses, pour medium thick batter upon a few cherries, alternating cherries and batter until glasses are ¾ full. Steam continuously without uncovering for 30 minutes. Remove from glasses carefully so as not to break; serve with hard sauce.

HARD SAUCE

2 cups sugar
¾ cup butter
Remainder of cherries
Cream sugar and butter. Add cherries.

B. Russell, Pine Bush, N.Y.

BASIC CREPE DESSERT BATTER

½ cup flour
1 teaspoon sugar
¼ teaspoon salt
2 eggs, beaten
¾ cup milk
2 tablespoons melted butter
1 teaspoon vanilla extract

Into medium size mixing bowl, combine flour, sugar and salt. In separate bowl, combine beaten eggs, milk, butter and vanilla. Gradually add egg mixture to dry ingredients, stirring constantly with a wire whisk or fork until batter is smooth. Yields 10 6-inch crepes. One teaspoon almond, rum, lemon or orange extract may be substituted for the vanilla.)

A. A. Norman, Liberty

CHERRY CHEESE PIE

1 9-inch graham cracker crumb crust
1 pkg. (8 oz.) cream cheese, softened
1 can (14 oz.) sweetened condensed milk
½ cup reconstituted lemon juice
1 teaspoon vanilla extract
1 can (21 oz.) cherry pie filling, chilled

In medium bowl, beat cream cheese until light and fluffy. Add sweetened condensed milk; blend thoroughly. Stir in lemon juice and vanilla. Pour into crust. Chill 2 to 3 hours. Top with chilled cherry pie filling before serving.

Mrs. Glenn R. Love, East Waterford

CHEERY CHERRY PUDDING

Crumbs:
½ cup butter or margarine
1 teaspoon soda
1/3 cup sugar
½ teaspoon salt
1½ cups flour
1½ cup oatmeal
Filling:
1 quart canned sour cherries
⅔ cups sugar, if desired
½ teaspoon almond extract
1/8 teaspoon salt
2 tablespoons cornstarch

Put butter in 9" x 13" baking pan and set in oven. Turn oven on to preheat to 375 degrees. When butter is melted, remove from oven, tilting pan to coat bottom all over. Meanwhile, heat cherries in their juice, reserving ½ cup juice, in two or three quart saucepan. While heating, mix cornstarch and juice together. When cherries come to a boil, add the sugar, salt and almond extract. Stir in cornstarch mixture and cook until thickened. Remove from heat.

In mixing bowl, combine flour, oatmeal, sugar, salt and soda. Add melted butter, blending with fork until crumbly. Press half of crumbs in bottom of the baking pan. Spread filling over this; top with remaining crumbs. Bake at 375 degrees for 30 minutes for 20 minutes or until browned. Serve warm with rich milk or vanilla ice cream.

Lois V. Rhodes, Dayton, Va.

(Continued from Page C6)

CHERRY TORTE

1 tablespoon sugar
1 cup flour
½ cup plus 1 tablespoon butter or margarine
1 envelope Dream Whip
1 cup powdered sugar
1 8-ounce package cream cheese

Blend and pat into 9"x9" pan, sugar, flour, and butter or margarine. Bake at 350 degrees for 20 minutes. Beat 1 envelop Dream Whip according to package directions.

In separate bowl, beat the sugar and cream cheese. Blend the cheese mixture and the whipped topping and spread on cooled pastry. Chill. Spread cherry pie filling on top. Cut in squares.

Mrs. Carl S. Bacon, Felton

CHERRY DESSERT

1¾ cup flour
2 teaspoons baking powder
½ teapoons salt
¼ cup Crisco
1 cup sugar
1 egg
¾ cup milk
2 cups cherries, drained, reserving liquid
½ cup chopped nuts

Sift together flour, baking powder and salt. Add shortening, sugar, egg and milk, beat well. Add cherries to batter, reserving liquid for sauce. Add nuts. Mix well and bake in an 8-inch square pan for 35 to 40 minutes at 375 degrees. When cool, cut into squares and serve with Hot Cherry Sauce.

HOT CHERRY SAUCE

½ cup sugar
2 tablespoons cornstarch
1 cup boiling water
¾ cup cherry juice.

Mix sugar, cornstarch, water and cherry juice. Simmer until thick and clear. Pour over cake squares.

Mrs. Charles Biehl, Allentown

Farm Women Societies

Berks Co. Society 8

Ken Moyer, an agent for State Farm Insurance, presented a program on safety at the January meeting of Berks County Society 8, at the home of Helen Shirey, Bernville.

Moyer showed the film, "Learn Not To Burn," and answered questions about automobile, fire and theft insurance. Members were given an accident report guide pamphlet.

President Barbara Kintzer announced that the County Hoedown will be held April 19; the Spring Rally is May 1; and Society 1 will celebrate its 40th anniversary on April 30.

Several members reported on a visit to the Society's adopted Berks Heim member and expressed her thanks for Christmas gifts. Berks Heim games night will be held April 17 and Berks Heim Tea will be held May 17.

The membership approved the purchase of sheets and towels for two Bernville families whose homes were destroyed by fire. There was a report on the state convention by several members.

The February meeting will be held at the home of Mrs. Barbara Grimes, Strausstown.

Lancaster Co. Society 6

Lancaster County's Alternate Dairy Princess Marcia Groff spoke at the February meeting of Farm Women 6 held at the home of Mr. and Mrs. Harry Shonk.

Anna Geyer was appointed to contact Gordon Mintz at the State Hospital with regard to giving reading material. The society voted to give a year's subscription to a farm publication.

Members discussed starting their meeting earlier to allow members on farms to be home in time to help with the chores.

Mrs. Larry Baum, Sara Myer and President Saylor reported on the state convention in Harrisburg.

If they eat up your time along with your feed, maybe it's time for Chore-Time.

The old "cart and scoop" approach to confinement feeding just doesn't make it anymore It's too much work It takes too much time It wastes too much feed

Chore-Time's Flex Auger® system makes feed-handling a push-button proposition Feed is automatically conveyed from bulk bin to hog feeders through a closed tube—so there's no chance of spillage or contamination

Drug withdrawal is simplified with Chore-Time's tandem boot feature A single flex fill system feeds from either bin

We specialize in feeding systems and air systems Which helps explain why Chore-Time makes the longest-lasting, most trouble-free systems on the market

Call or write us today Find out how our Flex Auger feed delivery system can help you make more profit from every pound of pork you produce

Farm Women Societies

(Continued from Page C8)

Lancaster Co. Society 10

Mrs. Raymond Dixon hosted the February meeting of Farm Women Society 10 at her home in the Village of Olde Hickory, Lancaster. President Lucy Miller conducted the meeting, and one new member was accepted.

Kathy Scott, Anette Habecker and Lucy Miller, delegates to the state convention, reported on the activites.

The March meeting will be held in the Neffsville Fire Hall. Scott Riedle, magician, will furnish the entertainment.

Lancaster Co. Society 12

Mrs. Francis Greiner, Mount Joy, talked to Lancaster County Society 12 about creating with dried flowers.

The Society welcomed two new members, Carol Nissley and Barbara Melick. Sewing for the American Cancer Society was held at the home of Mildred Kindig, Conestoga R1, on Tuesday, February 12. Members are asked to bring a bag lunch; beverage will be provided.

Hostess for the January meeting was Blanche Wissler, Millersville. Rhoda Hess was co-hostess.

York Co. Society 1

York County Society 1 initiated a new member, Estella Prowell, at its February 6 meeting. Members were invited to attend the 50th anniversary of the York County Society of Farm Women on March 1 at the York College student center.

Alberta O'Neal was hostess for the meeting, and Amy Miller, president, presided over the meeting.

The next meeting will be held at the home of Mabel Rishel on March 5 at 1:00 p.m.

York Co. Society 31

A Stanley party was held at the January meeting of Round Top Farm Women Society 31 when it met at the home of Cora Keefer.

President Mrs. Loyle Moyer conducted the business meeting and discussed the bylaws.

A mystery dinner will be held at the home of Mrs. Evelyn Burrell, Wellsville on February 18, at 7:00 p.m. There will also be a silent auction.

Be prepared with an emergency food supply

MEDIA — People need to eat in an emergency just as they do any other time. During short power outages you can probably get along quite well right out of the pantry or refrigerator. For longer outages, however, you'll want to find a good cooking source.

Picnickers, campers, fishermen and other outdoorsmen have been using camp stoves for years. They are available in one, two and three burner varieties fueled by white gas or propane and make meals a snap. Many homemakers are amazed at how conveniently they can cook regular meals on a camp stove...you can even use standard cooking utensils. And nothing beats a good homecooked meal to calm down a family in time of emergency.

Be sure to set up temporary cooking facilities in a well ventilated area. A good place for a stove is right on top of your electric range, but never put the fuel tank over a burner that might come on with the power. Be sure to keep a window slightly open.

Charcoal cooking devices are suitable for outdoor use only, and should never be used inside. The fumes emitted from the burning coals are deadly and odorless. It takes a little time to master the art of cooking over an open fire, but if you have a fireplace and some patience, you can put together some interesting meals.

You probably won't experience any food shortage in an emergency, although the variety may not be what you're used to. Keep a supply of canned goods on your emergency shelf and don't forget a hand-operated can opener. In time of emergency your electric can opener will do no good.

Check your emergency food supply regularly and recycle food back into normal use from time to time. Replenish as needed and you'll always be assured an adequate food supply.

Consumer skills help available

UNIVERSITY PARK — To play the credit game, you must know the rules. Marilyn M. Furry, Extension family resources specialist, says credit management is like a game: play it right and you'll come out the winner. These rules and more information on surviving in the marketplace are available in Ms. Furry's correspondence course on **Sharpen Your Consumer Skills.**

Guidelines are given to use in estimating current debt load, amount of credit you can afford, and the various types of credit available. For example, personal finance companies advertise how easy it is to obtain credit to help you over the holiday money crunch; it is easy because you need less collateral than from most other lending agencies. However, interest rates and service charges are usually higher because finance companies make many small loans and thus take greater risks. Shop around because rate of interest varies and there is a monthly rate on the unpaid balance of the loan. Usually the approximate annual percentage rate ranges from 18 to 48 percent.

The eight-lesson course is available by sending $4.50 plus 50 cents postage to CONSUMER SKILLS, Box 5000, University Park, PA 16802. Make check payable to Penn State.

Ladies Have You Heard?

By Susan Doyle

Lancaster Home Economist

Can Baking Bread At Home Save Money?

For morning toast, noontime sandwiches or with dinner at night, bread is a fixture in most families' diets. The cost of a loaf of bread, though, is rising regularly right along with most other prices.

Making bread at home may be one answer to rising bread costs. But before you decide that bread baking will become a weekly family activity you should consider a number of factors.

First you'll need time. For many families, weekends are the only time the hours needed to make bread can be found.

If you make the time, you'll probably want to bake bread in some quantity. Since homemade bread has none of the preservatives found in many commercial loaves, you will need freezer space to store your extra loaves of bread.

You will also need to develop skill in kneading and find a suitable draft-free place for your bread to rise.

Here are additional tips to help make the bread making process economical and satisifying.

Try to purchase your flour, yeast and sugar in quantity. Five pound bags of flour and little foil packages of yeast are fine for your trial efforts, but once you make a commitment to baking bread stock up and take advantage of lower unit costs. Look for 10 or 25 pound bags of enriched flour and yeast in 4-ounce jars.

Store brands of flour may be your best buy. While bread flour is now commonly available and produces an excellent product, it costs more than all-purpose flour. Most families are delighted with the results that all-purpose flours produce.

The recipe you choose can also affect the cost of homemade bread. Some recipes, such as quick-rising breads, call for twice as much yeast which adds to the cost. Whole milk can often be replaced by nonfat dry milk mixed with water.

Try making bread at home. It may save you some money and will surely provide a taste treat for your family.

A Good Diet Is A Safe Bet

One of the few widely agreed upon facts in the area of diet and nutrition is that eating a wide variety of foods is the best way to insure that you get the nutrients you need.

In fact, a major criticism that most nutritionists have with so-called fad diets is that they too often focus on one or two foods or categories of foods. Common examples are the banana diet, the grapefruit diet, the high protein diet and the low carbohydrate diet.

With today's emphasis on prevention - of disease, of tooth decay, or gaining excess weight - a balanced diet becomes essential. There is no guarantee that a balanced diet will keep you healthy, but much evidence indicates that it does play a role.

A good diet should be based on the four basic food groups, the meat group, the milk group, the breads and cereals group and the fruits and vegetables group. Within these four groups there is room for modification to meet your individual needs.

For example, a person concerned with weight control could choose lean meats such as chicken or turkey rather than pork or beef; bake or broil the meat instead of frying; and use fresh fruits or fruits packed in light syrup instead of cakes, pies or cookies. Non-fat milk could replace whole milk and whole grains cereals and breads could substitute for the more refined versions because these provide more nutrition for the calories.

Breads and cereals aren't any more fattening than other foods. The excess calories come from the spreads you add to breads and the sugars you add to cereals.

A good diet, whether for weight loss or just plain maintenance of good health does not limit you to a few foods nor does it eliminate one class of foods. Many foods that aren't a good source of any particular nutrient belong in a balanced diet. They serve to make the meal more attractive and pleasing and may often have trace elements of nutrients required in very small amounts.

The best way to feel and look healthy is to eat a variety of foods in moderation.

Save on Food Bills Safely

During these times of escalating food prices, proper storage of your leftover meat and poultry dishes can help to stretch your food budget. Proper storage is essential to prevent bacterial growth that leads to spoilage, food poisoning, or the wasting of food.

Prompt refrigeration of turkey, chicken, roast, ham, or other meat and poultry dishes is the best means for keeping bacterial growth at safe levels.

When meat or poultry is left at room temperatures for more than a couple of hours the potential for spoilage increases. Bacterial growth flourishes at temperatures anywhere between 40-140 degrees F.

Hot leftovers can be refrigerated immediately as long as they do not raise the temperature of the refrigerator more than a couple of degrees for a short period of time.

Leftovers such as chicken and gravy should be wrapped or covered and stored at temperatures of 40 degrees F or lower for no more than one or two days. If you are not planning to use these items within a day or two, put them in the freezer. Meat and poultry dishes have a tendency to dry out and lose their flavor if not stored properly.

Chicken covered with broth will keep in the freezer up to six months if stored in an airtight container. However, gravy, meat broth, or cooked meats should not be kept longer than three months.

Leftovers should be refrigerated at temperatures not exceeding 40 degrees F, or frozen at temperatures of 0 degrees F or lower. You should also avoid overcrowding the refrigerator.

When air circulates, the cooler air moves downward and forces the warmer air near the bottom to rise. If food has not been properly stored, this air motion will dry out any uncovered, unwrapped, or improperly stored meat and poultry leftovers.

The Twin Valley chapter is one of nearly 8,000 local FFA chapters in the United States.

PROLASSE® 8%

ALL NATURAL PROTEIN

SAVE MONEY ON FEED COSTS
USE MORE HOME GROWN GRAIN

Increase production and feed intake with a more palatable ration made with liquid ProLasse on your own farm.

Now for the first time there is a liquid molasses that can be applied with inexpensive metering equipment and any P.T.O. mixer.

New ProLasse's exclusive patented formulation controls the dispersal and penetration of the liquid and assures uniform mixing with no particle segregation. ProLasse also helps prevent molding when using ear corn or other grain with too high a moisture content. Pro Lasse also contains a stable guaranteed vitamin and mineral package.

Only a small amount of liquid ProLasse is needed to make a sweet feed that is not sticky and will flow freely in Automatic Feeding Systems without bridging.

Sold and distributed by your local feed dealer, mobile grinder mixer operator or liquid supplement dealer.

NEW VALUE IN TWO NEW UTILITY TRACTORS

It's time you came to see the feature-packed value in the new White 2-45 and 2-65 Field Boss Utility Tractors. It's been a long time since value like this has hit the utility tractor market. And we've got it waiting for you. The new White® 2-45 and 2-62 Field Boss® Utility Tractors.

Take your pick of 4-cylinder diesel engine performance from the 43 hp* 2-45 and the 60 hp* 2-62. Both come loaded with standard features many of their competition can't match.

A standard 20-speed transmission leads the list along with independent pto, planetary final drives, differential lock, wet disc brakes and a deluxe adjustable seat.

Four wheel drive performance can be at your disposal with either the 2-45 or the 2-62. It's one option that certainly comes in handy for loading jobs or wet field conditions.

Now see us for the price. You'll soon see what we mean by value in utility tractors. And we're in a position to make great introductory deals. So stop by today. *Mfr's est pto hp

Junior Cooking Edition

The mail continues to bring an assortment of interesting recipes from **Lancaster Farming's** junior cooks. Some recipes have been received along the theme of the Home of the Range feature, and others are family favorites of the junior cooks.

This week there will be an assortment of good-sounding recipes which will keep the junior cook busy on a cold winter afternoon. Desserts continue to be favorites, but

DELICIOUS FUDGE

4 cups white sugar
1 teaspoon vinegar
2 tablespoons corn syrup
2 squares chocolate or 2 tablespoons cocoa
1 cup evaporated milk
1 pint marshmallow cream
1 pint peanut butter
1 teaspoon vanilla

Combine sugar, vinegar, corn syrup, chocolate and evaporated milk; cook to a rolling boil and boil three minutes. Remove from heat, add marshmallow cream and peanut butter. Spread in pan. Cook and cut in squares.

Gwen Eberly, Age 10, New Holland

MINCE PIE

2 lbs. lean cooked and ground beef
5 lbs. apples
1 lb. raisins
1½ teaspoon cinnamon
1 teaspoon nutmeg
1 tablespoon cloves
1 tablespoon allspice
1 tablespoon salt
2½ lbs. brown sugar
1 quart cider

Mix above ingredients and let stand 24 hours before using. Bake between two crusts.

Lydia Burkholder, Age 18, Kutztown

COCONUT OATMEAL COOKIES

7½ cups flour
6 teaspoons baking powder
6 teaspoons baking soda
3 teaspoons salt
3 cups granulated sugar
3 cups brown sugar, firmly packed
3 cups butter or margarine, melted
6 eggs
3 teaspoons vanilla
6 cups oatmeal
2 cups butterscotch chips
4 cups coconut
nutmeats

Sift together flour, baking powder, soda and salt into bowl. Add sugars, butter, eggs and vanilla. Beat until smooth, about two minutes. Stir in oatmeal, coconuts and nutmeats. Shape to form one-inch balls. Place on greased cookie sheets. Bake in preheated moderate oven (350 degrees) for 12 to 15 minutes.

Junior Cooking Edition

(Continued from Page C12)

OLD FASHIONED COCONUT PIE

1 fresh coconut, grated
1 cup sugar
3 cups milk
3 egg whites

Combine grated coconut, sugar and milk. Fold in stiffly beaten egg whites. Pour mixture into unbaked pie shells. Bake at 350 degrees for 40 to 45 minutes. This amount makes two 9 inch pies.

Eleanor Burkholder, Age 12, Kutztown

MINTS

1 pound confectioners sugar
¼ pound melted butter
Milk
Spearmint flavor
Food coloring

Mix sugar and butter in a bowl, adding a little milk to make it workable. Add a few drops of spearmint flavor and food coloring, as desired. Roll into balls and press with fork.

CORN PONE or CORN BREAD

1 cup sugar
½ cup shortening
1½ cups sweet milk
1½ cups white flour
1½ cups cornmeal
2 eggs
3 teaspoons baking powder
1 teaspoon salt

Mix sugar, shortening and eggs. Beat well. Add milk and sifted dry ingredients. Mix well. Bake in Pyrex loaf pan at 325 degrees about 40 minutes. Serve with fruit, milk and sugar.

Dorcas Nolt, Age 9, New Holland

SCALLOPED POTATOES

6 - 8 potatoes
3 large onions, sliced thin
3 tablespoons flour
1½ teaspoons salt
¼ teaspoon pepper
2 cups milk, scalded
2 tablespoons butter or margarine

Parboil potatoes in salt water for three minutes and drain. Layer potatoes and onions in a 10-cup baking dish, sprinkling flour, salt and pepper between the layers. Pour milk over potatoes and dot with butter. Cover. Bake in 375 degree oven for 45 minutes. Uncover and bake 15 minutes longer or until potatoes are tender and brown.

Neil Snyder, Age 14, Littlestown

DELICIOUS COOKED SALAD DRESSING

¾ cup vinegar
2½ cups granulated sugar
2 cups water
4 eggs
2 cups milk, or cream if preferred
chopped onions, as desired
1 teaspoon mustard
3 tablespoons butter
4 tablespoons flour
salt

Boil together the vinegar, granulated sugar and water in saucepan. Add eggs, milk, onions, mustard, butter, flour and salt to the boiled mixture and stir over low heat until boiling. Add a little tumeric to make a rich yellow dressing. Add to cooked macaroni or potatoes while still hot.

Fannie King, Age 13, Ronks

Penn State offers fruit growing courses

UNIVERSITY PARK — Commercial orchardists and home owners with a few fruit trees will find valuable information in a series of correspondence courses on fruit growing from Penn State.

For the commercial grower, two comprehensive courses are offered on **Commercial Fruit Growing** and **Disease and Insect Problems in the Commercial Orchard.** Growers less than satisfied with their recent harvest or those who want to ensure an even better crop this year will find valuable information in the 12-lesson course. Penn State pomologists recommend that farming fewer acres more intensively is usually more profitable than managing a large acreage of fruit-bearing trees. Profits from the opreration should be examined over a 10-year period since this is a better index of the investment than looking at the returns for any one year or even for two or three years.

Information covers location, planting, soil management, pruning, packing, and marketing and sells for $6.50. Apples, peaches, pears, plums, cherries, and quinces are the fruits emphasized. Disease and insect problems of these same fruits are detailed and controls suggested in the second course, available for $3.00.

For the home orchardist, **Home Garden Fruits** covers underlying principles of fruit culture, soil treatment and fertilization, pruning, harvesting, diseases and insects, and storing fruit. Home Garden Fruit is available from Penn State for $4.00.

To order copies of any one of these courses, indicate the individual course or courses desired, making checks payable to Penn State. Include 50 cents postage for each course ordered. Send orders To Correspondence Courses, Box 5000, University Park, PA 16802.

Recipe Swap

This week we are offering a recipe for French Apple Pie, which was sent to us by Anna Mary Newswanger, New Holland; R. Boyd, Alburtis; and Mrs. Paul R. Sauder, Shippensburg.

FRENCH APPLE PIE

Unbaked 9" pie shell
7 cups sliced, pared apples
2/3 cup sugar
½ teaspoon ground cinnamon
1½ tablespoon butter

Combine apples, sugar and cinnamon. Turn into pie shell. Dot with butter. Sprinkle with topping. Bake in 400 degree oven from 50 minutes for until apples are tender.

TOPPING:

Combine 1 cup flour, ½ cup brown sugar, firmly packed and ¼ teaspoon ground cinnamon. Cut in ½ cup butter until crumbly.

PEANUT BUTTER FUDGE

½ lb. butter
1 lb. confectioners sugar
3 tablespoons Hershey's cocoa
1 teaspoon vanilla
1 cup chunky peanut butter

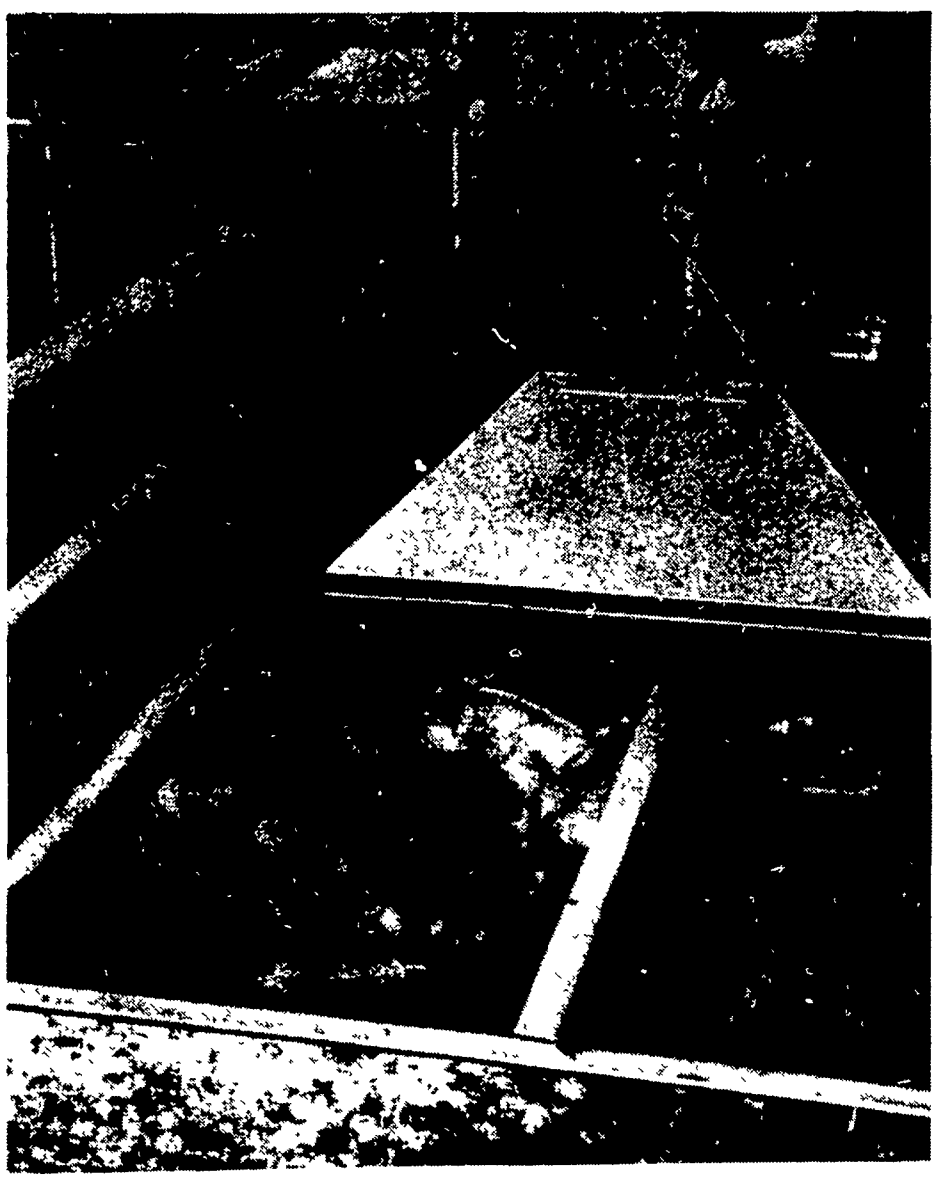
Melt the butter and stir in sugar, cocoa and vanilla. Add the peanut butter and mix well. Store in refrigerator. This requires no cooking and will keep a long time, if covered.

Anna E. Zerr, Geigertown

Question: I would like a recipe for white fudge.

Mrs. Thelma Gould, Acme

PENNSYLVANIA AGRICULTURE
WE'RE GROWING BETTER



Warm-Up to Northco

With Zone Heating ■ Efficient Gas Heating

★ **ECONOMY** - Northco Pig Brooders operate on just pennies a day because they use two small burners rather than one large gas eating burner. Its operating cost is over 75% lower than that of heat lamps.

★ **SIMPLICITY** - One simple needle valve provides positive heat control. Burners can be easily removed for cleaning. Chain suspension allows simple, quick height adjustment for added temperature control.

★ **SAFETY** - Northco Pig Brooders can be safely used over straw or litter. There is no need to worry about pigs being cut by broken lamps or loss by bedding fire. It works with any ventilation system.

★ **Safe, Dependable "Zone Heating"**
Northco Pig Brooders are excellent for brooding little pigs because they provide "zone-heat". Ideal temperatures for little pigs may be 25 to 30 degrees warmer than needed for the sow. With "zone-heating" temperatures are directed only to the little pig area, while sows remain cooler. If more heat is needed in extremely cold weather the brooders can be raised to heat the entire house ... eliminating the need for furnaces or costly unit heaters.

Choosing fabrics for outerwear garments

MEDIA — Sewing a ski jacket, vest, or sleeping bag is easier than ever thanks to the many outerwear kits on the market today.

More accomplished home sewers may even choose to make an outerwear garment without a kit, which means selecting the pattern, fabric and notions separately. Here are some pointers to help make these choices easier.

For a long lasting and durable outerwear garment, fabric must be light-weight but strong enough to take the abuse that recreational clothing seems to undergo. The fabric must be resistant to abrasion and must also "breathe." That means it must let some air pass through, but not enough to make the wearer feel cold.

One of the most popular outerwear fabrics today that meets these criteria is nylon. Its strength and elasticity surpass that of almost every other fiber. It's also water repellent, light-weight, and easy to care for.

Nylon for outerwear is found mainly in ripstop or taffeta weaves, two variations of a plain weave.

Ripstop is composed of two heavy twisted threads that are woven in both directions, which increases the strength of the fabric.

Nylon taffeta uses larger than normal threads to make up its weave, which gives it a higher tear strength but makes it heavier than ripstop.

Consensation is one problem with nylon because water stays on the surface, making a garment feel wetter than it actually is. But generally the advantages of nylon are greater than its disadvantages as an outerwear fabric.

Another fabric commonly found in outerwear garments is a blend of 35 per cent cotton and 65 per cent polyester, marketed under many trade names. Cotton has less of a condensation problem than nylon but is subject to mildew and rot. Polyester is as strong as nylon but not quite as elastic. When blended, cotton and polyester create a strong, water repellent cloth, although it's heavier and less versatile than the nylon fabrics.

When shopping for outerwear fabrics, avoid those that are waterproof unless you plan to use them for rainwear. A totally waterproof garment has a special coating which prevents body moisture from evaporating. This moisture condenses on the inside of the garment and causes a cooling effect, which makes the wearer feel cold. In fact, waterproofing is not advisable in fabrics that are needed for warmth; instead, make these out of water repellent fabrics, which allow the water to collect and run off the fabric instead of being absorbed by it. Or spray a water-repellent finish on the garment.

Proper insulation filling is also an important factor in making an outer-wear garment. The dead air spaces created by this filling trap body heat and help keep you warmer. When choosing insulation remember that heavier fillings are not necessarily warmer. Consider the traditional goose down filling, but don't ignore the synthetic polyester fillings that are light, washable, fast-drying, odorless, and lots cheaper.

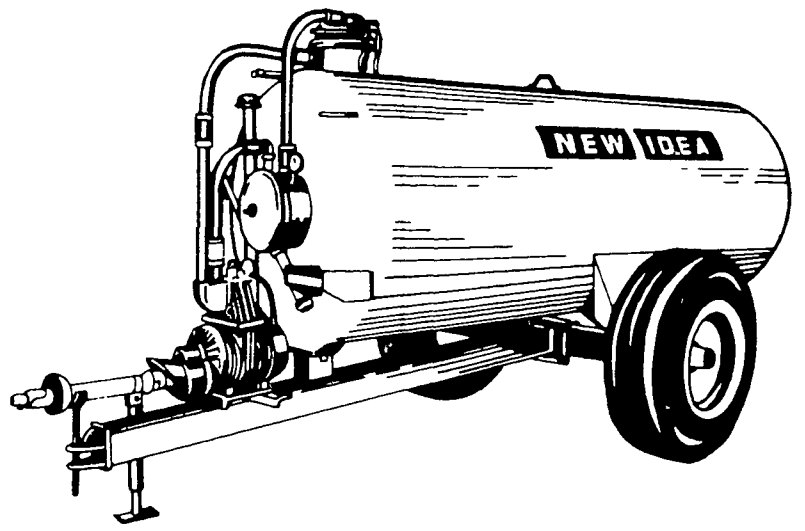
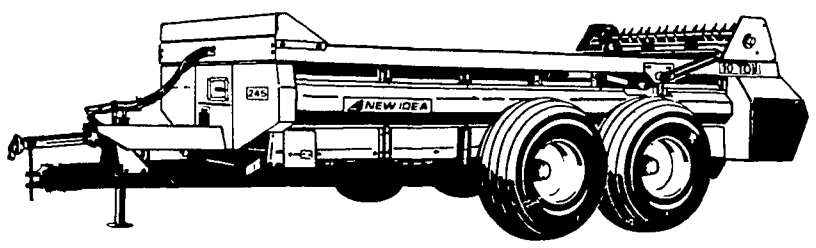
SOLID OR LIQUID...NO PROBLEM!

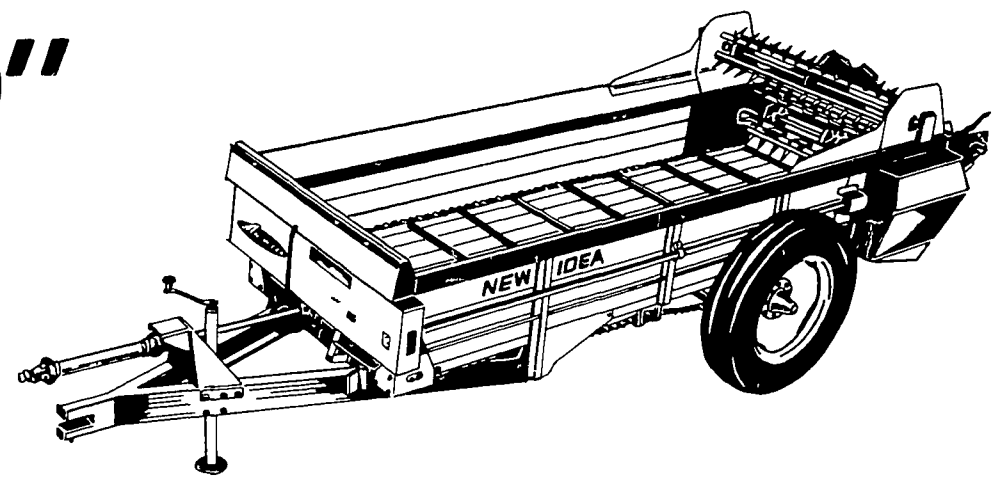
Any way you spread it, Avco New Idea manure spreaders save you time and money with tough, reliable spreaders. Available in four sizes, 800, 1100, 1500, and 2100 gallon tanks, these liquid spreaders do the job cleanly and easily.





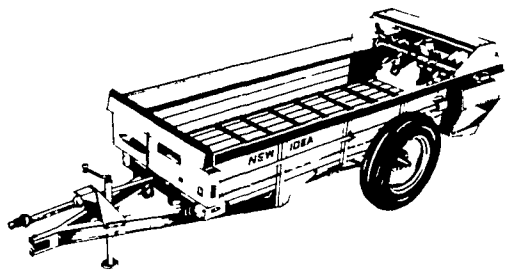
Solid manure spreads evenly and fast with our smooth-riding, easy handling ground spreaders. These rugged, long-lasting machines are designed for quick, even spreading of all types of solid manure. Flail type, single beater, and cylinder paddle models are ready to meet your spreading needs.

"THE WIDESPREAD"



Cylinder-Paddle Spreader

Used by more farmers than any other type spreader. Ten rows of blade-like, triple staggered, U-shaped teeth spread fine and the 10, thick steel paddles throw farther for increased coverage.



EXCLUSIVE! FLAIL-TYPE SPREADER

The ideal answer for top dressing or heavy spreading. The unique "undershot principle" throws the manure down and back so the winds won't blow it around.

- 16 weighted and sharpened steel flails
- Pulverizes even hard-packed or frozen manure
- 80- to 90-inch wide distribution

Farmers invited to join Philly tailgate market

PHILADELPHIA — Nutritional Development Services of the Archdiocese of Philadelphia invited all area farmers and consumers to attend an orientation and planning meeting for the Philadelphia Tailgate Market Project 1980, on Tues., Feb. 22, 10 a.m. to 3 p.m.

The meeting, to be held at the Archdiocesan Building, 222 N. 17th Street, Philadelphia, will focus on the discussion of the tailgate project; consumer feedback on past markets; consumer suggestions; and the election of officers of the executive committee.

The tailgate markets, a farmer to consumer coalition, have experienced great success since their inception in 1977.

Last year, weekly open air markets were held at four locations within the city, July through October. A "mini market" featuring eggs, poultry and meat products was continued at one location through the end of December.

The project has brought enthusiastic response from consumers and participating growers alike. The farmers reported profits 33% to 45% higher than the farm wholesale price normally received, while consumers were able to buy day-fresh products at reasonably prices.

In addition, both electronic and print media took an interest in the publicity of the markets, enabling more city residents to visit the sites on a weekly basis.

The cost to the participating farmer is $50. This fee covers the cost of temporary licenses, provided by Nutritional Development Services, which entitle the participating grower to sell his product at any designated site as often as he wishes throughout the season.

Farmers or consumers interested in more information on the Philadelphia Tailgate Market Project for 1980 should contact Catherine Hanssens, Nutritional Development Services, at 215-587-3691.

A one-dish disguise for leftover ham

SYRACUSE, N.Y. — The true test of the homemaker's culinary cunning is her ability to deliciously disguise a "leftover" so that no one – not even her husband or children – would ever recognize it.

So while he's at work and the children are at play, quickly transform that leftover piece of ham into pretty julienne strips. In a skillet, saute onions and green pepper in butter to flavorfully tenderize them. Stretch this one-pan meal with elbow macaroni in protein-rich milk sauce, then hide the ham strips in the creamy combination. Swiss cheese, ham's favorite flavor partner, is a delicious way to slip added protein into the meal. Skillet Ham and Cheese deserves an unexpected twist so give it a tasty new identity with tangy dairy sour cream.

For more flavor intrigue, serve Skillet Ham and Cheese with almond butter-sauced broccoli and cool, refreshing milk. When your family finishes licking the platter clean, you can congratulate yourself for one-dish mission accomplished.

SKILLET HAM AND CHEESE

¼ cup (½ stick) butter
¼ cup chopped onion
⅓ cup chopped green pepper
1 tablespoon all-purpose flour
1 teaspoon salt
1 package (8 oz.) elbow macaroni, uncooked
3½ cups milk
1½ cups ham, cut in julienne strips
1 cup (4 oz.) shredded Swiss cheese
1 cup dairy sour cream

In a large skillet melt butter; add onion and green pepper and saute until tender. Stir in flour and salt. Add macaroni and milk, then ham. Cover and bring to a boil; reduce heat and simmer 15 minutes or until macaroni is tender, stirring occasionally. Add cheese and sour cream and stir until cheese is melted. (Do not boil). Makes 6-8 servings.

Flower Power

Though Holland is usually considered famous for its tulips, yearly sales figures show the Netherlands' top blooms are roses, followed by freesias — with tulips in third place

Beef herd requires management

UNIVERSITY PARK — Low-cost care is a key to profits with beef cattle. Expensive barns and large quantities of purchased feed grains are not necessary.

According to a Pennsylvania State University correspondence course, costs pertaining to such items as beef production, investment in land, and equipment per cow must be kept low. Correctly managed, a beef cow herd can be profitable.

Cattle do well in the shelter of an open shed. A deep shed facing south is excellent. Feeding is easy and less bedding is required than with animals in single stalls.

Beef cattle thrive on good forages. Farm grown roughages can make up the main part or all of winter rations. Legume hays provide the protein and corn silages or grass-legume hays provide the carbohydrates. Summer feed comes from pastures.

Grains should be fed to beef cows only during breeding or when roughages are in short supply. Except when high-quality pasture is available, feeder cattle should receive supplemental grains usually. Send for Penn State's correspondence course to learn more about the care of beef cattle. For a copy of the course, send $6.50, plus 50 cents to BEEF PRODUCTION, Box 5000, University Park, PA 16802. Make check payable to Penn State.

White Heaters offer
CLEAN, ECONOMICAL HEAT FOR FARMSHOPS

Solve those odor problems and cut the costs of heating your farmshop with a White Heater
White Heaters are clean burning gas heaters There are no odors or irritated eyes caused by oil space heaters You work in complete comfort
And White Heaters are safe for farmshops like yours They meet fire and emission standards for ventilated buildings
With a White Heater you save money in fuel, maintenance and in purchasing
Compare fuel bills from a White direct-fired heater to other gas heaters You'll find savings of about 20%
Maintenance costs are also lower There are no heat exchangers to clog, no nozzle to foul
Shop around and compare gas heater prices You'll be surprised A White Heater can save you 33% to 50% in price alone
Come in and see us We'll show you how to heat clean and save money

Cheese adds extra flavor to soup

SYRACUSE, N.Y. — If you're pursuaded there's nothing like soup to cure any number of ills, then cheese soup made with chicken stock is your dish. Even if you are not, soup is still a flavorful, nutritious and filling food.

Cheese, of course, contains the nutrients of milk in concentrated form. Thus, creamy soups like Cheese-Chicken and Swiss-Onion have extra protein and vitamins because they're made with both cheese and milk. For a hearty lunch or supper, either of these has the satiety value for a main dish.

In the case of both soups, vegetables are sauteed until tender, then flour is added for a roux to which is added the chicken or beef broth. After this has thickened slightly, milk is stirred into the mixture.

Cheese-Chicken Soup has cheese in the soup as well as atop for the garnish. Swiss Onion Soup has the traditional French bread, toasted and buttered with cheese sprinkled on top.

Canned soup is used as a convenience for both soups, but if you have your own chicken or beef broth made in advance and frozen, do, of course, substitute that.

These delicious, easy to make soups were tested in the kitchens of United Dairy Industry Association and brought to you by the American Dairy Association and Dairy Council of Syracuse, N.Y.

CHEESE-CHICKEN SOUP

¼ cup butter
¾ cup finely chopped celery
½ cup thinly sliced carrot
¼ cup chopped onion
¼ cup all-purpose flour
1 can (10¾ oz.) condensed chicken broth
3 cups milk
2 cups (8 oz.) shredded Cheddar cheese
Chopped parsley
Shredded Cheddar cheese

Melt butter in 2-quart saucepan; add celery, carrot and onion and saute until tender. Stir in flour; cook 1 minute, stirring constantly. Gradually stir in broth. Boil and stir 1 minute. Stir in milk. Heat to simmering point, stirring constantly.

Remove from heat and stir in cheese until melted. Return to low heat to finish melting cheese, if necessary. (Do not boil).

Sprinkle each serving with parsley and shredded cheese.

Yield: about 5½ cups.

SWISS-ONION SOUP

¼ cup (½ stick) butter
7 cups diced onions (about 2 pounds)
2 tablespoons all-purpose flour
1 teaspoon salt
4 cups beef bouillon
4 cups milk
8 thick slices French bread, buttered, toasted
2 cups (8 oz.) shredded Swiss cheese

Melt butter in 4-quart saucepan; add onions and saute until tender, about 15 minutes. Stir in flour and salt, cook 1 minute, stirring constantly. Gradually stir in bouillon. Bring to a boil; reduce heat, cover and simmer 30 to 40 minutes. Stir in milk. Heat to serving temperature. (Do not boil).

To serve, ladle soup into ovenproof mugs or bowls. Top each with 1 slice French bread and ¼ cup Swiss cheese. Place in preheated 325°F. oven 10 minutes or until cheese melts.

Yield: 8 servings (about 9 cups soup).

Grow vegetable plants from seed

FLEMINGTON, N.J. — There is a great deal of satisfaction in growing your own plants from seed. Althrough some gardeners can produce quality plants at home, most home gardeners are not successful.

Gardeners who try to grow their own vegetable transplants usually have three strikes against them from the start, namely light, humidity, and temperature.

Light intensity at home is often too low to grow healthy, stocky vegetable plants. Few homes have windows that receive full sunlight all day. The sunlight comes from one direction causing the plants to become spindly and lean in the direction of the sun.

The relative humidity in most homes is below 20 percent while humidity in greenhouses is generally maintained at 30 percent or higher.

The temperature in most homes is too high to produce rugged vegetable plants even though thermostats are being turned down during the energy crisis. This is especially true for cold-season crops such as lettuce, broccoli, and cabbage.

There are some things that can be done to improve growing conditions at home. Ardent gardeners often rig lights over the plants to supplement the sunlight. Such lights should be kept a few inches above the seedlings to avoid burning.

One of the simplest ways to get the maximum use of sunlight is to staple aluminum foil to a piece of heavy cardboard and stand it upright behind the seedlings. This will back radiate the sun and help correct the problem of the seedlings leaning toward the sun.

A piece of clear plastic attached to a frame and placed over the seedlings will help increase humidity. The side toward the sun should be left open for ventilation. The leaves will scorch if the tent becomes too hot. Care should also be taken to keep the plastic from touching the plants.

If you decide to start your own frost-sensitive vegetable transplants from seed, DO NOT START THEM TOO EARLY. Tomatoes should not be seeded sooner than 6 to 8 weeks before the last frost in your area. Peppers and eggplants require 8 to 10 weeks to produce good transplants. Frost danger can vary greatly in a relatively small area.

After all is said and done, you'll probably have a better garden if your buy your vegetable plants from a professional plant grower. Good transplants should be bright green with stocky stems. Fruiting crops such as tomatoes should not have any small fruits on them at the time of purchase. Whatever you pay for your plants the cost is very small compared to the total value of the food you harvest.

Hunterdon farmers gather to talk saving farmland

HACKETTSTOWN, N.J. — An overflow crowd of farmers and others related to the farm community jammed the facilities of the USDA office in Hackettstown, N.J. to kick off a study of the "farmland retention" issue.

Under the direction of the State Department of Agriculture, the project is in accordance with recently passed legislation, S-1485, calling for just such a study.

Richard Chumney, Director of NJDA's Division of Rural Resources, and John VanZandt, of the same division, emphasized the importance of obtaining the input and comments from farmers and other citizens during the study process.

In the opening remarks they stressed the need for a program in the state that would assure a degree of permanence to agricultural land. Discussion followed on the positive effects of the Farmland Assessment Act in holding land in agriculture; a report of the pilot project initiated a few years ago to test the Blueprint Commission's proposal to buy development rights on prime farm land.

To gain grass-roots input into the study, the State has been divided into 6 regional areas. Hunterdon, Warren and Sussex counties comprise region #5.

There are 10 representatives and 4 alternates from each of the county boards of agriculture.

Jack Snook, Sussex County dairy farmer, was elected chairman of the Region 5 committee. David Buchholz, Pittstown, was named Vice-chairman.

The time frame for committee study and action calls for tentative findings by late April 1980. Activity will be suspended during May to September while state department staff and consultants assemble and digest findings of the six regional committees, a statewide report will be prepared by October 1980.

The committee has its work cut out for it...to come up with its suggestions, concerns, ideas for a possible farmland retention effort.

Note use of the word 'retention," rather than 'preservation." Interesting! Preservation implies 'keeping as is." No changes. But, for agriculture to be retained, changes are inevitable.

It's going to take a viable, progressive agriculture to farm this land being 'retained."

Issues to be considered by the regional committees in their discussions are listed by NJDA staff as follows:

Non-land factors affecting agriculture in New Jersey right-to-farm, regulatory reform, market development, etc.)

Factors affecting land uses and prices relating to existing and potential farmland (market values, residential development trends, etc.)

Assessment of farmers' attitudes toward farmland preservation.

Assessment of land management-planning techniques acceptable to farmers for inclusion in farmland preservation program.

Method of providing financial resources on a statewide basis to provide compensation and monetary incentives for farmland owners as a complement to the land management techniques.

Recommendations on how the program should be administered after November 1, 1980.

Mettings will be announced by the respective extension service agents.

House subcommittee passes livestock fraud measure

WASHINGTON, D.C. — A House Judiciary Subcommittee has passed an amendment to the federal Criminal Code Reform Act, endorsed by Livestock Marketing Association, which makes it a federal crime to use fraud to obtain livestock, money or both in connection with interstate livestock marketing.

The action by the House Subcommittee on Criminal Justice follows passage of a similar measure by the Senate Judiciay Committee December 3. Both branches of Congress are currently working on the Reform Act, a massive reformation and revision of federal criminal laws.

C.T. 'Tad' Sanders, general manager of the Kansas City-based trade group, said the House action on January 31 "indicates further support for our ongoing efforts to rid the livestock industry of the white collar crooks who prey on it.

"Like the Senate action, the House has called for strict penalties for crimes in connection with livestock marketing. A violation of the new provisions would result in a fine of up to $250,000 for an individual and up to $1 million for an organization, or jail sentences of not more than 80 months if the property is valued at more than $100,000, or not more than 40 months if the property is valued between $10,000 and $100,000."

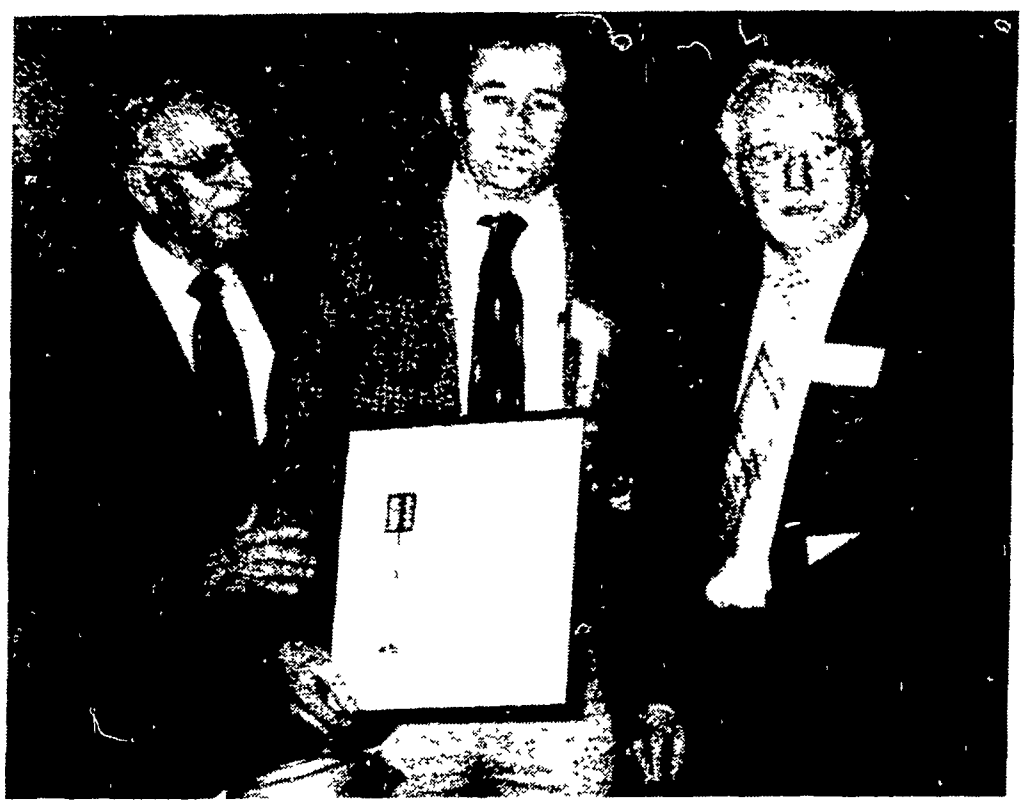
"White collar" crimes in the livestock industry, Sanders said, include numerous types of fraudulent schemes, wrongful nonpayment for livestock, embezzlements, counterfeiting and criminal conversion of livestock, money or both.

"Marketing businessmen around the country welcome this Congressional action, because it recognizes the tremendous financial risk shouldered by the marketing sector every day in an industry that handled about $50 billion worth of commerce in 1978," he said.

Freedom of risk is one element of LMA's "Freedom in Livestock Marketing" campaign, which also includes freedom of enterprise, competition, product and choice.

BUTTER EGGS

N.J. names outstanding farmer



David Kyle, Clover Hill, N.J., accepts Outstanding Young Farmer citation from Secretary of Agriculture, Philip Alampi, left, as Stephen Lee, President of New Jersey's State Board of Agriculture, looks on. The occasion was the New Jersey State Agricultural Convention at Cherry Hill held recently. Kyle breeds and grows out hogs and produces forage and grain crops on his family farm and additional rented acreage.

Tomato plants affected by a sulphur deficiency tend to be smaller and lighter in color than normal plants. Yellowing may occur in various parts of the plant. Leaf shape is not affected, but leaves tend to be smaller and closer together. Petioles and stems will show a marked reddening if the deficiency is severe.

Can you identify sulphur deficiency?

LANCASTER — Soil sulphur deficiencies — already common in many mid-Atlantic and other United States crop regions, and spreading rapidly - too often go unrecognized or misidentified.

The result is limited yields and poor crop quality.

According to the Sulphur Institute, S deficiency symptoms frequently are confused with similar symptoms of nitrogen shortage, and adding more N, P or K will not produce top yields where sulphur is in short supply.

Agronomists advise growers to watch for the following general signs of sulphur hunger:

- Small, spindly plants with short, slender stalks;
- Retarded growth rate and delayed maturity;
- Light green to yellowish color of leaves, with even lighter colored veins. On most plants, this yellowing shows up first on young, upper leaves, while most N deficiencies show up first on bottom leaves.

However, specific symptons vary considerably from one crop to another, as shown in these photos of severe S shortages.

Less serious deficiencies may not be visible, but crop yield and quality will still be affected.

FARMERS!
WEILER BROS., INC.

distributors of IM-PRUV-ALL, custom-blended feed and soil minerals, invites you to learn more about the health of your soil and your animals.

We are presenting a series of programs in March featuring Dr. Ron Wendlandt, Lexington, Kentucky.

MONDAY, MARCH 10

Albert S. Hunter, left, professor emeritus of soil fertility at Penn State, receives Pennsylvania Plant Food and Protectant Educational Society's "Man of the Year" Award from Dale E. Baker, Penn State professor of soil chemistry and awards committee chairman.

Agronomist named man of year

UNIVERSITY PARK — Albert S. Hunter, professor emeritus of soil fertility at Penn State, has been named 1979 "Man of the Year" by the Pennsylvania Plant Food and Protectant Educational Society.

Hunter received the award, a plaque, at the society's recent annual meeting on the University Park Campus as part of the Lime, Fertilizer and Pesticide Conference.

According to Dale E. Baker, Penn State professor of Soil chemistry and awards committee chairman, Hunter was cited for his contributions to the state's plant food industry.

The award recipient, who retired in 1974 after serving 17 years on the College of Agriculture faculty, placed major emphasis on soil fertility, soil moisture, and crop management.

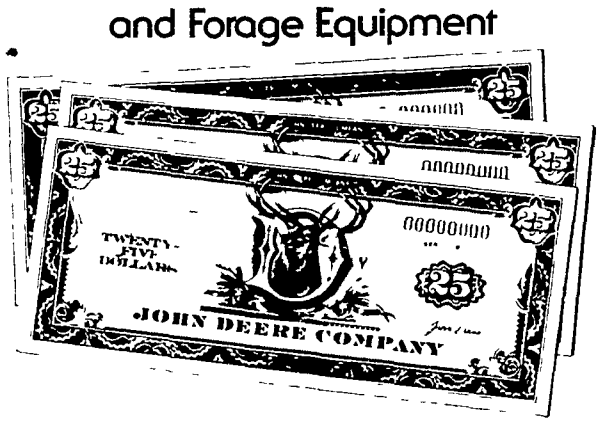
Hunter helped to devise several ingenious machines to accelerate and facilitiate field plot research. He is author or co-author of numerous technical papers.

On sabbatical leave in 1965-66, he served with the IRI Research Institute in Brazil as specialist in soil fertility. In 1972-73, he was in Argentina on a Penn State AID project, teaching soil chemistry, plant nutrition, and soil plant relations in the Graduate School of Agricultural Sciences.

Hunter is a fellow of the American Society of Agronomy and the American Association for the Advancement of Science.

BONUS 1980

Up to $600 bonus buying power for early orders of John Deere Disks, Chisel Plows, or Hay and Forage Equipment



Preseason orders help John Deere plan production of most needed models and sizes So from February 1 through May 31 1980 John Deere is offering impressive bonuses for preseason orders This bonus is above and beyond our best deal to you on this equipment

Your early order qualifies you for $50 to $600 in John Deere money for certain models of disks chisel plows balers mower/conditioners and pull-type forage harvesters Promptly after delivery you ll be mailed your bonus John Deere money to spend for products or services at our store

There s more You ll get price protection from the time you order any machine in the bonus program Use a John Deere Finance Plan and no finance charges will accrue on any machine in the program until the first day of the month which begins the 1980 use season in our area

This early order program includes a list of dozens of disks chisel plows and hay and forage tools But your preseason order must be signed before March 31 to earn the most John Deere money Come in soon check the list and ask us for our best deal on this new equipment

You ll be expected to take delivery of the equipment as soon as it s available

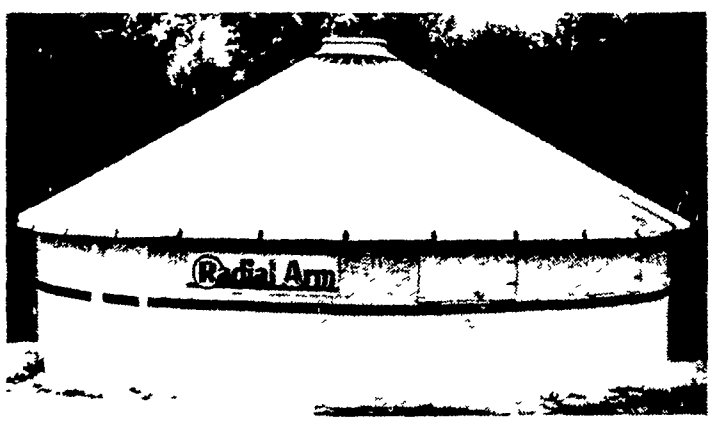
Introducing... Radial Arm™ circular finishing Automated Hog Confinement

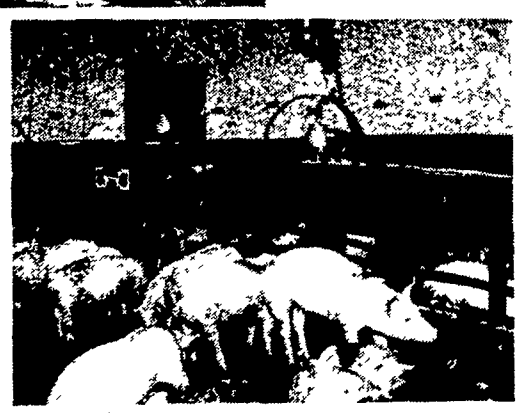


NEW SELF CLEANING HOG BARN 102 Head Capacity

NEW EASY TO CONSTRUCT ROUND BARN-

Base comes in 12 curved sidewall sections One section includes a dutch walk door The other 11 sections can be ordered with or without a 24" x 48" ventilation door, thus allowing you to set up a natural ventilation condition or a total environmentally controlled unit or a combination of the two

The unique circular design of the structure combined with vent doors that swing out (hinged on the side instead of at the top) provides a natural air scoop on one side and a natural air foil on the other side, thus causing air to cross ventilate regardless of wind direction Roof cap on the bin roof can also be manipulated to provide additional natural air movement



CIRCULAR CONED FLOOR is divided in half by Radial Arm Cleaning unit and gate on which feeders are mounted On command motor drives gate around pivot moving manure to gutter Material flows down gutter pushed by scraper paddle into pipe and out of building

The 12 sections can be assembled in about one hour Each section is complete with white painted strong panel steel on the exterior and fiberglass insulation in the wall A fiberglass pig barrier is provided for interior covering and comes in a roll for installation after sidewall sections are assembled thus providing for a seamless interior wall

The assembled sidewall sections are covered by a conventional grain bin roof which is insulated with white polystyrene 3½ inches thick The polystyrene comes in panels and is 100% moisture resistant The panels are installed using fasteners, and will not come down or sag with age It also enhances the appearance of the interior of the barn

SPECIAL INTRODUCTORY PRICE $8,995.00 f.o.b.

Delaware to run stove safety session

NEWARK, De. — Because more people in Delaware are using wood as fuel, and are concerned about the fire hazards and many other aspects of wood burning, a wood stove safety seminar is scheduled for Thursday, February 21, 1980 at 7 p.m. in the Millcreek Volunteer Fire Hall, located at 3900 Kirkwood Highway, Wilmington, DE.

The seminar is designed for interested consumers, especially wood burners and those thinking about using wood as a primary or supplemental source of heat.

Program topics will include basic considerations for the new or future wood burner, safe wood stove installation and operation, wood as a fuel, chimney maintenance and other fire safety considerations.

A wood stove retailer, fire safety instructor, energy official, forester, insurance representative, building inspector, and chimney sweep will share their concern in regards to wood burning. There will also be wood stove exhibits.

The event is sponsored by the Cooperative Extension Service in cooperation with the Delaware City Volunteer Fire Company, the Delaware State Fire School and Delaware Department of Agriculture.

There is no admission charge, but those desiring additional information are asked to call 302/738-2506.

UNDERGROUND LIQUID MANURE SYSTEMS

Potato Growers Co-op to hold 29th annual meeting

STATE COLLEGE — The Pennsylvania Co-operative Potato Growers will hold its 29th annual Potato Growers Institute February 27 and 28.

The meeting will be held at the Sheraton Penn State Inn, State College.

Registration for the Institute and room reservations must be made through the Co-op office, according to Ray Hendrick, Institute Committee Chairman.

Deadline for registration is February 20 for both rooms and meals.

The Co-op address is 25 North Progress Avenue, Harrisburg, PA 17109. Phone number is 717/652-4200.

Schedule for the meeting follows:

WEDNESDAY MORNING, FEB. 27th

8:00-11:00 - Registration - Lobby, Sheraton Penn State Inn
10:00 Welcome - Pennsylvania Co-operative Potato Growers. Noah Kreider, Jr. Welcome - Penna. State Univ., Dean, College of Agriculture, James Beattie
10:15 - Up-Date on Penna. State Potato Research Program .. Dave MacKenzie
11:00 - National Potato Promotion Board - Show and Tell .. Robert Mercer
11:30 - "Where is Potato Production Going?" ..Courtney Burdette
12:00 - Lunch - Election to National Potato Promotion Board Nominee and Alternate (Pa. Grower)

WEDNESDAY AFTERNOON SESSION
Keith Masser

1:30 - Communication between University and Growers .. Dave MacKenzie
2:00 - Factors Affecting Development of Bacterial Soft Rot in Storage .. Arthur Kelman
2:45 - Break
3:15 - Soil Compaction - Cause and Cure .. Donald Daum
3:45 - The Penn. Co-op Potato Growers - Your Helping Hands .. Thomas Lyon
4:00-5:00 Annual Business Meeting - Pa. Co-op. Potato Growers, Inc.
5:30-6:30 - Attitude Adjustment Hour
6:30 - Banquet - Toastmaster: Ray Hendrick, Speaker: Fred Hughes - Agriculture in the 80's

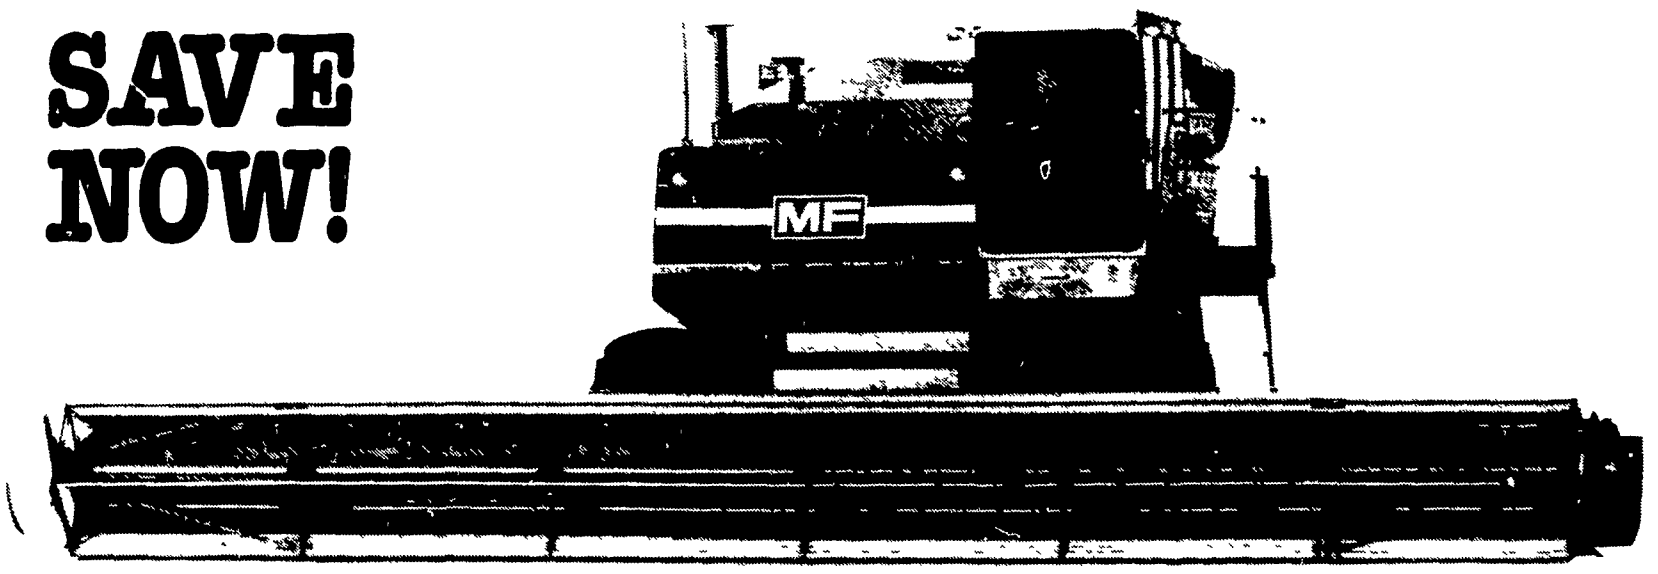
THURSDAY MORNING SESSION - FEB. 28th
Winston Donaldson

7:45-8:45 - Breakfast
9:00 - Understanding Crop Loss Due to Insects, Weeds & Diseases .. Eileen King
9:30 - Update on Penn State University Potato Pest Management Program .. Zane Smilowitz
10:00 - Regional and Local Variety Testing .. Richard Cole
10:15 - Break
10:45 - National Potato Council .. "Eloi Hamre"
11:00 - George Mickalak - Director Perishable Commodities, Weis Markets
11:30 - Review - Questions and Answers
12:00 - Adjourn - Lunch

TRACTOR SAFETY HINT

Install rollbars, fasten seat belts! And stay off slopes if you can't be sure of tractor stability. Same advice goes for dips, gullies and ditches. When going downhill, use lowest possible gear. Space wheels as wide as possible. And wear your seatbelt.

SAVE NOW!



Special factory allowance on MF combines

The factory is giving special allowances on new Massey-Ferguson combines. This means you can get big savings on our crop-saving MF 540 and 550 combines . . . and on the big-capacity MF 750 and 760 models. These savings make our everyday good deals even better!

Step up to the combine leader that can make your high-yield fields come clean. Choose from 37" to 60" - wide cylinders to match your needs. Plus all the features you want to give you the best possible return on your combine investment.

You'll get a better deal than ever now, with our special factory allowances. But you'd better hurry, offer expires May 2, 1980.

Judge subpoenas data in 2,4,5-T hearing

WASHINGTON, D.C. — Administrative Law Judge Edward Finch has ordered University of Wisconsin scientist James Allen to produce documents related to his laboratory studies on the dioxin TCDD.

The judge issued the subpoena despite opposition from the Environmental Protection Agency. Dow Chemical U.S.A. has sought public examination of the subpoenaed data since October, 1979. A company spokesman said Thursday previous Dow efforts to review the data in an "informal and amicable manner" were unsuccessful.

The Allen work appears to be considered crucial by EPA in its efforts to cancel the registration for 2,4,5-T and silvex herbicides, which contain trace amounts of the contaminant TCDD.

The two herbicides were suspended by EPA for forestry, pasture and rights-of-way use on February 28, 1979. A hearing on the proposed cancellation which has already been postponed twice at EPA request, is now scheduled before Judge Finch beginning March 11, 1980.

Dow's Agricultural Products Department general manager, John E. Donalds, said, "Considering the nature of the studies and concern by Dow scientists with the validity of the research, it is of critical importance that Dow and EPA review Allen's study findings before he testifies at the hearing."

Judge Finch said the subpoena, which applies to various TCDD studies conducted in the University of Wisconsin laboratory, was intended "to insure that all relevant material and probative evidence which may be available is brought to light..."

The subpoena directs that all pertinent documents by Allen be made available to Dow by February 14, 1980.

Judge Finch also cited in the subpoena his rejection of a carcinogenicity study conducted by Allen and his associates evaluating TCDD exposure in rats.

He stated: "Based upon an analysis of arguments and documents related to the content and value of this study..any reference thereto in this proceeding will not serve to assist the court in reaching a decision on the merits of this case, since nothing in the study is of such substantive nature as to be probative in any way."

In a pre-hearing brief filed January 25, 1980, Dow requested that suspended uses for 2,4,5-T and silvex products be restored and the cancellation notices for all uses be withdrawn.

Dow's brief cites numerous scientific studies which the company says show that the herbicides and the trace contaminant TCDD pose no unreasonable risks to humans or the environment...including EPA's recently-released study which found no trace of dioxin in milk samples from 103 mothers in areas sprayed with 2,4,5-T.

Berks to run beef sessions

LEESPORT — Two beef programs are scheduled for Februry 18 and 19 through the Penn State extension service.

On Feb. the 19th, a beef feeders session will be held at the Berks County Agricultural Center starting at 1 P.M.

The topics and speakers include: "Feeding for Profits", Lester Burdette, Penn State Extension Animal Scientist, "Extension Programs - Your Aid to Better Management", Clyde Myers, Berks County Agricultural Agent, "Pesticide Recertification", Jim Haldeman, Berks County Agricultural Agent, and "USDA Grading Systems and Their Effect on Your Program", plus "Manage Your Equipment to Economic Gains", Clair Engle, Penn State Extension Animal Scientist.

Also two evening Beef cow/calf sessions have been scheduled, on Feb. 18 one session will be held at the Central Chester County Vocational Technical School and on Feb. 19 another session will be held at Allentown Campus - Penn State University.

Both sessions will start at 7:15 P.M. The program for these two cow/calf sessions include: "Schedule Your Nutrition Program," Lester Burdette, Penn State Extension Animal Scientist, "Extension Program - Your Aid to Better Management", County Agricultural Agents from Chester & Lehigh Counties, and "Wean More Calf", Clair Engle, Penn State Extension Animal Scientist.

For more information on these programs contact the Berks County Penn State Cooperative Extension Service at the Agricultural Cener, 215/378-1327.

Disease regulations topic at NPPC

DES MOINES, Ia. — Future pseudorabies regulation and industry proposals for nationwide uniformity of regulations are topics to be covered in a National Pork Producers Council-sponsored meeting February 18-19 in Des Moines.

NPPC's Dr. David Meisinger, director, research and education, says the meeting is the result of producer requests for Council involvement and guidance in development of future disease regulation.

"Producers are now concerned with problems currently encountered in inter-state movement of hogs between states with varying PRV regulations," Meisinger said. "We also see the need for a nationwide updating of the status of PRV testing, the vaccine and research results."

Meisinger said he hopes the February meeting will be a step towards development of a workable plan for control and eventual PRV eradication with a time table for accomplishment.

State veterinarians from within NPPC's member states, pork producers representatives and university researchers are expected to attend along with representatives of the American Association of Swine Practitioners and personnel of the USDA's Animal and Plant Health Inspection Service.

The two-day meeting will be held at the Sheraton Inn, Des Moines.

Need a farm loan? Bob Badger is the friend to see!

There are no two ways about it: everybody feels more comfortable borrowing from a friend. That's why so many area farmers take their needs to Bob Badger — head of the Agricultural Loan Division of the First National Bank of Strasburg.

Bob is a true friend to farmers. An area native, he grew up among them — and still lives among them today, in southern Lancaster County. He's vitally interested in helping them solve their complex money problems. He's always ready to provide experienced, financial counsel. And he's more than happy to use the Friendly First's *flexible payment schedules* to tailor each loan to the farmer's specific requirements.

So whatever your needs may be — operating capital, livestock, machinery, construction, farm mortgages or estate planning — make it a point to talk with Bob Badger. Because when it comes to a farm loan, he's the best friend you could ask for!

Bill introduced to ease embargo impact on farmers

WASHINGTON, D.C. — Sen. Herman E. Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, Tuesday introduced an eight-point bill to help ease the economic impact of the Russian grain embargo on U.S. farmers.

Talmadge said he decided to move ahead with new farm legislation after hearing Agriculture Secretary Bob Bergland's explanation of actions taken by the Administration to alleviate the embargo's effects and after consultation with other senators and farm leaders.

The Georgia senator said he is not convinced that enough is being done to carry out President Carter's pledge "to minimize any adverse impact (of the embargo) on the American farmer."

"My bill is designed to put farm income up to where it would have been without the embargo," Talmadge said. "Farmers' management decisions concerning what and how much to produce and when to sell were based on growing export markets — but all that is changed now by the embargo."

"While I support President Carter's firm and forceful stand against the Soviet aggression in Afghanistan, I also support the view that farmers have the right to expect that the burden and sacrifices will be shared by all Americans," he said.

Talmadge's bill is drawn from a comprehensive package of legislative proposals that he outlined in a letter to Bergland on January 18. Co-sponsors include Senators Thomas F. Eagleton (D-Mo.), Walter D. Huddleston (D-Ky.), Richard G. Lugar (R-Ind.), David Pryor (D-Ark.), Richard B. Stone (D-Fla.), and Edward Zorinsky (D-Neb.).

The bill would extend price support loan and grain reserve coverage to 1979-crop corn produced outside the feed grain program. Talmadge dropped an earlier proposal that would have authorized the Secretary to establish a feed grain "set aside" in 1980 to reduce corn and other feed grain production.

Instead, Talmadge has urged Bergland to institute, under existing law, a paid diversion program to reduce corn plantings this year.

Another provision of the bill would encourage use of government-held corn for production of gasohol by authorizing its sale for this purpose at 115 percent of the current loan rate, or $2.415 per bushel. In his letter to Bergland, Talmadge had proposed sale of government-held corn stocks for gasohol at the current loan rate. The law now prevents the sale of these stocks for less than 150 percent of the current loan level, or $3.15. Under Talmadge's proposal, only new fuel alcohol production facilities would be eligible to buy surplus corn at the lower price.

The Talmadge bill also contains language to make clear that the Secretary of Agriculture has authority to purchase and handle other agricultural commodities, in addition to grain, that were under contract for delivery to the USSR when the embargo was imposed.

Some 65,000 tons of poultry were among the non-grain commodities halted by the trade suspension.

"I feel strongly that the Secretary of Agriculture should treat all agricultural commodities equitably," Talmadge said. "My bill would make it clear that Secretary has the legal authority to use the Commodity Credit Corporation to deal with all agricultural exports in the same manner as he is handling grain."

Other provisions of the Talmadge bill would:

—permit the making of price support loans on 1979 crop soybeans to producers who did not comply with the normal crop acreage requirement.

—establish a food security reserve of wheat.

—increase the maximum loan that the Commodity Credit Corporation may make for farm storage facilities from $50,000 to $100,000.

—extend the economic emergency loan program for farmers through Sept. 30, 1981, with additional lending authority of $2 billion. This program is scheduled to expire on May 15 of this year.

—require the Secretary of Agriculture, in cooperation with the U.S. Trade Representative, to make a detailed study of the potential for expansion of U.S. agricultural export markets and the use of farm exports in obtaining oil and other natural resources needed by the U.S. from foreign sources.

Nutrition to be topic at Berks Co. Equine Council mtg.

LEESPORT — The newly formed Berks County Equine Council invites all horse owners to a panel discussion on nutrition. The meeting has been set for February 25, 1980 at the Berks County Agricultural Center, starting at 7:30 p.m.

The panel includes: Ron Stuber VMD, Penn National Equine Hospital; Walt Kennett, nutritionist for F. M. Browns Feeds; L. Dwight Schwartz, VMD, Penn State Extension; and James Gallagher, animal scientist Penn State Extension.

The board of directors will bring the audience up to date on the Council's major programs which include: the 1980 Horse Expo; trails in the Blue Marsh Project; Berks County Equine Directory; and upcoming educational events.

The panel discussion will start at 8:00 P.M. and the audience will be given time to ask questions.

For more information contact Irv Evans, Reading, or Clyde Myers, Berks County Penn State Cooperative Extension Service.

Gravity flow does all the work

New slant on milk, manure: tilt the floor, use no power

BY DON CUNNION
Staff Correspondent

COOPERSBURG — Paul Longacre's new stall barn near Coopersburg, Lehigh County, looks conventional enough from the outside. But inside there's a startling difference - the floor is on a tilt. It slopes.

"By sloping the barn floor we've been able to utilize gravity flow for both milk and manure," Paul explains. "As a result, we've cut costs and increased operating efficiency."

The sloping floor idea for the 60-stall barn was designed by John Lapinski, Sellersville agricultural consultant, who says it incorporates some basic techniques used in Europe

Manure flows by gravity through a deep gutter under the floor and out into a lagoon.

At the same time, sloping permits operation of a curb-level milk line instead of the customary overhead system. As an added bonus, a ventilation system that utilizes the under-the-curb gutters keeps odors to a minimum.

"Paul's son, Glen, and I built the forms, poured the concrete and worked out bugs as we went along," Lapinski says. The curb-

Blueprint shows shape of gutters at Paul Longacre's farm. The floor does not pitch to exact center in this barn because of the need to run low-level milk lines out at a certain point. After each of three 8-inch high "dam sets" the floor drops slightly in a straight line. Dams retain fluid to make a slurry of solids dropped by cows above. This aids flow.

New slant

(Continued from Page C26)

level milk line was the work of Lapinski and Larry Eshelman of Longacre Electric Service, Surge dealer in Bally.

To provide gravity flow for the milk, the barn floor slopes gently - one inch to 10 feet - from each and toward the center, where four feeder lines meet two trunk lines going to the bulk tank.

"The low-level line means less vacuum is needed for milking," Eshelman explains.

"The milk doesn't have to be lifted to an overhead pipe. Instead, it just flows downward by gravity. The reduced vacuum means less strain on the animals."

Because the milk line is in front of the cows a self-closing cover was designed to protect the stall cocks.

For manure handling, two specially-designed deep gutters are pitched toward one end of the barn, from where a 30-inch pipe leads to the lagoon. The gutters incorporate some unique features:

First, the gutters vary in depth from 30 inches at the high point to six feet at the low point to provide the needed slope.

They are shaped somewhat like an inverted "V" being 22 inches wide at the top and 32 inches wide at the bottom.

Lapinski explains why: "We made the gutters smaller at the top primarily to save floor space. The wider bottom increases capacity and, at the same time, prevents manure from sticking to the sides."

Every 50 feet the bottoms of the gutters are partially blocked by 8-inch high dams, made of concrete block.

"The purpose of these dams," Lapinski says, "is to hold enough liquid to turn the

manure into a slurry that will flow."

There's been no build-up of solids in more than four months of operation, he says.

"If this should happen, few squirts of water from a hose will take care of it."

Even long hay that got into the gutters accidentally proved no problem," he says.

Extra liquid to help make the slurry is provided by the twice daily cleaning of the grates over the gutters. A large push broom with hose attached is used. This chore takes only 15 minutes twice a day.

The grates are kept free of manure and about a gallon of water per cow goes into the gutters.

With a gravity flow manure system, adequate ventilation is a must, Lapinski says. The one he designed is simple and low cost, yet singularly effective.

A one-horsepower exhaust fan draws air in through adjustable louvres under the eaves of the barn, sucks it across the cows and down through the deep gutters. It is exhausted just above the slurry exit.

During winter, this single fan changes the air in the barn every 20 minutes, Lapinski says, adding that in summer two additional fans will permit a change every two minutes. The writer noted very little odor in the barn during his visit.

Paul Longacre says the barn, made of block with insulated roof, and including the manure system, cost about $100,000. He says he figures he got his money's worth.

"The extra expense of the sloping floor and gutters was just about offset by what it would have cost to install and maintain mechanical cleaners. We don't have to worry about breakdowns or having to replace wornout equipment in a few years.

"On top of that, we're saving on the cost of power to run scrapers," he says.

Paul spent an additional $50,000 for the milking system, bulk tanks and related equipment, plus two new silos — one concrete stave for silage and one airtight for high moisture corn. Both silos open directly into the barn.

Another feature Paul likes is the two-foot wide manger area made of ceramic tile. Paul says its smooth surface is easy to clean and is not as easily affected by corrosion as concrete.

An open house at the Paul Longacre Family farm will be held Monday, February 25, from 10 A.M. to 3:30 P.M.

Directions: On 663 midway between turnpike and 309, at Milford Square, turn north on Allentown Road to Grant Road, then left one mile to first farm on left.

John Lupinsky, left, and Horace Longacre, son of Paul, checks louvres on exhaust fan that pulls odors through gutters and out of barn.

Looking down into the gutter from the barn end, one sees the beginning of the gravity flow system which ends up with manure out in a lagoon. Milk, too, is moved via gravity.

Kramer named 4-H director

UNIVERSITY PARK — Dr. Maurice S. Kramer has been appointed to The Pennsylvania State University's Cooperative Extension Service staff as professor of agricultural studies and state 4-H youth program director, effective January 2.

Dr. Thomas B. King, Penn State associate dean for extension, points out that Kramer is responsible for providing leadership and administering 4-H-youth programs of the Pennsylvania Extension Service.

A native of South Dakota, Kramer received three degrees from Iowa State University; a bachelor of science in physical education, master of education in education administration, and doctor of philosophy in student personnel-education administration.

Since 1969, Kramer served as assistant state 4-H leader at Iowa State University. Previous employment includes teacher, coach, athletic director, and assistant principal for the Ankeny, Iowa, Community Schools, foreign student advisor at Iowa State University, and officer in the U.S. Marine Corps.

As assistant state 4-H leader at Iowa State, Dr. Kramer served on the Extension energy committee, multi-state 4-H television planning committee, ad hoc urban program committee, Iowa 4-H Foundation program committee, national youth worker education project, and national advisory committee for 4-H evaluation and reports.

He was recipient of the Sigma Phi Epsilon Fraternity Alumni Achievement Award in 1970, Epsilon Sigma Phi Service Award in 1978, and Distinguished Service Award from National 4-H Association in 1979.

The 4-H program director is married to the former Martha J. Culbert, of Cresco, Iowa. They are the parents of two daughters.

USDA explains grain reserve program

WASHINGTON, D.C. — Producers who grow wheat, corn, barley, grain sorghum, or oats have complied with the 1979 Set Aside Program, can participate in the Farmer-Owned Grain Reserve Program.

The objectives of the farmer-held, farmer controlled reserve are to insulate 330 million bushels of wheat and 670 million bushels of feed grain from the marketplace.

Through the grain-reserve program, farmers can obtain both short and long-term benefits and counter the price-depressing effects of surplus stocks:

--The producer has received initial return for the grain.

–The producer retains control and ownership of the grain in reserve.

–The producer benefits from all grain price increases.

–The producer receives annual payments in advance from Commodity Credit Corporation to hep pay for the costs of reserve storage.

–The producer eliminates the pressure for future embargoes.

–The producer ensures that the United States will continue to be a dependable supplier of grains to other countries.

–The livestock producer is protected from extreme fluctuations in feed costs.

Grain placed into the reserve is subject to the same storage requirements for quality and quantity as grain in the regular price support loan program. It can be stored either on the farm or in the commercial warehouses.

CCC will make annual storage payments in advance to producers at the rate of 26½ cents per bushel for wheat, corn, grain sorghum, and barley, and 20 cents per bushel for oats.

If warehouse storage is used, the producer must furnish proof that storage has been provided for one year before the advance storage payments will be made.

To help producers storing reserve grain on-farm, the Farm Storage Facility Loan Program has been revised and expanded. Farmers can now obtain a loan from the Agricultural Stabilization and Conservation Service for storage structures for two years' crop production.

Existing storage capacity being used for reserve storage will not count against the two-year production limit.

Loan rates in all Pennsylvania counties except Philadelhpia are· barley, $1.69 per bushel; wheat, $2.45 per bushel; oats, $1.24 per bushel; corn, $2.29 per bushel; rye, $1.88 per bushel; soybeans, $4 43 per bushel; and sorghum, $3.61 per cwt.

The reserve agreement extends the original loan for three years. The farmer agrees not to sell grain in the reserve until national average market prices reach 125 per cent of the then current national average loan rate for feed grains, now $2.63 for corn, or 150 per cent of the then current national average loan rate for wheat, now $3.75.

Once these levels are reached, the producer may repay the reserve loan and sell the grain without penalty. This is known as the release level.

When the release level is reached, producers will be notified by the county ASCS office. Storage payments will stop with the second consecutive monthly release notice to farmers.

When the national average market price reaches 145 per cent of the then current national loan rate for feed grains, now $3.05 for corn, or 185 per cent of the then current national loan rate for wheat, now $4.63, reserve loans will be called.

A producer then has 30 days to repay the reserve loan or forfeit the grain to CCC. This is known as the call level. The call level is not a ceiling over market prices.

After the reserve loan is repaid, the producer is not required to sell his grain. He may hold for higher prices

Producers who decide to sell grain in reserve before the release level is reached pay a penalty. For wheat, the penalty will be at least 140 per cent of the current loan rate times the quantity redeemed. For feed grains, it will be at least 125 per cent.

U.S. Secretary of Agriculture Bob Bergland has announced that he will not allow CCC-owned grain to be sold unless prices exceed the call levels.

"The Grain Reserve Program is a new marketing tool for wheat and feed grain producers," Bergland stated. "If farmers fully use the reserve program and the wheat and feed grain set-aside, they will be able to retain ownership of the grain they produce and take advantage of higher prices."

Bergland continued, "I urge every grain producer to contact their local ASCS officials. Ask questions. Become totally familiar with the flexibility and the substantial benefits this program offers."

Twin Valley gears up for National FFA week

ELVERSON — Members of the Twin Valley FFA Chapter join with nearly 495,000 other FFA members in the United States in celebrating National FFA Week which starts February 16.

Throughout the week the state's 225 chapters are planning activities to support the theme FFA - Preparing For Progress.

The traditions of FFA have held strong and produced a mighty work force for food and fiber to meet the needs of our nation and the world.

Successful agricultural leaders of today are the testimony. Vocational agricultural education is an American success story of Learning by Doing.

National FFA Week always includes George Washington's birthday in observance of his leadership in promoting scientific farming practices. Washington is considered the patron saint of the FFA and has come to symbolize the FFA Treasurer.

According to President Howard Griest, R1 Honey Brook, the Twin Valley FFA Chapter will give placemats to local restaurants, hold local radio programs plus other numerous activities.

Organized in 1928, the FFA promotes leadership, cooperation and citizenship among high school vocational agricultural students. Vocational agriculture education in high school prepares students for careers in agricultural production, marketing, processing and service.

***

Continued strong demand for U.S. farm goods is expected. By 1982-83, foreign demand for grains could exceed foreign supplies by more than 100 million tons.

Berks Equine Council elects directors

LEESPORT — At a recent meeting, the Berks County Equine Council, under the direction of Clyde A. B. Myers, County Agent, took one more step towards its formation by electing a Board of Directors.

Those elected to the five member Board were: Irv Evans, Reading, as President; Mike Kutzmonich, Barto, as Secretary; Luther Eichelberger, Boyertown, as Treasurer; Penny Heist, Sinking Springs, and Dorothy Swavely of Barto.

Myers will represent the county extension as a ex-officio member of the Executive Board.

The purpose of the Council is to promote equine activities in Berks County by informing and educating the public about equine activities, to participate in State and County equine programs and to coordinate program with other equine groups in the State.

One of the projects the Council is undertaking is to work with other equine groups to host the 1980 Horse Expo being held at the Penn State University, Berks Campus on Saturday, March 22, 1980.

Proceeds of the Expo will be donated to the Berks County 4-H Center Equine facilities.

Other projects include the establishment of a County Equine Phone Directory and establishment of trails in the Blue Marsh Dam area.

Membership is open to individuals, clubs or business with horse interest who reside or conduct activities in Berks County.

Membership is $1.00 per year and anyone wishing to join can send their dues to Mike Kutzmonich at R1, Box 467A, Barto, PA 19504. The Council is actively looking for more members.

Berks Farmers' Association passes membership goal

BLANDON — Jack Kooker, president of Berks County Farmers' Association, announced recently that the county membership goal has been surpassed, reaching a new record family membership of 1135. The previous record of 1073 memberships was 62 members less then the new level.

Kooker said the Berks County Farmers' Association is a general farm organization affiliated with the Pennsylvania Farmers Association. One of it's many functions is lobbying for legislation in the intersts of the rural community, Kooker said.

A victory party is being planned to honor the co-chairmen of the membership drive, Harry Shaak, Hamburg, and Jeff Miller, Kutztown, and all membership workers.

Also to be recognized are the many farm families hosting the approximately 9500 visitors turning out for farm-city week this past autumn.

Kooker accredited the significant increase in county membership to the diligent efforts of the membership committee and perhaps more importantly, because more farmers dispite decreasing numbers, are becoming more concerned with the quality of their products and their marketing price. Especially as it is effected by government legislation and regulation.

Elanco to meet

TERRE HILL — The Adult Farmer Program at the Eastern Lancaster County School District will sponsor a meeting to recertify area farmers to use Restricted Use Pesticides.

The meeting will be held at the Union Grove School on Wednesday evening, February 20 at 7:30 p.m.

The law requires persons certified to use the restricted use pesticides be updated every two years.

If it has been over one year since you became certified to use restricted use pesticides, attending this meeing will complete this update requirement.

Those wishing to be updated should bring their old certification card along to the meeting. Also to be discussed are those hard to control weed, insect, and disease pest problems.

All interested persons are invited to attend the Pesticide Recertification Meeting to be held on Wednesday evening, February 20, at 7:30 p.m. in the Union Grove School.

The school is located two miles north of Rt. 23 on Rt. 625.

How to beat BRD in your dairy herd

UNIVERSITY PARK — When a new cow is brought into your herd or your cows return from a show, shipping fever may not be far behind.

The term shipping fever is an old one. It generally describes a respiratory disease that follows a stress such as shipping.

Cattle that are not shipped may contact the disease from contact with carrier animals that are brought into the herd.

Occasionally a respiratory infection breaks out in a herd even though no new animals have been introduced. The name, Bovine Respiratory Disease or BRD, is perhaps a better term to use than "shipping fever."

BRD is caused by a number of different organisms. Viruses and bacteria are both commonly involved.

Three viruses are frequently associated with BRD. They are Parinfluenza (Pi-3), Infectious Bovine Rhinotracheitis (IBR), and Bovine Virus Diarrhea (BVD).

The bacteria most commonly involved are Pasteurella hemolytica and Pasteurella multocida. Several other bacteria are frequently isolated.

To minimize the risk of BRD or shipping fever in your herd this winter:

Avoid buying cattle, especially during the stable season. If you must buy isolate the purchased animals for three weeks before allowing contact with your herd. Treat show-returning cows as new additions.

Maintain adequate ventilation in your barn. Both conventional and loose-housing barns, need adequate air inlets, air outlets and rate of air flow. Even well ventilated barns may have some poorly ventilated spots such as freshening pens or calf stalls.

Have a planned program of vaccinations for your herd. Work this out with your local veterinarian. Most herds should have regular IBR-PI3 immunizations.

Be alert for early signs of BRD: coughing, off feed, eye and nasal discharge. Seek help from your veterinarian for diagnosis and treatment. Accurate diagnosis of the cause of an outbreak are necessary for treatment and control.

Schuylkill fruit session set

PITMAN — The Schuylkill County Fruit Growers Meeting will be held on Tuesday, February 26, 1980, at the Mahantongo Fire Hall, Pitman.

The program will begin at 9:30 a.m. and adjourn at 3:00 p.m.

The program will feature specialists from Penn State and representatives of the Pennsylvania Apple Marketing Board.

For more information or to place reservations, call Dale D. Moyer, County Agent - Agriculture, at the extension office - 717/385-3431.

We Really Want to Be Part of Your Silage Program

When you set your sights on maximum yields and high feeding value choose Funk's G-Hybrids. Others may talk silage quality Funk's-G delivers it. Truly high-test performance Proof of this statement came in a recent silage comparison in Virginia when four Funk's G-Hybrids won the top four rankings Further proof Funk's-G silage hybrids took on all comers in the Pennsylvania Agricultural Progress Days Silage Show. Silage samples were carefully analyzed Then judged . . . considering protein, moisture content, pH, fiber and other factors. Funk's-G won nine years out of 10. That's not bad!

It takes more than tonnage for silage that helps you to maximize milk production . . . or to put on extra pounds of beef in the feedlot. With Funk's G-Hybrids you get dependable ear production that adds energy and taste appeal

Your Hoffman Seed Man can help you select high-performance, high-energy Funk's-G silage hybrids that are right for your management program and maturity area.

Record soybean supplies put pressure on prices

WASHINGTON, D.C. — U.S. soybean supplies this marketing year total a record high 2.44 billion bushels, 20 percent more than in 1978-79. According to the U.S. Department of Agriculture, total soybean use is expected to expand only eight percent to 2.0 billion bushels, so carryover stocks next September may rise to around 440 million bushes — 2.5 times greater than the September 1979 carryover and a new high.

Summarizing the Fats and Oils Situation, economics with USDA's Economics, Statistics, and Cooperatives Service said that the large excess of supply over potential demand resulted in downward pressure on soybean prices.

Prices received by farmers for soybeans declined from $6.35 per bushel in October to $6.06 in mid-January, about 50 cents below January 1979.

Soybean prices have recovered since the Jan. 4 suspension of agricultural exports to the USSR. But if the 1980 South American soybean crops come in at the projected record 19 million metric tons (30 percent more than in 1979), prices may be under pressure again during the spring and summer. World soybeans supplies will be large relative to expanding demand.

U.S. soybean crushings this season are running nine percent ahead of the 1978-79 pace and are expected to approximate 1.1 billion bushels for the entire marketing year.

The December 1979 crush hit a record 104 million bushesl which utilized more than 90 percent of the industry's processing capacity. Increased crushings reflect relatively favorable processing margins, larger hog and poultry production, and heavier soybean meal feeding because of slightly lower meal prices.

Soybeans inspected for export are running four per cent ahead of last season, and for all of 1979-80 may total about 0.8 billion bushels.

USDA's planting intentions survey as of January 1 indicated that about 71.5 million acres of soybeans will be seeded in 1980, about the same as in 1979. However, since the prospective plantings survey was made prior to the President's partial suspension of grain shipments to the USSR, many farmers may alter their final planting decisions. Even so, soybean supplies in 1980-81 probably will be record high mainly because of the record-large carryover expected next fall.

Cottonseed production for the current crop year is estimated at 5.8 million short tons, about 36 percent more than in 1978/79. The sharpest increases were in Texas and California—these two States accounted for 62 per cent of total production and 85 percent of the 1½ million-ton gain over last year.

Crushing capacity may not be adequate to process the big cottonseed crops in the Southwest and Far West, resulting in a sharp increase in carryover stocks next August 1 — possibly doubling last year's 0.5 million tons.

Cottonseed crushings so far this marketing year are lagging year-ago levels by 13 per cent while seed stocks at mills are up over 40 percent. Prices received by farmers declined from $125 per ton in October to $113 in January.

Sunflowerseed supplies are estimated at 3.6 million metric tons, about 90 percent more than in 1978-79. Domestic use is projected at 0.7 million metric tons and exports may rise 50 per cent from last year's 1.4 million tons, leaving carryover stocks of sunflower next September a record — around three-quarters of a million tons.

Exports are running about the same as a year ago and are expected to pickup, while crushings are up 59 per cent.

Heavy supplies pushed prices received by farmers down from about 9.5 cents per pound in October to below 9 cents in mid-January, sharply below year-ago levels. Although Jan. 1 planting intentions indicated that 1980 sunflower acreage will decline about 10 per cent from last year's 5.8 million acres, actual acreage may be higher since prices have shown some recovery since mid-January.

Total production of fats and oils this marketing year likely will exceed 17 million tons — about one-fifth more than in 1978-79 — primarily due to larger edible vegetable oil production and lard. Domestic use of fats and oils is running 2 per cent ahead of the 1978-79 pace and for all of 1979-80 probably will fall well below last year's above-trend growth rate of eight per cent.

Del. slates wood stove seminar

NEWARK, De. — Because more people in Delaware are using wood as fuel, and are concerned about the fire hazards and many other aspects of wood burning, a wood stove safety seminar is scheduled for Thursday, February 21, at 7 p.m. in the Millcreek Volunteer Fire Hall, located at 3900 Kirkwood Highway, Wilmington, Del.

The seminar is designed for interested consumers, especially wood burners and those thinking about using wood as a primary or supplemental source of heat.

Program topics will include basic considerations for the new or future wood burner, safe wood stove installation and operation, wood as a fuel, chimney maintenance, and other fire safety considerations.

A wood stove retailer, fire safety instructor, energy official, forester, insurance representative, building inspector, and chimney sweep will share their concern in regards to wood burning. There also will be wood stove exhibits.

The event is sponsored by the Cooperative Extension Service in cooperation with the Millcreek Volunteer Fire Company, the Delaware State Fire School and Delaware Department of Agriculture.

There is no admission charge, but those desiring additional information are asked to call 302/738-2506.

January Order 4 price pegged at $13.03

ALEXANDRIA, Va. — Middle Atlantic Order Market Administrator Joseph D. Shine today announced a January 1980 base milk price of $13.03 per hundredweight and an excess milk price of $11.35.

The weighted average January price was $12.84 and the butterfat differential for the month was 15.0 cents. The January base milk price was up 12 cents from December 1979 and was 84 cents higher than last January.

Order No. 4 prices are announced for 3.5 percent milk f.o.b. plant location within 55 miles of Philadelphia, and also within 75 miles from the nearer of Washington, D.C. or Baltimore, MD.

There is a 6-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia.

Shine said producer receipts totaled 459.8 million pounds during January, an increase of over two percent from December, and 1.3 percent above last January.

Class I producer milk totaled 256.6 million pounds and accounted for 55.80 percent of total producer milk receipts during the month, up from 53.46 percent in December but slightly below the 56.03 Class I utilization percentage last January.

Base milk accounted for 88.84 percent of total producer milk receipts in January, compared to over 90 percent in December and last January.

There were 7157 producers supplying Order 4 handlers during the month and the average daily delivery per producer of 2073 pounds was up 1.17 percent from December and 3.4 percent above last year.

The average butterfat test of producer milk of 3.79 percent was down from 3.84 percent last January.

Middle Atlantic Order pool handlers reported Class I in-area milk sales of 7.2 million pounds per day during January, an increase of 2.9 percent from December but down slightly from January 1979, after adjustment to eliminate variation due to calendar composition.

RCA meetings to be held

LANCASTER — Interested persons are urged to attend two regional meetings for public participation and comment on the future of conservation programs of the U.S. Department of Agriculture.

The public is being asked to help USDA decide how to accelerate the application of conservation work now administered under its 34 programs.

The meetings are being held under the provisions of the Soil and Water Resources Conservation Act of 1977. Under RCA, Congress directed USDA to appraise the condition of the nation's soil, water and related resources, and to propose programs to guide future conservation activities.

The USDA has set national objectives for reducing soil erosion and preserving prime farmlands; improving water quality; conserving water; improving fish and wildlife habitat, including the preservation of wetlands; reducing upstream flood damages; conservation of energy; and solving related resource problems.

Two of the eighteen RCA regional meetings will be held at the Lancaster Treadway Inn. Both meetings will take place on February 25, one beginning at 2 p.m. and the other at 7:30 p.m.

Adams County apple growers help USDA program

GARDNERS — Local apple growers and packing companies recently participated in the United States Department of Agriculture's Child Nutrition and Elderly Feeding Programs supplying fresh 1979 apples throughout Pennsylvania and several neighboring states.

USDA purchased approximately 382,500 cartons of apples at 40 pounds net per carton, a total of 15,339,000 pounds, for distribution throughout the United States.

Rice Fruit Company of Gardners, Adams County was one of the state's companies which received a large portion of the USDA contract. The apples were to be grown in the United States and bids could be received from growers, cooperative associations, or growers' authorized agents.

Rice Fruit Company contracted for 77,400 cases which included Rome Beauty, Stayman, Delicious and York Imperial apples. Another Pennsylvania company, Mountain Orchard Cooperative, Inc. of Aspers, Adams County, contracted for 3600 cartons.

The apples were shipped between November 16 and January 31, 1980, with most of the Pennsylvania contracted apples shipped to cities in Pennsylvania. A few shipments were sent as far away as Florida, Massachusetts, Texas and Illinois.

Special standards, United States Condition Standards, were employed for this special program. Any loads of apples packed for the program were limited to five percent ripe apples, a maximum of two percent scald and decay and the apples were required to grade a minimum of U.S. number one. Federal Inspectors were on hand at the packing sites to insure quality control.

At Rice Fruit Company, thousands of apples enter the plant facilities, traveling through large troughs of water, to prevent bruising and to remove dirt and dust.

Two dozen sorters pick out the defective apples which may show damage on the outside due to hail, bruises, scars or insect damage.

The apples are then sorted into four colors and twelve different weights in a Electronic Pre-sorter, unique to the East Coast. As they are electronically sorted, the apples drop into 12 different flumes (water alleys ways) according to the apples' classification.

When each flume is filled, the apples are crated and dipped in "stop scald," which prevents storage scald (the discoloration of skin from light to dark, creating a spoiled look). Storage scald can break down to soft scald, creating apple decay.

A tote bin, which holds 16 bushels of sorted apples is stamped, according to variety, grade by color and size.

The apples are then stored at 31 degrees Fahrenheit (apples freeze at 28.4 degrees Fahrenheit). The higher the sugar content, the lower the freezing temperature of the apples. Trucks used in transporting apples for the School Lunch Program are kept at 33 degrees Fahrenheit.

A large building at Rice Fruit Company is utilized for Controlled Atmosphere storage for 28,000 to 30,000 bushels of apples. The room is closed air-tight and the oxygen is reduced to two to five percent or less, for a total of 90 days or more.

The Controlled Atmosphere program is regulated by the Pennsylvania Department of Agriculture's Fruits and Vegetables Division.

Depending on type of shipment, some of the apples will be waxed before entering storage. The Federal School Lunch Program does not require waxing. As apples are removed from storage for shipping, they are again hand sorted for pickouts before entering the shipping cartons. Each case of apple cartons for the Federal Program is individually stamped by an inspector.

Schuylkill sets beekeeping talk

SCHUYLKILL HAVEN — Everyone is welcome to come to the beekeeping program sponsored by the Schuylkill County extension service and the Schuylkill County Beekeepers Association.

Clarence Collison, Beekeeping Specialist from Penn State, will present a program on "Spring Management of Honeybees".

The program will be held Tuesday, February 26, 1980 at 7:30 p.m. in Room 202, Building C, at the Penn State Schuylkill Campus, Schuylkill Haven.

For more information, contact Dale D. Moyer, County Agent, at the Extension Office - 717/385-3431.

The why and how of milk controls

FLEMINGTON, N.J. - When XYZ Cola goes up in price at the supermarket, it's generally accepted. Inflation! Costs of ingredients continue to climb. Costs of bottles, cartons, handling, distributing, merchandising are all on the upswing.

We may grumble a bit, but we pick up a bottle or two and move on to the next item on our shopping list. You can almost count on it being higher in cost than the last time you were in the store. That goes for non-food items as well as food.

Now milk, that's different! We know when the price goes up. We brace ourselves for the stop at the dairy counter. After all we read last week that milk was going up a ½ cent a quart. Sure enough, a gallon of whole milk is up a couple cents from our last shopping trip.

Everyone is kept informed as milk prices increase. And, since milk is such a uniformly accepted and utilized food commodity, just about everyone is affected by changes in its price.

Dairy industry people say that milk is nature's most perfect food. They seem to have the facts to prove it. It's the choice of mothers raising toddlers and teen-agers, and senior citizens concerned about their well-being, to say nothing of the rest of us who enjoy and benefit from drinking milk.

Dairy farmers, those at the "udder" end of the dairy business, don't really like all the publicity that milk price hikes get. They kind of feel its unfair. Their product is being zeroed in on as one of the causes of increased food prices.

After all, they feel the effects of inflation, too. Fuel prices have close to doubled, labor is up significantly, utilities up sharply, costs of feed and supplies all up. It just costs more to produce a gallon of milk. That upward trend goes on and on, it seems.

Why the publicity on milk pricing? Joseph Loh, Chief of Licensing and Enforcement for New Jersey's Department of Agriculture's Division of Dairy Industry reminds us that the division serves not only the dairy industry, but the consumer. The news releases prepared by DDI are aimed at informing local stores of the minimum retail price for whole white milk and also the consumer, making the consumer aware of price changes.

He also says that the milk price minimum has been lowered at times, not just raised.

The Division of Dairy Industry sets the minimum retail price for whole white milk in the state on quarts and gallons. On November 1 the price rose ½ cent a quart. The lowest prices at which milk can be sold at present is 46½ cents per quart, 88 cents per ½ gallon, and $1.70 per gallon.

Woodson Moffett, director of DDI, reports that at this particular time, the price change reflects the prices paid to dairy farmers. And, the price to dairy farmers is a result of strong demand for manufactured dairy products and a tight milk supply situation.

Seasonally, we're in a high fluid milk demand time now. As spring rolls around, we often experience more milk than needed.

The present system reflects supply and demand changes which have been routinely announced since this system became effective in 1972.

There is a move, a hope, that the system will be modified to also take into account changes in cost of fuel, labor and utilities. That's still in the planning stage.

Director Moffett explains the "why" of minimum prices on milk. It's to prevent destructive competition and below-cost selling in the marketplace, he says. And, it's resulted in lower prices in New Jersey compared to those in neighboring markets and other markets in the country.

A few examples - in Boston, gallon price is $1.74. In the midwest, Des Moines, $1.89; Minneapolis, $1.85; Columbus, $1.73. In the south, Raleigh $2.11; eastern Virginia, $1.93.

Compare the value in a jug of milk to most any other beverage. It's still a good buy!

Aerial seeding topic of farm crops program

FLEMINGTON, N.J. — The aerial seeding of cover crops in standing soybeans and corn will be the lead topic on the program, "Field Crops II - Grain," scheduled by the Extension Service for Tuesday, February 19, 8 p.m., in Hunterdon's Extension Center, Flemington, N.J.

Three area farmers will discuss their experiences with rye, annual ryegrass, and hairy vetch as cover crops seeded in September in corn and soybean fields, reports C. G. Wettstein, Hunterdon Agricultural Agent.

The practice is growing in popularity with area farmers in attempting to reduce soil run-off. The seed germinates and begins to grow before the existing crop of beans or corn is harvested.

Once the crop is removed, the cover crop develops rapidly.

Rick Loveless, Dairy and Crop Enterprise Salesman for Agway, will discuss application procedures. Agway was one of several organizations coordinating the aerial seeding program this past fall.

Other subjects and speakers on the February 19 program are as follows: "Field Crop Varieties...An up-date for 1980," Dr. James Justin; "Soil Fertility Research...A Progress Report," Dr. Roy Flannery; and "Controlling Insects in Field Crops - 1980."

A discussion of the production of waxy corn, a variation of field corn sought by corn processors, will be presented by James Johnson, Manager of Farmers Brokerage and Supply Co.

A number of credits for continuing certification will be available for certified pesticide applicators in the agricultural plant category and in Core.

Don't let winter put a freeze on your milk production.

This year don't let your dairy cows get into that usual cold weather production slump. Add Mol-Mix Liquid Feed Supplements to your feeding program.

Mol-Mix is the quality Liquid Feed Supplement that stays in suspension and won't freeze or become too thick even in the coldest temperatures. It is the supplement that helps you keep production up while holding costs in line. Plus you get savings in time and effort.

This winter convert to our liquid concept. You'll be glad you did.

Mol-Mix® liquid supplements the liquid leader

Solid seeding success hinges on management

ST. LOUIS, Mo. — Market demand and efficient production are key to producing a profitable crop.

Strong international demand for soybeans has encouraged farmers to double production of the golden bean in the last ten years. As a result, acreage devoted to soybeans has increased over one and one half times.

The future is bright for soybean demand and farmers are looking for ways to reduce ever-rising production costs. Many are taking a closer look at solid seeding as one way to boost production efficiency.

Growing soybeans in 7-10 inch drilled or narrow rows has been tried for years but, until recently, getting adequate weed control without cultivating was risky if not impossible.

Advances in herbicides, particularly for annual broadleafs, have made control without cultivating more feasible for rising numbers of Midwest farmers.

To help growers answer some of their questions about solid seeding, the American Soybean Association with the support of eight product and equipment manufacturers, sponsored the Solid Seeded Soybean Conference in Indianapolis.

The program teamed researchers from all areas of soybean production with soybean farmers and industry representatives to detail production systems that work and didn't work for them. Representing a cross section of soybean producers, the speakers focused on three areas of solid seeding – management systems, on-farm evaluations and economic considerations.

All agreed that solid seeding is for soybean growers who already have excellent soil and crop management practices. Two factors were deemed for essential for solid seeding success.

WEED CONTROL. Although research has proven that the more equal spacing of soybean plants created by solid seeding helps maximize yields, weed problems must be under control before tackling solid seeding.

Proper incorporation of preplant herbicide is necessary for early control. If weeds are controlled during the first four to five weeks, the soybean becomes very competitive and the canopy will shade out most late-emerging weeds.

Well-timed application of a post-emergence herbicide may be necesary to control broadleafs.

Fields with perennial weed problems, such as johnsongrass, that require cultivation are not candidates for solid seeding.

STAND ESTABLISHMENT. The experts say it's easy to get a good stand – just plant seed one inch deep in firm, moist, nutrient-rich soil.

The challenge comes in modifying secondary tillage operations to have consistent depth control, seed distribution and soil firming. Equipment is available to achieve good results, but each farmer must match the machinery to his situation and get it properly calibrated.

Upping seeding rate slightly when going from 30 inch to narrow rows is often recommended to make up for less uniform planting depth and crusting.

Overseeding can encourage lodging and plant stress but a thin stand closes canopy more slowly and invites weed growth. Experiments with several varieties.

Results seem to show that early maturing area adapted varieties respond best to solid seeding. New semidwarfs appear promising for solid seeded, high-yield environments.

Proceedings ot the Solid Seeded Soybean Conference are available March 1. For this detailed conference summary, send your name and address to: Solid Seeded Soybeans, American Soybean Association, Box 27300, St. Louis, Missouri 63141.

Garden Spot FFA chapter reports activities

LAMPETER — Garden Spot FFA started its Winter season with its annual FFA citrus sale. Members took orders for ten days, selling 1,080 cases of citrus fruit.

The second big event of the Winter was its tobacco sale. The chapter received seventy cents per pound for its tobacco, with the chapter now in the process of stripping it.

The chapter had several award winners this season. Four members, Darrel Dombach, Gerald Garber, James Meck and Fred Musser, received Red Rose degrees. Darrel Dombach also received the Star Agribusinessman award for the county. Two Garden Spot FFA members received the Keystone Degree. They were members Donald Brubaker and Jerry Myer.

One Out of Four

Last year, Americans returned six billion aluminum cans for recycling — representing one of every four aluminum cans manufactured.

YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means CURING without heat. Here's what the talk is all about.

THE GRAIN

Every kernel of grain is alive when it comes out of the field. It is a seed, able to grow because it has the ability to take on moisture. Likewise, it can be kept in a state of preservation by removing the moisture already in it

But by heating the grain to dry it, the seed life is destroyed.

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar

THE SYSTEM

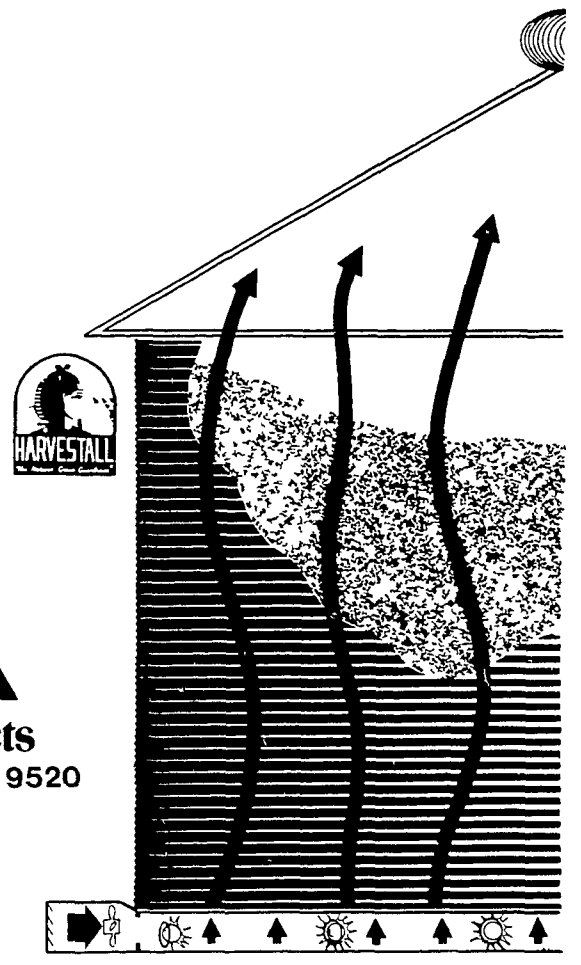
It's simple Grain goes from the field right to the bin. With the unique AIRFRAME™ and AIRFLOOR™ the grain rests on a solid bed that allows maximum ventilation.

Clean dry air is the best curing medium for the grain. GRAINLAMPS™ provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain.

Fans force air under the floor. Rising through the grain, this dry outside air carries away moisture and heat.

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER™, puts nature to work for you. Wind and rising air keeps it turning, venting the system naturally.

A special HARVESTAT™ Control System monitors the curing process. A simple setting controls the GRAINLAMPS™ to make use of free, natural air



Advanced Ag Products
RD 2 Box 174 Elverson, Pa. 19520
215-286-9118

THE FACTS

1. You can't beat Nature. HARVESTALL GRAIN CHILLCURING™ uses the same elements that ripen and preserve grain if left to itself: free flowing air and infra red rays (sunshine).
2. CHILLCURING™ has been tried and proven in 17 states on over 3000 farms. The research is in: CHILLCURING™ WORKS!
3. The CHILLCURING™ system uses only the electricity to power fans and lights, using about 1½ KW hrs. per bushel. Compare that cost to other systems that use increasingly expensive fuels to get disappointing results.
4. The grain goes from the field to the bin and stays there till you need it. Save time and money at harvest with the one step HARVESTALL CHILLCURING™ and storage system.
5. If you're in the market for grain storage, you owe it to yourself to look further into HARVESTALL GRAIN CHILLCURING™.

Northeast farmers honor members, discuss wind power

BY JANE BRESEE
Staff Correspondent

CLARKS SUMMIT — Nearly 100 Pennsylvania Farmers Association members from 12 northeast counties gathered recently at the Kingswood Inn at Clarks Summit for a Regional Membership Rally to celebrate the attainment of 3415 members, a gain of 105 percent over last year's total.

The highlight of the gala occasion was when Jeff Patton, Regional Organization Director, presented the King Pin Award to two men and two women who had obtained 10 or more new members during the membership campaign.

Mrs. Sylvia Bailey, of Wayne County, Mrs. Annette Schucker of Bradford-Sullivan Farm Bureau, Paul Schatz of Columbia County, and Archie Fehnel of Northampton-Monroe, were the recipients of the coveted King Pin which has been awarded to only 400 members in the state in the past several years.

Alvin Myers, PFA Public Affairs Director, the morning speaker, assured the farmers that the Milk Security Fund is the top priority issue for legislation and this year will bring a solution.

Recipients of King Pin Award included front left, Mrs. Sylvia Bailey and Mrs. Annette Schucker; back row left, Archie Fehnel, and Paul Schatz.

Paul Gipe

He reviewed other farm bills currently in the state house and senate including H.B. 725 which clarisifes the Clean and Green Split-off provision to give more protection to the farmers.

The afternoon speaker was Paul Gipe, Environmental Scientist of Harrisburg, Penna., specializing in windpower. He has conducted Seminars at Penn State and has published in the Windpower Digest.

"Windpower is a form of solar energy," he began, "Wind is convected energy generated by the sun."

Windmills were necessary

Fulton Grange plans dinner, opposes milk deregulation

OAKRYN — Fulton Grange No. 66 held their regular meeting February 11, 8 p.m. at the Grange Hall in Oakryn.

Master Thomas C. Galbreath presided at the business session when plans were made to hold the annual roast turkey supper Saturday, April 19. The Women's Activities committee, Mrs. Charles Wallace chairwoman, will be in charge.

Fulton Grange went on record opposing the proposed deregulation of reconstituted milk from Order pricing which would significantly lower the income of dairy farmers and lower the quality of our dairy products.

It was announced that the spring meeting of Lancaster County Pomona Grange No. 71 will be held April 26, 8 p.m. at White Horse Fire Hall as guests of Salisbury Grange. Their annual picnic will be held August 23 at Huffnagle Park, Quarryville, with Colerain Grange hosting.

The Youth committee chairman, Mrs. Clifford Holloway III, reported 18 people bowled February 3rd, and invited the Grange members to attend their code-reading and game party to be held Saturday, Feb. 22nd at the home of Mr. and Mrs. Thomas C. Galbreath, Peach Bottom R1.

The tour committee chairman, Clifford Holloway Jr., announced possible tours considered for 1980 and will probably plan a three-day trip to the New England states and possibly a one-day tour.

It was announced that the Lancaster County Soil Conservation dinner meeting will be held March 20. Tickets may be obtained from J. Everett Kreider.

The Young Marrieds committee chairmen, Mr. and Mrs. Edward L. Zug, were in charge of the program. Mrs. Zug gave an interesting talk on "How To Turn Your Trash To Cash" and exhibited several articles obtained through commercial promotions.

The Zugs conducted the Family Feud game with fifteen people participating.

Mrs. William Taylor, a certified emergency medical technician from the Wakefield Ambulance Association, will present the program at the next meeting, February 25. She will show films on Cardiac Pulmonary Resusitation and the Heinlich Maneuver to relieve choking victims and will demonstrate these techniques.

Produce firm's license suspended

BROOKLYN, N.Y. — The produce trading license of M & L. Fruiterers, Inc., of Brooklyn, N.Y., was suspended by the U.S. Department of Agriculture after the firm failed to pay a reparation award of $20,305.

The department's Agricultural Marketing Service set the award in favor of a New Jersey seller for numerous truckloads of mixed produce shipped in October 1978.

The firm failed to answer the charges, and the department ordered payment of the amount claimed.

M & L Fruiterers, Inc. is not eligible to operate in the produce business under the Perishable Agricultural Commodities Act until the award is paid.

In addition, the firm's officer, directors and major stockholders—George Gelsky and Sheldon Weinstein—may not be employed by or affiliated with any PACA licensee without the department's approval.

All interstate traders in fresh and frozen vegetables must be licensed under PACA, which establishes a code of good business conduct for the produce industry.

The department is authorized to suspend or revoke a trader's license for violating the Act.

Northeast farmers

(Continued from Page C40)

for the settlement of Lancaster County and were as important as the Colt and barbed wire in settling the West. They are still essential in the southwest to pump water for irrigation, he said.

Gipe illustrated his talk with slide pictures of many different types of windmills, some made by individuals and others by experimenters funded from Federal grants. Many of the windmills invented by individuals are already in production and are for sale.

A windmill suitable for an average size farm in the northeast would cost around $15,000, he estimated, with a five year payback. Considerable research and planning must be done beforehand to determine if windpower is feasible in each location, he warned.

PFA directors who shared in the celebration were Fred Tiffany, of Athens, Keith Eckel of Clarks Summit, and Christian Wolff of New Alexandria.

The PFA, with a current membership of 22,217, is affiliated with the American Farm Bureau, the largest general farm organization in the nation.

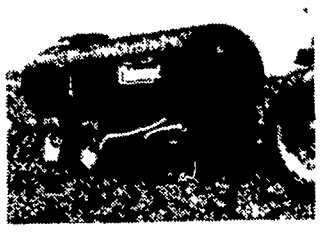
Maybe it's time you switched fertilizer tanks

Switch to a Calumet Liquid Manure Spreader

Compared to today's—and tomorrow s—sky-high fertilizer prices, manure is just too valuable to waste A hundred cow dairy herd, for example, can save thousands of dollars every year in fertilizer costs

Take full advantage of this liquid gold with a Calumet liquid manure spreader teamed with a 4-shank soil injector Injecting can help retain four times the nitrogen that's usually lost with surface spreading—in addition to reducing odor and run-off problems

Calumet spreaders, in



capacities from 1625 to 4500 gallons, are engineered for efficiency and longevity Heavy duty steel alloy tanks are coated with epoxy to resist corrosion Double reinforced A-frames and support skids add strength for heavy loads All Calumet liquid spreaders are backed by a 12-month warranty

Make the best use of the fertilizer produced on your farm with a Calumet liquid spreader and soil injector

Call for information on the value of manure—and some good reasons why you should switch fertilizer tanks

Delaware to run small farmer workshop

MIDDLETOWN, Del. — Farming a few acres can be fun and profitable if you know how to go about it properly. A workshop will be held Tuesday, February 19, at 7:30 p.m. at the Middletown High School for New Castle County residents who live on small farms and are interested in making them more productive.

Its purpose is to help these folks become better acquainted with some of the agencies in the state which can help them in their farming efforts.

The workshop is being sponsored by the Soil Conservation Service, Agricultural Stabilization and Conservation Service, State Forest Service, Farmers Home Administration and the Delaware Cooperative Extension Service.

After meeting with senior officials from each of these agencies, the workshop will break up into small discussion groups on the following topics.

Soil conservation and soil improvement;

Income from your forest;

Growing Christmas trees;

Growing small fruits and vegetables;

Livestock management on a few acres;

Beekeeping.

Each session will be led by a qualified person who will discuss in general terms how a small farmer might be able to improve his or her income in terms of that particular topic. The idea is not to give detailed information, but to stimulate interest and to show you where you can get further help if you need it.

The workshop is free and open to all interested individuals.

Brode honored with highest award

CUMBERLAND, Md. — Howard Brode, Cumberland, Md., a Meat and Poultry Inspector for the Maryland Department of Agriculture's Office of Animal Health and Consumer Services, has been awarded the state of Maryland's highest employee award, The Silver Certificate.

Howard Brode

Working in the Allegany and Garrett county areas of Western Maryland under the supervision of Franklin D. Custer of Oakland, Brode was cited for his "outstanding ability in both the slaughter and process areas of meat and poultry inspection."

It was also noted that "his attitude is excellent and he takes great pride in his work and is a truly outstanding inspector in every sense of the word."

He has been cited for his superior performance many times by his supervisors and by the Maryland Secretary of Agriculture.

Brode has been a Meat and Poultry Inspector with the state for the past 11 years. He is married and the father of a daughter. The family resides in Cumberland.

Cecil Co. to hold Dairy/Agronomy Days

COLLEGE PARK — The Cecil County Cooperative Extension Service announces two winter meeting dates.

On Tuesday, February 19, there will be a Dairy Day held at the Calvert Grange Hall beginning at 9:30 a.m.

Joseph Manspeaker, D.V.M. from the University of Maryland will give dairymen some pointers on raising replacement heifer calves for their milking herds. He will outline herd health tools that will make raising heifers easier and better. The causes, prevention, and treatment of mastitis will also be on his list of topics.

Robert Lidums, attorney, will discuss the pros and cons of reorganizing a farm operation. He has had experience working with farmers in setting up partnerships, incorporating, or retaining sole ownership.

Lee Majeskie, dairy specialist, from the University of Maryland, will wrap up the day by leading a panel discussion on various management practices. Panel members will include Joe Ayres, Billy Kilby, Sam Orr, and Ronnie Underwood.

Agronomy Day will be held on February 21 at the same location.

There will be a presentation on the Little North East Watershed project by Dave Wilson, Soil Conservation Service and Mollie Ivins, Agricultural Stabilization and Conservation Service. They will also provide an update on water quality management.

Trooper Rudy from the North East State Police Barracks will discuss the laws and regulations for farm truck licensing.

Other speakers will include: Allan Bandel, no-till; John Gird, gasohol; Lester Vough, alfalfa management; and Norman Collins, energy used for various tillage systems.

USDA proposes changes in act

WASHINGTON, D.C. — Proposed changes in regulations governing the Agricultural Foreign Investment Disclosure Act--which would alter the reporting requirement for foreign investors--were announced Monday by Ray Fitzgerald, administrator of the U.S. Department of Agriculture's Agricultural Stabilization and Conservation Service.

Fitzgerald said one change would raise from five to twenty percent the aggregate foreign interest in a company that would constitute "significant interest or substantial control," and make clear than when regulations refer to a "combination," they mean only a group of individuals or governments who are acting in concert.

The other change would generally exempt all agricultural, forestry and timber land not exceeding 10 acres in the aggregate from reporting requirements.

However, if products grown on these under-10-acre tracts yield annual gross sales of more than $1000, the land must be reported to ASCS, Fitzgerald said.

Comments should be addressed to the administrator, USDA-ASCS, Room 218-W, P.O. Box 2415, Washington, D.C. 20013.

PENN STATE TESTS PROVE AGRISPON WORKS IN PENNSYLVANIA

AGRISPON is a non-toxic, biological soil inoculant that converts nitrogen from the air into nitrate nitrogen in the soil to supply crops with most or all the nitrogen they require for growth and maturation. In addition, AGRISPON multiplies the life in the soil, helps build humus and improves the root structure of plants.

In 1977, the Pennsylvania Fertilizer, Soil Conditioner and Plant Substance Law was passed by the State Legislature. As a result of this Act, AGRISPON and other products were tested by Penn State University to determine their effect on Pennsylvania soils. Below is an outline of the results from these tests conducted in the years 1978-79.

LABORATORY EXPERIMENTS Lab studies conducted by Penn State confirmed that large numbers of viable aerobic micro-organisms were present in AGRISPON. Several nitrate studies on AGRISPON were statistically analyzed and showed that the increases produced by AGRISPON were statistically significant. Results from repeated experimentation showed:

- ★ AGRISPON treated samples increased 31% and 43% in nitrate-nitrogen levels in just 6 days.
- ★ AGRISPON increased nitrate-nitrogen 44.3% and 78% in 15 days.
- ★ AGRISPON increased nitrate levels 33% in lab samples, but showed a slight decrease in soils which had been treated with sewage sludge.

GREENHOUSE EXPERIMENTS - A study using orchard grass on 20 Pennsylvania soils showed that in 14 out of 20 soils, AGRISPON treated samples yielded better than the untreated samples. The overall yield increase was 6.2%. Where nitrogen was used in addition to AGRISPON, the AGRISPON treated plots yielded 3.9% greater than nitrogen alone. In a test on beans, AGRISPON increased the dry weight of the bean samples. Agrispon also increased the average height of the beans.

FIELD TESTS - There was an 11% increase in grain yield where one application of AGRISPON was applied. Side by side, plots showed an increase of 26% in protein where AGRISPON was used. The second application was never applied as it was supposed to have been. The plots were not limed and had a PH range of 5.2 to 7.3. Plots had previously been used for testing the effect of sewage sludge and were not uniform in crop history.

On another side by side plot, AGRISPON treatment showed a 21% greater soil nitrate-nitrogen level and 23% greater protein in the corn.

The above data taken from published and subpoenaed material from Penn State University.

Swine producers oppose labeling regs

DES MOINES, Ia. — Top priority issues of concern to the nation's pork producers were the subject of three days of Congressional visits by over 170 pork producers taking part in the annual Pork Producers Washington Seminar, sponsored by the National Pork Producers Council.

The producers, representing 31 states, called on their respective delegations to authorize and fund a National Academy of Science review of nitrites in food curing, and for voluntary, rather than mandatory nutrition labeling.

Council spokesman said NPPC opposes listing suggested nutrients on all labels, especially cholesterol content by percentage, which could well mislead consumers and create unnecessary concern over products so labeled.

The Council also asks that labeling of imitation and or substitute food products be accurate and free from labeling that would "trade unfairly" on generic products. NPPC representatives say they are concerned, too, over the increased food costs to consumers resulting from the present proposed labeling regulations and legislation.

In the area of dietary guidelines, recently released jointly by USDA and HEW, the NPPC expressed continued concern on aspects of the guidelines.

"The most recent guidelines take a more realistic and positive approach to U.S. eating habits because they recommend a balanced diet and eating in moderation instead of singling out a specific food or food component as dangerous," says Chris Herbert, NPPC Director, Nutrition Services, "However," she says, "the guidelines continue to implicate animal products in heart disease without scientific evidence in agreement on this issue. NPPC feels each person must assess individual health needs and act accordingly."

Pork producers, concerned over possibility of entry of African Swine Fever into the U.S. and spread of the disease by garbage feeding of hogs, have called on members of Congress for support of legislation prohibiting garbage feeding of hogs except when done under a strict control/inspection system.

A four-member NPPC study team has recently returned from a three-country tour to Puerto Rico, the Dominican Republic, and Spain. They told producers that their observations show spread of ASF linked to meat from infected or carrier pigs and that meat scraps in garbage fed to swine is a vehicle by which ASF gains entry into countries previously free of the disease.

"This situation emphasizes the extreme importance of strict controls on garbage feeding programs," says Dr. C. Donald Van Houweling, NPPC's director of government affairs, and a member of the study group.

Van Houweling noted that his group was impressed with efforts underway in Puerto Rico to prevent introduction of the disease from the Dominican Republic, and with Dominican Republic moves to eliminate ASF there.

"Unfortunately," Van Houweling continues, "there is little evidence of such effort in Haiti, and presence of ASF in Haiti continues to be a threat to both Puerto Rico and the Dominican Republic as well as the U.S. as a result. Spain is apparently content to live with ASF, a disease prevalent there for 20 years."

NPPC is presently supporting ASF legislation drafted by Illinois Congressmen Madigan and Findley and will be working with the USDA, AID and other agencies to support programs designed to eradicate ASF where it exists and to strengthen efforts to prevent spread of the disease.

Washington seminar participants also gave support to continued moves calling for positive action on an NPPC-American Cyanamid petition to the FDA for increasing the interim tolerance level for sulfa residues in swine while current studies are continuing.

Family flocks earn

UNIVERSITY PARK — Housewives and mothers are turning back to a cookie jar full of egg money. A family flock of 100 laying pullets, if managed well, can earn $1,000 a year banking money over and above all costs as net return to labor and management, according to Herbert C. Jordan, Penn State poultry science specialist.

"The Secret" is if well managed; which means they select the bird with the best genetic potential. After this you keep the bird in an environment where temperature varies only between 56°F. and 80°F. and fresh air is available constantly.

The pullet must be cared for every day and fed a nutritionally adequate diet or laying ration.

If the lady of the house does everything right and each pullet lays 280 salable eggs during the year and if she gathers, processes and markets all eggs at her kitchen door for a dollar a dozen she may have $1,000 at the end of the year to spend as net return to labor and management.

To learn how all of this is done, send a check made payable to: The Pennsylvania State University in the amount of $6.50 (plus 25 cents postage). Ask for Correspondence Course No. 92, POULTRY KEEPING; address your request to: Box 5000, University Park, PA 16802.

Livestock marketers ask hearing on P&S review

KANSAS CITY, MO. — Livestock Marketing Association has called for public hearings on the issues raised by a proposed review of existing regulations and policy statements under the Packers and Stockyards Act.

Specifically, the Kansas City-based trade organization said it wants hearings on existing regulations and administrative decisions which:

Prohibit a dealer or marketing business from having an ownership in, or to participate in the management of, a meat packing or processing business;

Prevent a custom feedlot from being part of a meat packing or processsing business;

Create "doubt and confusion" over legitimate business conduct in livestock production, feeding and marketing which "U.S. Department of Agriculture officials like to generally stamp as 'conflicts of interest' that are illegal."

LMA's comments came in response to a "plan for review" of existing Packers and Stockyards regulations and policy statements which was announced by USDA last December.

In that announcement, regulations and policy statements were placed into three categories: sections "which are not believed to need review at this time;" sections proposed for deletion, and sections proposed for complete review.

However, LMA's statement filed with the Department said the trade group does "not accept as valid or conclusive the three categories ... these are no more than self-serving assumptions of the agency

LMA pointed out the federal Office of Management and Budget "prompted and directed" a review of all existing regulations and policy statements.

LMA went on to note that its "Freedom in Livestock Marketing" campaign "is in sharp contrast to controls, regulations and restrictions," and called upon USDA to adopt "a realistic policy of freedom, self-determination and independence throughout all elements of the livestock marketing sector."

Such a policy should be implemented, the statement said, "by cancellation of those devices, regulations and policy statements which impose the restrictions they do on diversification, multiple ownership and marketing enterprise throughout the entire livestock and meat industry."

The "Freedom" campaign was instrumental in the 1978 deregulation of livestock marketing rates and tariffs. This year the campaign has endorsed legislation dealing with livestock marketing fraud that has been passed by committees of both the U.S. House of Representatives and the U.S. Senate.

LMA's Washington Executive Counsel and its Kansas City law firm are also filing statements on the proposed review.

Noting that the proposed review "is of deep and far-reaching industry importance and significance," LMA said it hoped the proposal would "not submerge in a sea of administrative platitudes and inane self-serving meaningless statements, with results in the same vein."

Public hearings are necessary "to fairly and equitably resolve the issues raised "on a fully democratic basis," the statement said.

LMA furnishes commercial services to over 1,500 businesses in the marketing sector throughout the U.S. and Canada.

Mechanical tomato pickers show profit

WOOSTER, Oh. — The economics of mechanically harvesting processing tomatoes continues to be very favorable, according to Dale Kretchman, of the Ohio State University's horticulture department.

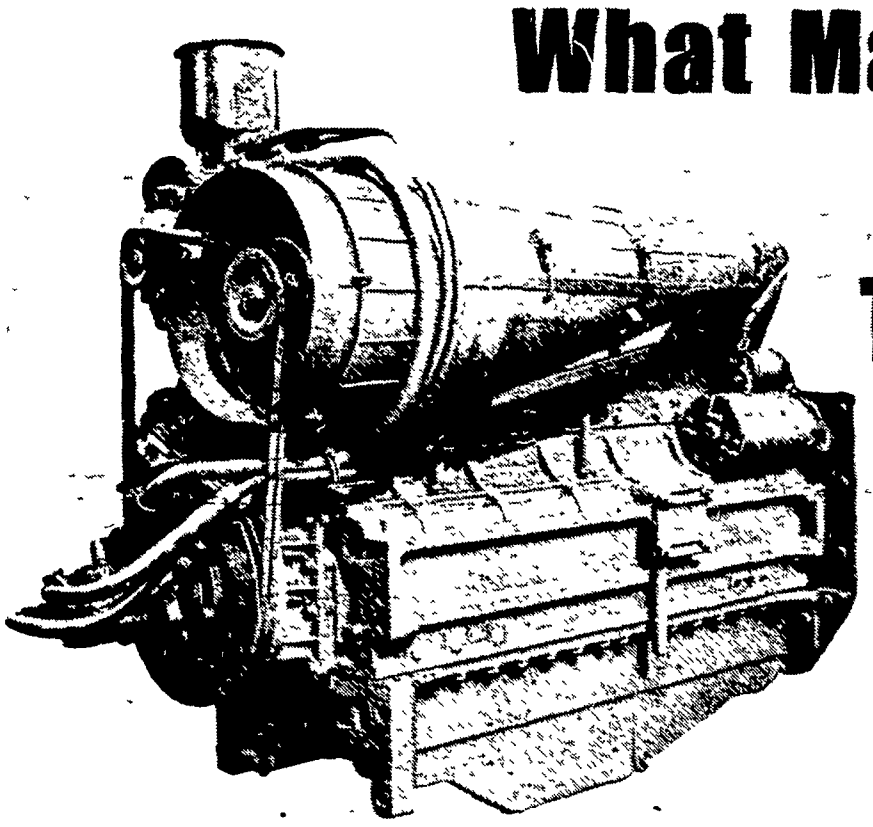
Recent technology changes in the use of ripening materials, better varieties, bedding practices, and machine adaptations have caused the economic feasibility of mechanical harvesters to continually improve.

Some of the negatives expressed by people involved relate to the high cost of machines, the potential risk of leaving acres unharvested in case of a wet season, the need for a minimum of acres or tons for spreading overhead costs and the need for lengthening the harvest period.

An extensive economic feasibility study was conducted in 1970 and 1971 by the Agricultural Economics and Rural Sociology Department of Ohio State University. It was determined then that the machines could make a profit.

Since that time interested farmers, processors and researchers alike have kept a keen eye on the objective of continued improvement in management practices, Kretchman concluded.

What Makes SAME Tractors Better?



The SAME Air-Cooled Diesel Engine

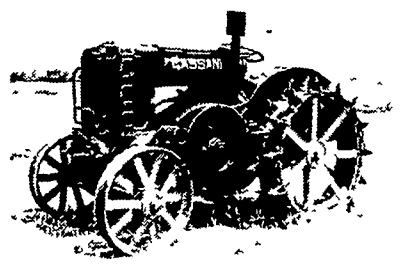
2, 3, 4, 5, or 6 cylinder inline diesels provide 35 to 140 h.p. for the 21 models of SAME 4 WD and 2 WD tractors.

These fuel-efficient engines have double (air and oil) cooling systems and have direct fuel injection from camshaft operated pumps for easier starts, reliable performance and lower fuel consumption (up to 40%).

Being air-cooled, there is no radiator, hoses, thermostats, water filters . . . no water pump, no anti-freeze . . . no boiling, no freezing . . . so about 40% of the down-time problems connected with liquid cooled engines are eliminated. You benefit by lower original cost, lower operating and maintenance costs, faster warm-up to most efficient operating temperature, and longer engine life . . . to name a few.

Cylinders and heads are individually replaceable and all vertical parts are interchangeable. This means faster, easier servicing and maintenance as well as fewer parts to stock.

Of course, the engine is only part of the story . . . see your **SAME** dealer to check out, test drive and learn about all the special features that **SAME** offers . . . **including a limited 2 yr./3000 hrs. warranty and a surprisingly low price tag.**



SAME built the first full diesel engine farm tractor in 1927 Today every SAME tractor is powered by a dependable economical SAME air-cooled diesel engine

SAME was first with a 5-cylinder diesel engine in a tractor It powers the Panther 95 (shown) and the Jaguar 95

Six national FFA officers tour Japan

ALEXANDRIA, Va. — The six National Officers of the Future Farmers of America (FFA) will return tomorrow from their now-annual international tour of Japan. For the second time in as many years, the trip was funded by Mitsui & Co., Ltd., a large Japanese trading firm.

The young officers visited businesses and industries, the American Embassy, farms and a high school vocational agricultural department. The trip was made possible by the full sponsorship of Mitsui through the National FFA Foundation.

"I'm anxious to look at the Japanese education system to see how vocational agriculture and the Future Farmers of Japan fit into the overall program," said National FFA President Doug Rinker before they left. "With such a small amount of land to use for production agriculture, they must have very efficient methods. I'm interested in how they educate young people to that end."

The purpose of the tour was to visit businesses and industries that provide essential support for FFA programs. This year's international tour provided insight for National Officers into the trade relations between the U.S. and Japan. The officers received a close look at the U.S. high school and vocational system.

"I don't think we can leave our students' education about international agriculture to chance," said Byron Rawls, National FFA Advisor. "This is a small world with all of us being interdependent and it is very important that we educate our young people to this fact. They need exposure to other countries and other countries need a positive exposure to us."

While in Japan, the group toured Tokyo, visited the Tokyo Wholesale Market and attended a briefing at the American Embassy with representatives from the American Soybean Association and U.S. Feed Grains Council. The officers also visited Mitsui & Co. headquarters and the Mitsui Soybean Processing Plant in Kobe. Other scheduled visits included Tajima High School and Tajima FFJ (Future Farmers of Japan), a beef farm and transportation via the Hikari bullet train. Another visit took in the Toyko Horticulture High School, headquarters for the National FFJ Association before the trip concludes with sightseeing tours of the Kubota Tractor Company and several supermarkets associated with Mitsui & Co.

Government releases guidelines for healthier humans

ASHINGTON, D.C. — retary of Agriculture Bob gland and Surgeon eral Julius B. Richmond he U.S. Public Health vice Monday announced ary guidelines which, said, if followed, could rove American eating its and maintain health.

fficials from USDA and W released seven dietary mmendations with sup- details which represent utritional consensus by ntists in the govern- t's food and health agen-

The recommendations are:

Eat a variety of foods;

Maintain ideal weight;

Avoid too much fat, saturated fat and cholesterol;

Eat foods with adequate starch and fiber;

Avoid too much sugar;

Avoid too much sodium;

If you drink alcohol, do so in moderation.

The guidelines booklet, "Nutrition and Your Health; Dietary Guidelines for Americans," contains details and explanations of what is known about the relationships of specific dietary components, such as fat, sugar, sodium and cholesterol, to specific dieseases and physical conditions.

Secretary Bergland said, "People constantly ask me, me? Will I be healthier if I eat more of something or less of something else?' Americans are clearly interested in good nutrition and concerned about how and what they eat will affect their health.

"For a long time we had nothing but conflicting statements from a variety of sources. Now the scientists of USDA and HEW are making recommendations based on an emerging consensus within the scientific community.

"We're not telling people that there is one ideal diet or a nutritional insurance policy that will keep them healthy," Bergland said. "These are general recommendations and within them individuals make their own choices from a variety of foods."

"In an affluent society such as ours, more is not always better," Richmond said. "The problems of our nutrition relate to our abundance. There are still people in our society who do not have enough to eat, yet the greatest problem for all of us is to make intelligent and informed choices about what foods we should eat to promote our own health and prevent disease, regardless of our income.

"The problems of heart and blood vessel diseases, tooth decay and obesity can be traced to our diets," Richmond said.

"Recent evidence indicates that even some cancers may be related to diet. Improved nutrition will not eliminate these diseases; however, the nutrition information in the guidelines which are based on the best scientific judgement we are able to get now may prevent further public disregard of the importance of a good diet as a first line of defense against disease."

Esther Peterson, special assistant to the President for consumer affairs, also participated in making the announcement.

She said: "Although we cannot say for sure that if you don't eat some particular thing you won't get this or that disease, we can say that following these guidelines can keep you healthy or even improve your health."

The dietary recommendations were developed after scientists reviewed the present knowledge of nutrition and recent scientific findings on the diet-disease relationship.

"The guidelines developed by scientists at USDA and HEW give the public consistent and substantiated nutrition information," Bergland said. "With them, people can make reasonable and confident decisions in selecting the best foods to fit their nutrition needs."

Copies of the guidelines may be obtained free from: Office of Governmental and Public Affairs, USDA, Washington, D.C., 20250; state cooperative extension nutrition specialists at land grant universities; or public health nutrition directors in state departments of health.

You don't need fad diets to shed pounds

UNIVERSITY PARK — Even for the most well-intentioned dieter losing weight is never easy.

But, instead of a fad, crash diet, Louise Hamilton, extenison food scientist at Penn State, recommends a slower, steadier approach.

Set short-term goals for losing weight, regardless of how much you want to lose. Even if you want to knock off 75 pounds, your final goal is so far in the future that you will probably get discouraged. Short-term realistic goals – losing five or ten pounds at a time – will give you a boost and help you stick with your diet.

For a two-prong attack on your weight, step up your activity to help burn up extra calories. Jump rope, jog, swim or hike. You will burn your body's fat while saving fuel if you walk instead of drive or climb the stairs instead of riding an elevator.

Drink a glass of water before meals to dull the appetite.

Bake or broil your meat or fish. Avoid fried or deep fat fried foods.

Eat slowly, with friends or family, and pause between small bites. Set the fork down after each bite.

Season vegetables with herbs and spices instead of butter or margarine.

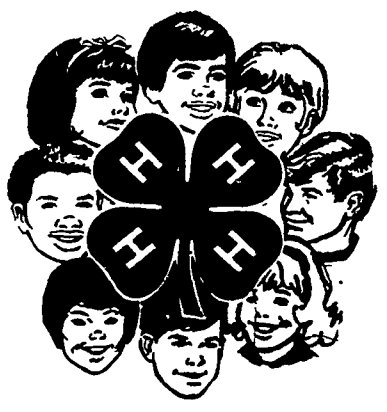
For desserts, choose fresh fruits or canned fruits packed in their own juices. Hamilton notes that more canned fruits are packed this way in response to consumer demand.

Use small sized plates to make small portions seem larger.

Before going to the grocery store make a list and shop only from the list. Never grocery shop on an empty stomach.

Try to eat fairly regular meals. When you plan to eat out, save up calories and pre-plan what you will eat. Keep busy so boredom won't prompt between-meal snacking.

If you overeat one day, don't give up. Cut down the next day, says Hamilton.



Our customers report the following -

BETTER STANDING CORN.

MORE PROTEIN AND FEED VALUE IN THE CROPS.

COWS EAT CONSIDERABLY LESS FEED AND AT THE SAME TIME PICK UP IN MILK WHEN ABRUPTLY CHANGING OVER TO ORGANIC GROWN HAY.

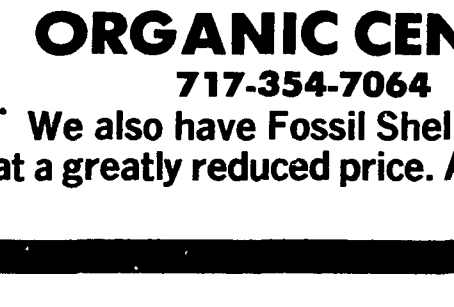
BREEDING TROUBLES ARE MUCH LESS.

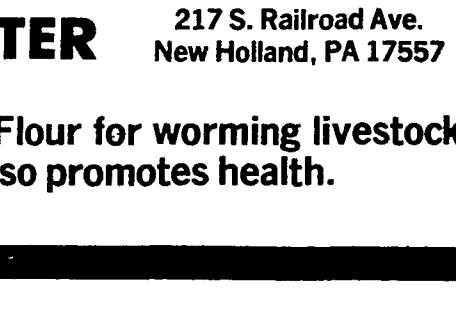
125 bu. oats per acre with no fertilizer except seed treatment and lime. Much less or no bugs and diseases. Bugs are scavengers. They don't like healthy crops. Our Organic Program really works. It's natural. That is why. BX soil bacteria gets better nitrogen out of the air than most farmers buy at a high price. Better yields with half the fertilizer bills.

Only Soft Rock Posphate and BX has made outstanding yields. It is the answer for livestock farmers who have plenty potash. The phospate is only $80 per ton plus spreading or $90 in bags. Ask for special bulk prices dumped in your barn for mixing with manure. It is a great combination. One enhances the value of the other.

All our products should be applied early to condition the soil. They do not deteriorate over winter.

PREVENT THIS





with our greatly improved liquid soil conditioner called National Ag Soil Treatment. It breaks the hard pan, mellows top soil and subsoil and lets the water down, often times in a month. Applied in the fall will let you plow earlier in the spring. Aerated soil is also warmer, better germination. Some say they can plow in a higher gear. Carries a money back guarantee if you can't see results, and the price is much cheaper per gallon than it's predecessors. $48 per gallon treats 10 acres. We are distributors, looking for dealers in other areas. Results are so fast, definite and obvious that it will sell easy very soon.

Ask for literature on all products and program. We test soil at the shop. Pull your samples early. We want to see you get the big crops which our program is capable of producing.

Boop	7-1	338	26,870	1051

THE LONGACRE HERD was established by David's father on Canadian blood lines featuring tremendous body capacity. By skilled breeding, management and feeding, David and Virginia have developed these cow families into one of the area's outstanding herds. During the past year, this 100% registered herd, containing many cows sired by Heatherstone Lucky Typeblazer, had 45 lactations over 20,000 lbs. milk. We expect more high production from the DA-GINA herd in the future.

WE ARE PROUD of our customers fine cows, skilled management and achievements. Records such as these are a source of pride to us. We are pleased with the part that BROWN'S FEEDS and FEEDING PROGRAMS had in helping to attain these records. We shall continue to give farmers the best quality feed and nutritional service possible.

Delaware Ag College dean says

We've taken land for granted, now we must preserve it

DOVER, Del. — Prime agricultural land is the backbone of our strength as a nation and it's time we did something to protect it, Donald F. Crossan, dean of the University of Delaware's College of Agricultural Sciences told a gathering of farmers, developers and government officials at a recent extension-sponsored land use conference in Dover.

"We've always taken our farmland for granted," said Crossan, "but there's a growing awareness that this natural resource is being eroded."

Perhaps the oil crisis has finally caused us as a nation to realize that there's a limit to certain resources, he continued. We're just beginning to realize that the time could come — within our own children's lifetimes — when Americans can no longer boast of having the cheapest, most abundant food supply of any country in the world.

It's staggering to imagine what such a decline in our agricultural productivity would mean — the impact on food prices, U.S. purchasing power abroad, and our nation's general position as a world leader — if no major advances are made in food production to counter the loss of agricultural land, he said.

Why worry about this now when we're already producing surpluses? he asked.

Don't we have agricultural experiment stations and extension services that are the envy of the world in the way they seek out and use new production knowledge to further boost yields?

During the past decade, said the ag college dean, we've suddenly become aware of the apalling rate at which productive land across the country is leaving agriculture each year.

Nearly four-fifths of America's available cropland is already being farmed. When that last 20 percent is cropped, we'll have reached the limit of this resource.

In 1974 when corn and wheat stocks fell dramatically in the U.S., food prices jumped, as did the world demand for food. And people suddenly started looking at the rate at which we were losing cropland.

An important fact emerged: between 1967 and 1975, about three million acres of rural land a year passed into urban use, or was covered with water.

What's more, for every acre urbanized, another acre was isolated by "leapfrog" development rendering it difficult to use agriculturally. This side effect is just as critical as the direct loss of farmland, Crossan stressed.

"Rural areas destined for future development often cease to provide a favorable environment for farming long before actual subdivision occurs. And isolated sectors soon lose the services needed to maintain production agriculture," he said.

The recent concern over agricultural land use has resulted in action at the federal level, he said. President Carter highlighted it as a concern in an environmental message last year. The U.S. Department of Agriculture has sponsored a number of land use conferences and more are planned. And Congress is currently studying a proposed Agricultural Land Protection Act.

That Act would authorize the Secretary of Agriculture to study the impact of farmland loss on the national economy and on the nation's balance of trade.

It would also authorize funds for assistance to states to help them develop innovative approaches to farmland protection. This points up the fact that the loss of agricultural land has become a matter of national concern.

Some states recognized long ago that the irreplaceable loss of farmland was not in their best economic interest, Crossan continued.

Over two decades ago Maryland adopted property tax policies that afforded preferential treatment for farmland.

Since then many other states including Pennsylvania and Delaware have adopted similar laws. But although successful in providing tax relief, many of these programs have not prevented the development of farmland for non-agricultural purposes.

During the 1960's and 70's some states began to assert direct control over land use. Two states, Hawaii and Oregon, have created special agricultural districts as part of their overall state land use programs.

Other states — and in some cases, local governments — have adopted other programs specifically designed to protect farmland.

In many instances, noted the ag college dean, voters have agreed to a particular program because they believed it was in the best national interest to assure a reliable food base. Or they felt the need to conserve land for environmental reasons, or felt the need for a sustained "open space", or some other reason.

In any event, through public meetings, discussion of alternative plans and fact-finding residents of a large number of states have now worked out programs they consider appropriate for conditions in their own state.

Where concern has been expressed over possible economic effects of farmland preservation on other sectors of the economy, it has been shown that states actually benefit economically when their agricultural sector is strong and commercial development occurs in harmony with farming needs.

No one has yet been able to assess the intrinsic value of farmland to the nation as a whole, Crossan said. We need to examine all the methods by which state or local governments can protect this resource fairly, affordably and permanently.

The challenge is great, but it's necessary to come to grips with it now so that informed citizens and policymakers can seek equitable solutions before the loss of agricultural land becomes a full-blown crisis, he said.

"Our purpose in holding public meetings on this issue," he concluded, "is to begin in Delaware the dialogue necessary for understanding the problem, to help people examine the alternative sand eventually find solutions that are acceptable to all concerned."

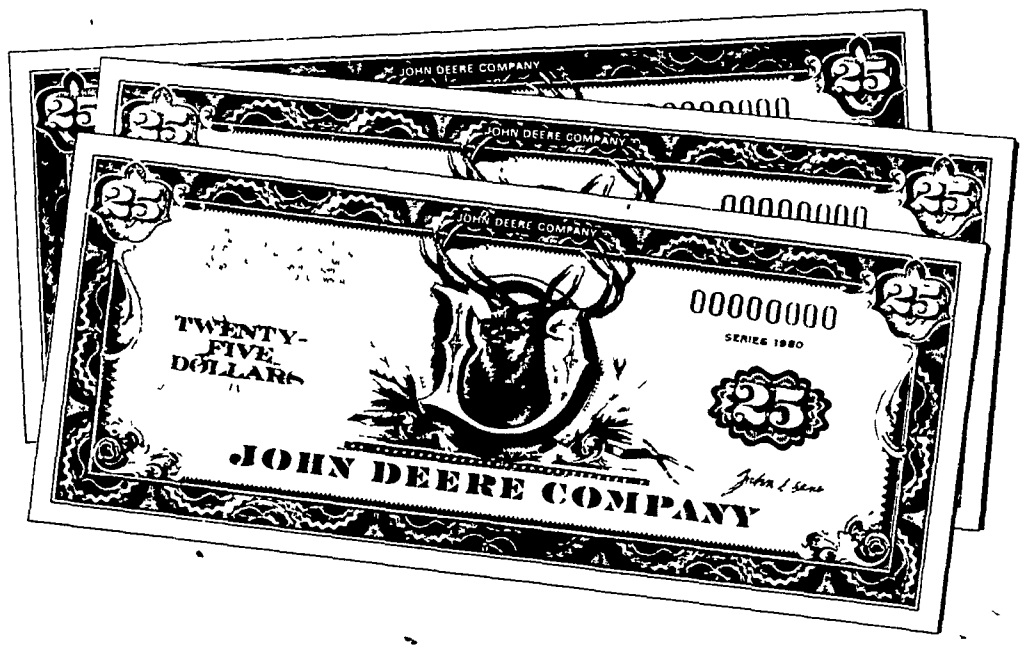
BONUS 1980

Up to $600 bonus buying power for early orders of John Deere Disks, Chisel Plows, or Hay and Forage Equipment



Preseason orders help John Deere plan production of most-needed models and sizes. So from February 1 through May 31, 1980, John Deere is offering impressive bonuses for preseason orders. This bonus is above and beyond our best deal to you on this equipment.

Your early order qualifies you for $50 to $600 in John Deere money for certain models of disks, chisel plows, balers, mower/conditioners, and pull-type forage harvesters. Promptly after delivery, you'll be mailed your bonus John Deere money to spend for products or services at our store

There's more. You'll get price protection from the time you order any machine in the bonus program. Use a John Deere Finance Plan and no finance charges will accrue on any machine in the program until the first day of the month which begins the 1980 use season in our area.

This early-order program includes a list of dozens of disks, chisel plows, and hay and forage tools. But your preseason order must be signed before March 31 to earn the most John Deere money. Come in soon, check the list, and ask us for our best deal on this new equipment.

You'll be expected to take delivery of the equipment as soon as it's available.

BUYER BONUS IN JOHN DEERE MONEY FOR NEW EQUIPMENT ORDERS SIGNED DURING:*

EQUIPMENT:	FEB., MAR. '80	APR., MAY '80
DISKS:

Anne Dulin, microbiologist, places the loop in the catheter for insertion into the mammary gland.

A new loop in mastitis prevention

BELTSVILLE, Md. — A small plastic loop inserted into each teat of a cow's udder may prevent mastitis, says Max Paape, a SEA animal scientist.

At a rate to producers of approximately $1 billion per year, mastitis is the most costly disease in dairy cattle.

William Kortum, California veterinarian, developed the loops. Kortum also developed a polyethylene IUD for the bovine uterus.

The loops are made from a polyethylene similar to that used to manufacture plastic milk containers. A 4½-inch piece of the polyethylene is inserted into the teat through a catheter.

Once inside the teat, the polyethylene resumes the shape of the loop.

The loop works by stimulating the animal's natural disease-fighting mechanism. The loop causes a mild irritation and in response the number of leucocytes in the affected area increases. Leucocytes, or white blood cells, destroy the bacteria that causes mastitis.

Normally, it takes about 24 hours for the leucocytes to build up to a point where they can destory the invading bacteria.

By this time, the bacteria have multiplied to such an extent that the infection may already have become established.

Having a leucocytes already present, in response to the loop, can prevent this buildup. Also, the loop "programs" the udder to respond faster in the case of infection.

In tests at the Beltsville Agricultural Research Center, Paape inserted the plastic loops into two quarters of the udders of six cows. (The loops have remained in place for over 1 year).

All quarters were then infused with toxins produced by Escherichia coli. E. coli cause a large number of mastitis infections.

The teats with loops responded faster to the toxin and the leucocyte count rapidly increased in these quarters.

There were four times as many leucocytes in teats containing the loops as there were in teats without the loops.

U.S. Pigskin Council formed

DES MOINES, Ia. — The National Pork Producers Council has joined with 13 other industry groups in formation of the U.S. Pigskin Council developed to encourage new markets for pigskin here and abroad.

The NPPC's Orville K. Sweet says one of the first areas of work will be an assessment of potential foreign market for pigskin, adding that the potential is there for marketing of 40 million skins annually.

Current marketings now reach 3 million skins a year, he said, with adequate existing markets for this amount of skins.

Will Rapp, Tanners' Council of America, has been named organizational chairman of the group with membership open to those providing funding of $1,000 for organizational purposes. Initial work is now underway in development of the Council's program of work and by-laws. Formal organization is to be completed by spring.

Referring to the potential foreign markets assessment, Sweet said that the Foreign Agricultural Service is now preparing a proposal for a cooperative program to study possible European market expansion.

There is, he said, currently the problem that pigskin is marketed merely as a substitute for other leathers while in reality, pigskin offers several superior qualities not immediately recognized.

One domestic market presently expressing increased interest in pigskins, he said, is the sports world viewing pigskin for use in athletic shoes.

Other members of the newly formed Council include Farmland Foods, Hormel's Wolverine Worldwide, Plains Processing, TX; Dreher Leather, Newark, NJ; Inland Ohio Hides; Hollander and Company, New York; Martin and Stewart, Canada; Irving Tanning, Hartland, ME; A.F. Gallun and Sons, Milwaukee; Southwestern Trading, Houston; Wells Lamont, Chicago and Amdur Leather, New York.

Produce firm has license suspended

WARWICK, R.I. — The produce trading license of Dino Produce, Inc., of Warwick, R.I., was suspended by the U.S. Department of Agriculture after the firm failed to pay a reparation award of $4609.

The department's Agricultural Marketing Service set the award in favor of a Florida shipper for a truckload and a carlot of watermelons shipped in June 1978.

The firm filed to answer to the charges in which it denied the charges; based on the evidence, however, USDA ordered payment of the amount claimed.

Dino Produce, Inc. is not eligible to operate in the produce business under the Perishable Agricultural Commodities Act until the award is paid. In addition, the firm's officer, director and sole stockholder--Anthony D. Dino--may not be employed by or affiliated with any PACA licensee without the department's approval.

All interstate traders in fresh and frozen vegetables must be licensed under PACA, which establishes a code of good business conduct for the produce industry.

The department is authorized to suspend or revoke a trader's license for violating the Act.

Mastitis

(Continued from Page D4)

The number of leucocytes in the teats containing the loops should be sufficient to prevent the mastitis bacteria from becoming established. Tests, in which bacteria are infused into the teats, are now being conducted.

Further studies showed that the loop did not affect milk yield, solids-not-fat, percent protein, or percent of fat in the milk.

The loop had no apparent effect on the overall milk leucocyte count. The increase in leucocytes was evident only in the first 20 milliliters of milk. This is normally stripped off before milking.

Large-scale tests under dairy farm conditions are being conducted in California by Kortum, in cooperation with Veterinary Extension, University of California, Davis.

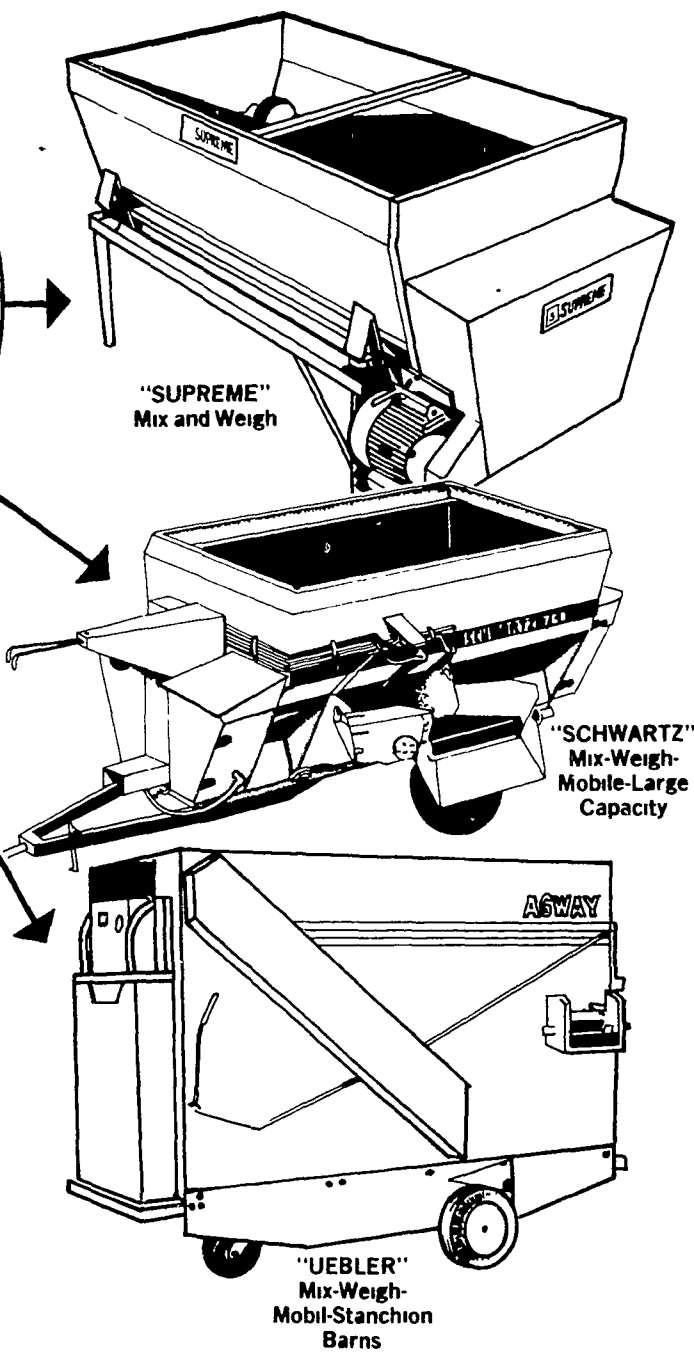
Paape is continuing his mastitis research in France for a year conducting tests on dairy cattle. He plans to use loops in two teats of each of 20 cows.

These cows will then be infused with mastitis-causing bacteria and the results studied.

These tests are needed before these loops can be recommended for mastitis prevention and made available to dairy producers.

AGWAY

TMR
Total Mixed Ration
"The Balanced Bite For More Milk at Least Feed Cost"



"SUPREME" Mix and Weigh

"SCHWARTZ" Mix-Weigh-Mobile-Large Capacity

"UEBLER" Mix-Weigh-Mobil-Stanchion Barns

If you want the challenge of the best feed program - this feed method and system is for you! There is hardly a farmer that hasn't reduced feed cost or increased production or done both when going this way. It is fair to say that Agway is a forerunner in knowing how to make this method work for you - call any of the stores listed.

Farm Talk

Jerry Webb

The American farmer is at least as patriotic as the average guy, so don't be too quick to jump on him when he cries the blues about the Russian grain embargo.

Whether Russia buys grain from the United States doesn't mean a whole lot to the typical man on the street. If he thinks that causes food prices to go up, then he complains bitterly about his food going to some Communist. If he thinks the embargo will make his food prices cheaper, then he's in favor of it and it has nothing to do with patriotism.

The American farmer is much more involved.

He's worked hard all year battling the elements, the energy crisis, inflation and whatever else, trying to bring in a successful crop. Now, suddenly his market is messed up. Sure, Uncle Sam is going to buy up grain to ease the burden and other actions are being taken.

Meanwhile, grain markets have dropped dramatically since President Carter's announcement, the futures market is cloudy, and there's a big cloud of gloom hanging over agriculture.

Foreign markets are important to American agriculture. Farmers depend on them. Whose fault is that? Well at least some of it has to be Uncle Sam's.

Historically, the American farmer has always been able to produce a little bit more than American consumers need.

Going back 50 years or more, we've talked about the farm problem, which in a few words boils down to too much production or not enough demand.

At the start of the decade just ended, Uncle Sam held huge stocks of grain. Stocks that had been slowly building over a lot of years in spite of our government's and private traders' best efforts to sell that extra produce in the world market.

Then in the early seventies there were some crop failures around the world and a food crisis sprang up. The Soviets and a bunch of other nations came to us with checkbooks in hand, looking for food. We had the food, they had the money, and so deals were made.

Pretty soon the surpluses were gone. The grain bins were dismantled and prices went up. That's when that era's secretary of agriculture urged farmers to plant "from fence row to fence row". Answering that request and responding to greatly improved prices, American farmers did just about that.

Things went along fine for a few years with the world market cleaning up our annual surplus. By 1976, however, supplies were starting to get out of balance again and government programs were once again enacted to boost sagging grain prices.

Farmers picketed and paraded and tightened their belts, and did what they could to make a dollar or two in a very high risk and difficult game of farming.

And now out of the blue comes an announcement in response to a threatening situation in Afghanistan that pulls the rug right out from under the American farmer.

The few dollars profit those grain farmers were planning on now look like huge losses and there is a great aura of uncertainty as we approach another cropping year.

Uncle Sam says he'll buy up surplus grain so farmers and grain traders won't be stuck. But what's he going to do with it?

A bushel of corn sold to Russia and fed to a Russian steer is gone forever. But a bushel of corn sold to Uncle Sam continues to be a factor in the market.

Unless Uncle plans to burn it or bury it that grain lies around, continuing to dampen future prospects. If he gives it to needy nations, he may be satisfying a market that might have otherwise bought American grain.

Even if he turns it into fuel, he weakens a market that farmers were hoping might be their salvation. There's just no question in my mind that government-owned grain continues to influence the American grain market long after the deals have all been made.

The whole question of a grain embargo was made academic the other day when the longshoremen said they wouldn't ship it anyway. And that further emphasizes the precarious position the American farmer finds himself in.

When the longshoremen say they won't load it, it doesn't make any difference what anybody else says, up to and including our President.

This is a difficult time for everyone—our President, our State Department, our military, and yes, even our farmers. For they are part of a political war—one which they want no part of and yet they have no choice.

There must be a lesson in all this for farmers, but I can't seem to sort out just what it is.

FEBRUARY

SAFETY CORNER

FARM TRACTOR SAFETY

Modern farm tractors are safer and more comfortable than ever to operate But, they don't think for themselves. Operate and maintain your tractor according to the instruction manual Allow only trained, competent people to run your tractor Avoid tractor trippers like ditches, steep slopes, holes, and other obstacles Keep children away from tractors and other equipment Keep the PTO shields in place and shut off power before dismounting Adjust your travel speed to conditions—slow down on rough, muddy or slippery ground

What to do if your tax return is questioned

PHILADELPHIA — Your 1979 income tax return may be one of many that the IRS randomly selects for audit each year, so while you are preparing your return, keep that in mind.

A tax audit, says John W. Munnell, CPA, President of the South Central Chapter of the Pennsylvania Institute of Certified Public Accountants, can be pretty painless if you have all the necessary documentation.

What makes an audit difficult, Munnell says, is it usually takes place a year or two after your return has been filed, and by then you might have trouble remembering a former business contact's name, not to mention your reason for taking him and his wife out to dinner back in 1979.

So right now, with events fresh in your mind and documentation still at hand, is the time to prepare for that IRS interview you hope never takes place. As you assemble the facts that will go into your 1979 Form 1040, retain the receipts and cancelled checks that support your tax data. File them with your copy of the tax return.

Not only will this help you prove, if necessary, that you did indeed spend a great deal of money having your son's teeth straightened, but the existence of such thorough documentation could also serve to reassure an IRS examiner that your return would probably stand up to careful examination in any other area.

However, should you be unable to document a substantial deduction, the agent may be much more likely to keep on digging.

Although it's often possible to come up with proof by consulting other people's records – the orthodontist's, for example – this would necessitate at least one more visit with the IRS. Full, orderly documentation tends to keep contacts with the IRS short and sweet.

Should a taxpayer try to head off a possible audit by holding deductions within the average amounts claimed by persons in his tax bracket?

Certainly not, advises the Pennsylvania Institute of Certified Public Accountants; there is no sound reason for passing up legitimate claims. If your deductions are especially high, though, that's all the more reason for saving your documentation.

Also, maintaining a low profile by trying to keep within the "average" range is no assurance that you will avoid an audit. Returns pulled for audit (about one in fifty) are selected by computer, and no one outside the IRS knows exactly what criteria is used in the selection process.

We do know, however, that some returns are picked strictly at random, so there is no sure way to prevent an audit.

IRS auditors can and do question any part of a return, whether all taxable income is reported, claimed exemptions are legitimate, and deductions are justified and accurately reported. But when they notify you that your return is to be reviewed, they generally indicate the areas in question, so it is only necessary for you or your professional tax advisor to bring documentation for matters in doubt.

Keep in mind the examination can be expanded to other areas.

Randomly-selected tax returns are examined in detail each year as part of an ongoing IRS study of the degree of taxpayer compliance with the Internal Revenue Code.

If you are chosen for one of these examinations, expect to be questioned in depth about any or all aspects of your return – and about financial data not even included on the return.

In its conventional audits of computer-selected returns, IRS each year gives extra emphasis in certain areas. Right now, and for some months to come, agents auditing returns (most of which are for 1978) have been instructed to look closely for:

Unreported gains on sales of stock or other assets.

Unreported stock dividends and state tax refunds.

Gambling casino winnings.

Closing out of tax shelters, which often results in realization of income.

Sales of homes (without replacement) by persons who got the home-purchase tax credit in 1975 or 1976.

Off-the-record barter transactions.

What areas will be receiving special attention when IRS gets around to auditing the 1979 returns is anybody's guess, but those who follow the CPA's advise and save documentary evidence should have no reason to be concerned.

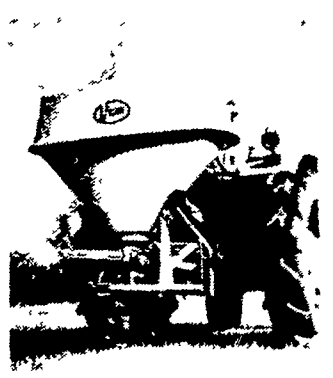
Vicon fertilizer spreader

The most accurate fertilizer spreader you can buy



The Vicon Spreader uses an exclusive fast-action spout moving back and forth at 540 times per minute to give even, rectangular coverage instead of the usual circular pattern
That means increased profit because you get uniform fertilizer coverage resulting in better stands and higher yields

Give the Vicon fertilizer spreader a try It costs no more than others But it's better

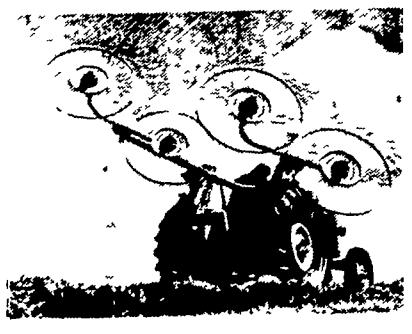
Vicon doublet/mower conditioner

New concept in cutting and conditioning grass

The New Vicon Doublet/Mower Conditioner offers a new concept in grass conservation The Vicon Doublet/Mower cuts, conditions and produces a light airy swath, reducing valuable time required to produce good quality hay and wilted silage Conditioning at the same time as cutting is accomplished by incorporating the same cutter bar as the Vicon Discus disc mower with a conditioning rotor mounted above The sucking action picks up the cut grass and delivers it to the back of the machine in light, fluffy swaths

Vicon acrobat hay rake

Tedds as well as rakes...and costs about one-third less



The Acrobat is a high-capacity ground driven rake with no gears belts or power shafts to break
Fits 3-point hitch tractors
And can be used for tedding as well as raking, turning swaths and fluffing without the need for tools to change from one operation to another

The Acrobat is a big worker for a little price Put it to work on your farm

Vicon discus/disc mower

Fast speed and low power requirements

The new Vicon Discus disc mower offers outstanding characteristics of fast speed and low power requirements along with easy setting, safe working no blockages The Vicon Discus disc mower can tackle the heaviest standing grass as well as laid and tangled crops with a minimum of power No tools are required to change from transport to working position Transporting the Vicon Discus along narrow roads is made easy with the Discus in vertical position

Vicon the better idea from Holland

The time is here to start transplants

COLLEGE PARK, Md. — Some vegetables and many flower transplants can be started now. But an investment in equipment and material is needed to produce worthwhile results, according to Charles A. McClurg, Extension vegetable specialist and associate professor of horticulture at the University of Maryland in College Park.

McClurg notes that healthy, good quality transplants require heating cables and flourescent lights to keep the seedlings from becoming tall and spindly; and soilless growing mix and fungicide to help prevent damping off disease.

It is important not to sow seeds too early, or your transplants may get oversized before they can be set outdoors. Assuming a target date of April 1 for setting out cool-season crops, seed for broccoli, brussel sprouts, cabbage, cauliflower and head lettuce should be started indoors by mid-February.

Warm-season crops like tomatoes, eggplants and green peppers can be started about mid-March. They should not be set outdoors until early May in most parts of Maryland.

Cucurbits and other garden vine crops should be started indoors about mid-April. This group includes cucumber, cantaloupe, pumpkin, squash and watermelon.

Many annual flower seeds can be started indoors anytime between mid-February and late March.

More information is contained in two Home Horticulture mimeo sheets available free from Maryland county extension offices. Titles are "Growing Vegetable Transplants" (HE 109-75) and "Hardening of Vegetable Transplants" (HE 108-75).

Whether you decide to buy vegetable seeds now or transplants later, you can also help to assure success by checking the 1980-81 approved listing of the Extension Service at the University of Maryland. It is titled Vegetable Cutivars for Maryland Home Gardens (Leaflet 15).

Like the mimeo sheets, it is available free in limited supply from county Extension offices throughout the state.

1980 vegetable guide available to growers

NEWARK, Del. — The 1980 edition of "Commercial Vegetable Production Recommendations" is now available to Delaware farmers.

This production guide was prepared by the Extension Service and is intended for the commercial vegetable grower who has to make numerous managerial decisions over the growing season.

Although final decisions as to variety, pesticide application, equipment, fertilizer and cultural practices used are up to individual farmers, recommendations contained in the bulletin should facilitate decision-making.

These recommendations are based on research on vegetable crops at the University of Delaware, University of Maryland, Rutgers University, Virginia Truck and Ornamentals Research Station, Virginia Polytechnic Institute and State University, and the U.S. Department of Agriculture, combined with industry and grower knowledge and experience.

The publication includes information on soil management, testing, liming and fertilizing; production of transplants; irrigation; air pollution injury; pesticide formulation and application and the means to improve pest control; detection and control of soil pests; pesticide safety; as well as specific recommendations regarding production of 37 different commercial vegetable crops.

These include all the major vegetables grown in Delaware, plus many specialty items.

The publication is not for use by home gardeners. Commercial vegetable growers interested in obtaining a copy should contact their county agent in Newark, 302/738-2506; Dover, 302/678-4675; or Georgetown, 302/856-5250.

The Milk Check

TOM JURCHAK
County Agent

What's Wrong

Just in case it's not clear to everyone, reconstituted milk is made simply by adding water to powdered non-fat milk. Anyone can make it by buying the powder at any supermarket and mixing it at home.

This alone shoots one of CNI's arguments that Federal Orders "eliminate from commerce an equally nutritious but lower cost alternative to fluid milk."

In fact it's probably cheaper for the consumer to mix it in the kitchen than to have some processor do it and deliver all that water.

How much of a savings is there? Right now in my town I can make reconstituted milk for $1.35 a gallon and fluid skim milk sells for $1.74 a gallon. That's a difference of 39 cents a gallon.

The problem is that most people don't like reconstituted skim so they mix it with whole milk. This is probably what would happen if CNI proposals were approved and processors were making it.

If I make a 50-50 blend of skim powder and whole milk at my prices, it will cost me $1.58 a gallon. That's only a 16 cent saving over fluid skim and I provide all the labor, transportation and water.

Estimates of what it would be if the processor made it range from five to eight cents a gallon. Not much. Even less if it isn't all passed through to the consumer.

Check the prices in your market.

Dollars and Sense

The big problem with the CNI proposals is the savings in pennies for consumers compared to the losses in dollars for dairy farmers.

This will vary in different regions of the country and under different Federal Orders. But, here in the northeastern U. S. you will be hit among the hardest.

That's not hard to understand with reconstituted milk cutting into your Class I markets that you depend on so much for your income.

Estimates made back in 1976 indicate a drop in the blend price of 42 cents a hundred. This would produce a drop of 278 million pounds in production and $201 million in income. Translated to an average New York state dairy farmer by Dr. Andrew Novakovic at Cornell this would mean a loss of $2,242 per farm in 1976.

Assuming this farmer was an Order 2 producer and knowing the Order 2 blend has increased 21 per cent in three years the average loss would now be $2,713 per farm.

It doesn't make sense that farmers should suffer losses of thousands of dollars to provide savings of pennies for consumers. If that doesn't get you to write I guess I'm wrong.

New Year - Old Prices

I was hoping that the prices for the new year would have some good news for you, but they look the same as last year.

The January Minnesota-Wisconsin price for 3.5 test milk increased only three cents over December to $11.37. That makes your Class II price for January $11.40 - the same as December - and Class I at $13.52 only two cents better.

The reason, of course, is that the product prices haven't changed much with butter at $1.30, powder at .837 and cheese at $1.25. Even your butterfat differential will be the same, at .15 cents in January.

All of these are really down to the support price levels and can't go lower. They won't go higher as long as your milk production keeps increasing over last year.

Broiler placements up another 14%

HARRISBURG — Placements of broiler chicks in the commonwealth for the week ending February 2 were 2,382,000, according to the Pennsylvania Crop Reporting Service.

The placements were 14 percent above the corresponding week a year earlier and four percent above the previous week. Average placements during the past nine weeks were five percent above a year earlier.

Placements in the 21 key poultry producting states were 79,622,000, one percent above the previous week and seven percent above the week a year earlier. Average placements during the past nine weeks were five percent above the same week a year ago.

Broiler-fryers slaughtered in Pennsylvania under federal inspection during the week ending January 23 totaled 1,789,000, with an average live-weight of 4.14 pounds.

Clothes, Too!

"You have no complaint," a city man said to a farmer, "you have your own milk, butter, eggs, meat and vegetables With enough to eat and a place to sleep, what else do you want?"

"Well," said the farmer, "you come around a few months from now and you'll see the fattest, sleekest, nakedest farmer you ever saw "

National Central Bank is now Hamilton Bank.

We've changed our name.
Your friends at National Central Bank are now your friends at Hamilton Bank.

We've taken the word "national" out of our name because we've withdrawn from the Federal Reserve System, and are now a state-chartered bank, just like many other banks in this area.

For a number of years, the National Central management has asked that Federal Reserve member and non-member banks be treated as equals with respect to the forms in which they are permitted to maintain their reserves against deposits. Although Congress has considered various proposals for easing the burden of Federal Reserve membership, no actual changes have been forthcoming.

As Hamilton Bank, we're still a member of the Federal Deposit Insurance Corporation (FDIC), and all deposits are still insured exactly as they were before.

You can still use all your National Central checks, passbooks, Master Charge and VISA cards, and any other forms with National Central on them. The new name will appear on your next order of checks. Other documents can be used indefinitely.

You may continue to see National Central signs in front of some of our offices for a while . . . our new Hamilton Bank signs will be going up as soon as they're available.

Of course, the same friendly, helpful people are in your local office, ready to serve you. And you'll continue to enjoy all the services we've always provided.

In fact, the only thing that's changed is our name. And that's a change you helped us make. To find a new name, we conducted a research study in the six counties we serve, and Hamilton Bank was the clear favorite.
So, now, National Central Bank is Hamilton Bank. And with that new name we'll continue to work just as hard as we can to give you more for your money, more for you.

MORE FOR YOUR MONEY
MORE FOR YOU

Formerly National Central Bank

Maryland's fairs are more popular than the Orioles

ANNAPOLIS, Md — What's one of the most popular activities in the State of Maryland? Before you say going to Orioles games you might want to look at the latest report of the Maryland State Fair Board which reveals that some 1.3 million people attend fairs and community shows and that 49,000 people take an active part as exhibitors.

Besides being fun for viewer and participant alike, such shows and fairs are designed to acquaint urban and suburban folks with a working knowledge of where their food comes from by telling the story of Maryland's agricultural vitality and heritage.

The Fair Board, an attached agency of the Maryland Department of Agriculture, fosters such shows and fairs through its financial support in the form of premiums, trophies and ribbons.

During the fiscal 1979 period covered by the Board's report, some 185 activities are listed including one state fair, 38 county and regional fairs and shows, 45 Maryland 4-H activities, 43 Maryland FFA activities, 46 local community shows and contests, and 13 field days.

The numbers of Marylanders who enjoy such activities as viewers and participants mushrooms when you consider that over 49,500 people entered some 130,000 entries in these activities which drew over 1,360,000 people as viewers.

For the fiscal 1979 period, the Fair Board reports receipts of $1,449,829 which came from a special tax on horse racing bets at the state's race tracks. A full $1 million of this figure is allocated to the operators of the Maryland State Fair at Timonium for capital improvements under a multi-year plan approved by the General Assembly several years ago.

The Fair Board's regular activities, assistance to fairs and shows through premium money, utilized $414,849 of which only $34,938 was accounted for in administrative expenses. Much of the credit for the low overhead must go to the fact that the board is composed of nine unpaid private citizens who give of their time and talents.

Frank D. Brown, Jr., serves as Chairman of the Fair Board with Grover K Walker as Vice-Chairman and Richard N. Willa as Secretary. The other members are: Earl C Robertson, John M. Crum, Gerald B. Truitt, Jr., Frank C. Downey, Edna M. White and J. Gordon Warfield. Ms. Carol Aragon is the Board's full time Executive Secretary.

Embargo aid bill gets first OK

WASHINGTON, D.C. — The U.S. House Agriculture Committee's subcommittee on Conservation and Credit has unanimously approved legislation by U.S. Congressman Tom Harkin to substantially reduce interest rates for on-farm storage facility loans and to continue a government program due to expire in May which helps farmers experiencing serious, but temporary, financial problems refinance their obligations.

The bill was introduced three weeks ago to help farmers increase their on-farm storage capacity and to extend needed financial protection in the wake of President Carter's embargo of American grain sales to the Soviet Union.

The bill, as approved on a 16-0 vote by the subcommittee, reduces the interest rates for Agricultural Conservation and Stabilization Service storage facility loans from the current 10.5 per cent to 8 per cent annually. It also increases the maximum individual loan limit from $50,000 to $100,000.

The legislation also extends the Farmers Home Administration's Economic Emergency Assistance program until September 30, 1981, nearly two years beyond its present May, 1980 cut-off date.

It also provides an additional $2 billion lending authority for the program which is nearing its current lending limit.

The full House Agriculture Committee is set to consider the bill this week.

Heading up York County Holstein activities are, front from left; Larry Amspacher, Phil Laughman, Rodman Thompson, E. Wayne Beshore; back, T. Edwin Johnson, Bob Smyser, June Boyer, and Larry Rinehard. Absent were Donald Fantom and George Knight III.

York Holstein Association slates Spring meetings

DELTA — The Spring Barn Meeting will kick off the 1980 lineup of activities for the York County Holstein Association. Paul and Kathy King, Kingway Farms, Delta, R2, will host the March 11 session, scheduled for 1 p.m.

A speaker on nutrition will highlight the program and all interested dairymen and agri-business representatives are invited to attend.

Phil Laughman, Thomasville R2, was elected president at a recent reorganizational meeting. Assisting him will be vice-president Rodman Thompson, East Berlin R1, secretary-treasurer Larry Amspacher, York R7, and assistant June Boyer, York. E. Wayne Beshore, New Cumberland R1, is the state director.

Committees are headed by the following: Larry Rinehard, breed improvement; Larry Amspacher and Robert Morris, sales; Darla Doll, Cindy Knight, and June Boyer, junior activities; Jane and Rodman Thompson, banquet; Joyce Bupp, publicity; Larry Rinehard, show; Karen Laughman, advertising.

Following a successful start in 1979, the club will again team with neighboring breeders to sponsor the second annual York-Adams Calfarama sale on March 25, at 7:30 p.m. Avalong Farms, located off Route 30 east, is the sale site. A. Doty Remsburg, Jefferson, Maryland, will handle cataloging and auctioneering. York Holstein women, headed by Georgia Amspacher, are sponsoring the sale's food stand.

Buyers and consigners to the Calfarama will be the special guests at the York club's annual summer picnic, to be hosted by Tom and June Boyer at their Sunnybend Farm, west of York, on July 29.

T. Edwin Johnson and Larry Amspacher are formulating plans for the annual bus tour in early April. Initial arrangements call for an overnight stay visiting herds in New Jersey and northeast Pennsylvania.

Further information will be announced at the March barn meeting.

York's Black and White show is set for Friday, August 15, at the York Fairgrounds. That show is to be held in conjunction with the county's 4-H fair, dairy and horse roundups.

Fall activities already scheduled are the annual meeting and banquet, tentatively set for October 17, and the county's DHIA banquet on November 25.

Winter tips for milk quality

UNIVERSITY PARK — Dairy farmers are more likely to have a few minutes a day to spare during the winter. Think about your practices which affect milk quality.

Most of your income is from the sale of milk. The better the quality and flavor, the more consumers will buy. Do you follow these practices?

Keep cow stalls bedded and cows reasonably clean.

Operate fans for good ventilation to prevent cow health problems and off-flavors in milk.

Use a sanitizer solution and paper towels to wash and dry cows teats and lower portion of the udder prior to attaching milker units.

Wash and sanitize all milk handling equipment between uses - twice each day for milker units and every-other-day for the bulk tank.

Check inflations, receiver probes, bulk tank outlet valves and other hard to clean places once a week.

Note lactation length and freshening schedules. Dry off cows milking less than 20 pounds per day.

Check your feed programming based on forage analysis. Adequate protein and vitamin E are necessary to prevent off-flavors of milk.

Feed silage after milking and do not allow cows to eat it for two hours before milking.

Quality starts at the cow. Proper handling by everyone will assure consumers of good milk and dairy products.

Del. weather modification program completes second year

DOVER, Del. — The 1979 Delaware Weather Modification Program was conducted between June 20 and September 20, 1979.

This was the second year of a multi-year program run by the Delaware Department of Agriculture. This program is designed to determine the degree to which dynamic seeding of cumulus cloud systems with silver iodide will increase rainfall in Delaware.

According to Mark G. Kooker, Administrative Assistant to the Secretary of Agriculture, the results of the rainfall observations collected over the last two years continue to be encouraging. As in the past year, more than twice as many days were determined to be seedable in 1979 than predicted by the original computer study.

The 1979 cloud seeding operations were conducted by the Colorado International Corporation under the direction of the Secretary of Agriculture. To provide a broad based local control, Secretary Alden S. Hopkins, Jr. was advised by a seven member Weather Modification Advisory Committee concerning policy decisions and local crop moisture conditions.

The Delaware Agricultural Experiment Station, College of Agricultural Sciences, University of Delaware was responsible for the evaluation of the results of the program.

A total of 54 missions were flown compared with 39 missions during 1978. Thirty of these missions were seeding missions versus 25 the previous season. There were partial or statewide suspensions of seeding operations during 30 days this past season. These suspensions were placed by the Secretary, with the advice of the Advisory Committee.

Due to changing crop moisture condition, Secretary Hopkins ordered seeding operations suspended for three days during the latter part of June and the entire first week of July. Seeding operations were again suspended for three days during both the first and third weeks of August. After August 28, a daily decision to seed or not to seed was made because of the forecasted heavy rains associated with hurricanes "David" and "Fred".

The evaluation procedures closely followed those developed during the 1978 program. The procedures were based upon the results of research conducted in other areas, especially the FACE program which has been conducted in Florida for several years.

For the purpose of analysis, the past summer's seeding program involved an experimental program from 12 noon to 10 p.m. during which two-thirds of the seeding missions used silver iodide and one-third used sand for a control measure.

All missions flown outside of the experimental period used silver iodide.

Seeding operations were conducted on 24 different days versus 13 days the previous year. Twenty-six seeding missions were flown during the experimental period.

Twenty-one of these missions conducted during the experimental period met the requirements for evaluation.

Fifteen of the 21 missions used silver iodide and the remaining six used sand.

A network of 176 rain gauges scattered statewide was used to measure the rainfall. The rainfall from the 15 missions using silver iodide averaged .491 inches while the rainfall during the 6 missions in which sand was used averaged .275 inches.

By combining the information gathered during the 1978 and 1979 programs we have 31 observations available for analysis, 22 silver iodide missions and nine sand missions.

The rainfall from the 22 missions using silver iodide averaged .400 inches while the average rainfall during those missions using sand was .209 inches.

The variation in the amounts of rainfall measured among the gauges was so great during each observation and the total number of seeding missions was so small, that the difference in the amounts of rainfall measured after missions using silver iodide and missions using sand were not statistically significant.

Based upon the results in Delaware over the past two summers, it is estimated that 80 observations will be required to produce statistically valid results.

Nineteen samples of rain water were collected during the program and analyzed for silver content. The results of this data tends to indicate that the level of silver found were within safe limits.

The authors of the University's Evaluation Report are John R. Mather, State Climatologist and Chairman of the Department of Geography; Raymond C. Smith, Agricultural Statistician and Chairman of the Department of Agricultural and Food Economics and William J. Benton, Association Dean of the College of Agricultural Sciences and Associate Director of the Agricultural Experiment Station.

State timber sales total $3.6 million

HARRISBURG — Secretary of Environmental Resources Clifford L. Jones said today timber sales from state forests in 1979 reached a record high and contributed $3,647,039 to the state's General Fund.

"This increase in timber sales during the past year represents the proper management of one of Pennsylvania's most valuable, and renewable, natural resources which not only benefits the wood using industries but also the taxpayers of the Commonwealth," Jones said.

He said 102 contracts were issued in 1979 having a net volume of 39,234,000 board feet of sawtimber and 7,646,000 cubic feet of pulpwood.

The total value of these contract sales, timber permit sales and firewood was $3,647,039, he said.

"This represents not only a sizeable increase in the number of contact sales over 1978 but also an increase of over 75 percent in the value of sawtimber and pulpwood harvested," Jones said.

"During 1978 there were 69 contracts issued for a volume of 22,957,000 board feet of sawtimber and 4,201,900 cubic feet of pulpwood valued at $1,916,773."

"There were 109 contracts in 1976 but the volume of sawtimber and pulpwood sold, and the monetary value of both, were considerably lower."

Jones credited the 1979 achievement to increased timber production on the nearly two million acres of forest land managed by the Department of Environmental Resources.

"For the last several years, there has been a general improvement in the market for wood products and the majority of our wood using industries have had to depend largely on the publicly owned state forests as their major source of supply," Jones said.

"A forest is one of our few renewable natural resources but it must be managed properly if it is to yield a continuous flow of products, services."

Jones said proper management is the responsibility of the department's Bureau of Forestry.

"The benefits from this combination of proper management and harvesting are two-fold," Jones said.

"First, it improves the habitat for wildlife; and second, it contributes to the forest industries' demand for raw timber products which are converted into more than 600 items needed for every day use.

"If we are to maintain this level of production our state forests cannot be allowed to remain idle. They must be managed and harvested with an eye to the future," he said.

It is estimated that there are over four million former FFA members. Nearly 16,000 are members of the National FFA Alumni Association.

Action cited to reduce ag's uncertain prospects

CHICAGO, D.C. — A spokesman for the U.S. Department of Agriculture has said most of the uncertainty U.S. agriculture has faced due to the suspension of sales to the Soviet Union by now has been reduced by the series of actions taken by the Administration and the Department.

Speaking before the Fertilizer Institute's annual meeting here, Howard W. Hjort, director of economics, policy analysis and budget, cited a rebounding of farm prices and rapidly moving exports as signals of a continued strong agricultural plant.

In spite of the suspension in sales, he said, the U.S. will continue to be the world's greatest agricultural exporter.

However, he said, one issue of prime importance to the fertilizer industry remains unresolved — the question of whether a land diversion program will be implemented this spring.

Futhermore, while U.S. policy on fertilizer product trade has been announced, the issue has not yet been completely settled.

"Before the suspension of grain shipments to the USSR, we had forecast consumption of nitrogen, phosphate and potash to increase three to four percent, as a result of an increase in planted acreage and higher application rates. Fertilizer prices were forecast to rise substantially above 1978-79 levels in response to strong domestic and foreign demand and increasing production costs.

"The invasion of Afghanistan and the U.S. response have complicated this outlook," Hjort said.

On January 18, President Carter imposed a quota on 1980 Russian ammonia imports, limiting imports to 1 million short tons in calendar year 1980. Of this quota, it is estimated that 500,000 tons will be imported during January-July.

"By itself, this action would have had little impact on nitrogen supplies or price," Hjort said. However, actions taken by the International Longshoremen's Association have been a complicating factor since the union was refusing to load or unload all cargo to or from the USSR — effectively stopping ammonia imports on the East Coast and all phosphate exports. On Friday, however, the ILA was ordered to stop interfering with phosphate exports to the Soviet Union.

"However, the consistency of a policy to allow fertilizer trade with the Soviets at a time when grain sales had been suspended, had come into question," Hjort said.

Secretary of Commerce Philip M. Klutznick has announced that in the interest of U.S. foreign policy, the U.S. suspended new licensing of phosphate exports under general licenses, effective February 4.

"In the future, phosphate exports will require validated licenses before shipment can be made to the USSR. Shipments of phosphate on dock for loading or in transit to a port have been given 48 hours to move under general licenses. But until a thorough assessment of the issues is completed, no licensing action will be taken," Hjort said.

"The net result of these actions could mean some downward pressure on domestic phosphate prices," Hjort said. "On the other hand, near-term ammonia imports could be constrained slightly."

Whether a diversion program is implemented in 1980 will also affect demand and prices for fertilizer, he added.

Hjort described the measures President Carter directed in response to the Soviet Unions invasion of Afghanistan, mainly dealing with the suspension of grain sales above the eight million tons allowed under terms of the U.S. - USSR Grains Supply Agreement and its potential impacts on American farmers.

"In other circumstances, this action might have meant disaster for our agricultural producers. In this case, it has not. The reason lies behind the President's commitment to ensure that our agricultural producers alone do not bear the cost," he said.

During the last month, the government has offered to assume the contractual obligations for approximately four million tons of wheat, 10 million tons of corn and about one million tons of soybeans.

In the case of corn and soybeans, the Commodity Credit Corporation will either take delivery or, if the farm price is above the pre-suspension level, arrange sales of the contract to another party; none of the wheat will go back onto the market — instead it will be used for foreign food aid purposes.

The government also amended the farmer-owned reserve to encourage farmers to place additional quantities of grain in reserve.

Loan prices for wheat and corn were increased and the bands between reserve release and call prices expanded. Reserve storage rates were increased and interest on the first 13 million tons of corn entering were waived for one year.

Producers already with corn in reserve also were given a year's interest waiver as on January 7, but interest accrued before that time is still owed.

In addition, the government offered and received bids to make direct purchases where congestion is backing up the system.

The President is asking Congress to increase fiscal 1980 and 1981 appropriations to increase food aid to needy countries and has reiterated his support of an alcohol fuels program to stimulate new demand for grain while helping to reduce dependence of foreign and costly energy.

Hjort said reaction to the President's stand has been favorable.

"Rarely have we received such heartening support from our fellow nations as we have this time for the stand we have chosen to take.

"At home, the reaction of our people has been equally encouraging. Our producers and consumers understand the seriousness of the current situation. They understand the reasons behind the President's actions. Most are willing to carry part of the load.

"Agricultural producers, at first skeptical of the President's commitment to protect farm prices and farm income, are seeing that our promise will be kept. And, as a result of the Administration's actions, most of the uncertainty surrounding prospects for U.S. agricultural has been reduced," Hjort said.

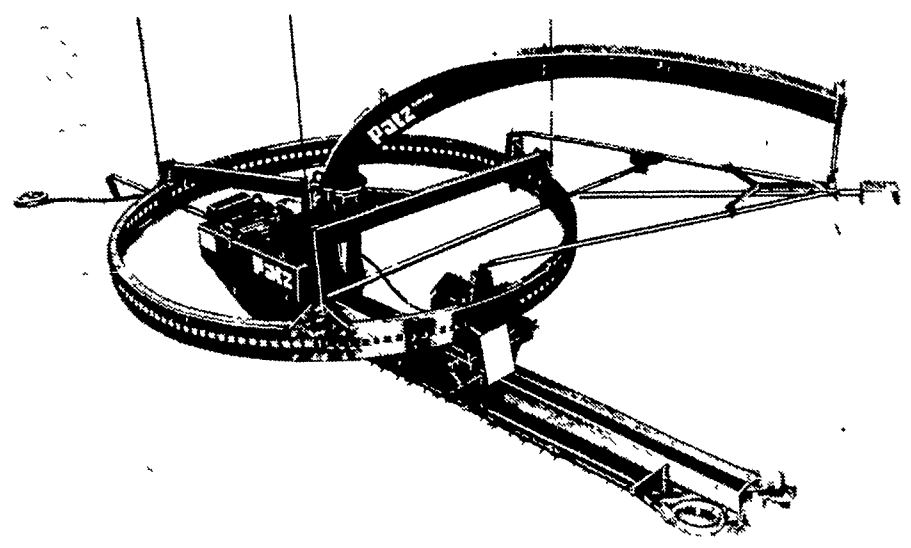
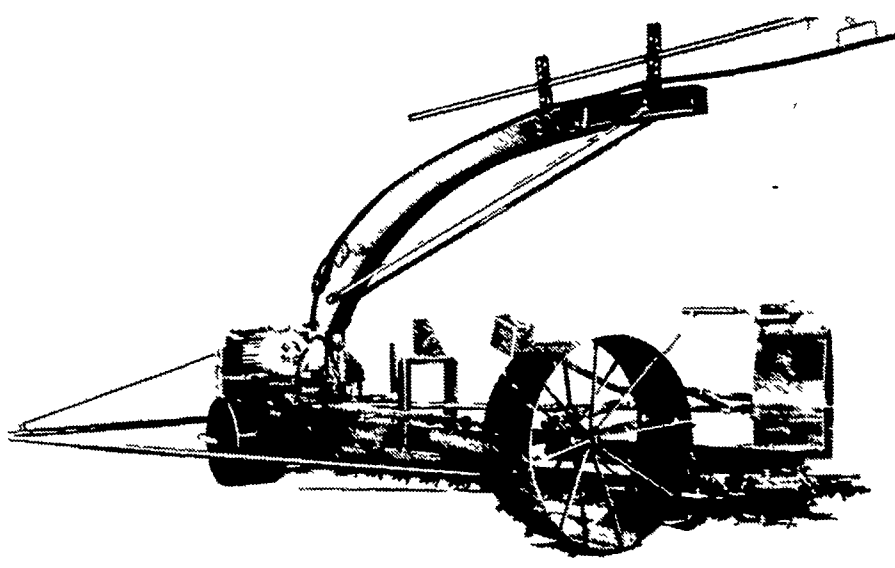
THE PATZ SOLUTION: Reliable Year-Round Feeding





You know the problems caused by hard packed and frozen silage. Patz gives you two solutions to the problem — the Model RD-790 ring-drive silo unloader and the Model 98B surface-drive silo unloader.

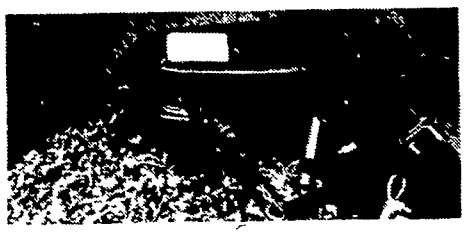
Both unloaders feature a double-hook gathering chain with hardened steel cutters and claws that rip through frozen and packed silage. When you push the button, you know you can count on a smooth feeding operation.

Evaluate our powered silo wall cutters. Spring tension holds 4 self-sharpening steel cutter blades in place to follow the curve of the silo wall. This keeps silage from building up along the walls, so you can be sure that you're getting all the feed where it belongs . . . in the feeder and not stuck to the walls.

The claws and cutters of the gathering chain deliver a steady flow of silage day after day.

Want to know more about the Patz system? See your Patz dealer. He'll show you Patz quality and reliability . . . two important words to a farmer like you.

Patz double-hook gathering chain features cutters and claws



Rotating steel blades keep the silo wall free of silage buildup (shown without guards)

Performance Strong as Steel

New melons, cukes top commercial list

DOVER, Del. — A number of new melon and cucumber varieties show good promise for commercial vegetable growers.

Mike Orzolek, University of Delaware extension vegetable specialist, reported on some of these new hybrids during the recent annual meeting of the Delaware Vegetable Growers Association in Dover.

Among cantaloupes which have performed well in variety trials at the University's Georgetown Substation is one line that goes by the designation XP-771. Similar to 'Gold Star', he said it has good disease resistance and is a good shipper. They've been testing it at Georgetown for the past four or five years.

It's not scheduled for release by the breeder in 1981.

Another cantaloupe that looks good for Delaware growers is a line called GQVW. This has better mildew resistance than 'Gold Star' and produces similar fruit.

For roadside marketing, 'Supreme Delight' looks good. This lope has medium mildew resistance and comes on a little later than 'Gold Star'. It's not a good shipper.

One of the most unusual melons undergoing testing at Georgetown right now is a variety called 'Green Pearl'. Developed in Japan, it looks like a cantaloupe until you cut it open. But the sweet, jucky flesh inside is green like a honeydew.

This is a very late variety but has good disease resistance. Set out the first of May as a transplant, it should be ready for early August harvest on plastic, said Orzolek.

Performance trials on watermelons also show some promising new hybrids for area producers.

One of these is a new Florida release called 'Dixielee'. This produces an oblong, 20 to 30 pound striped melon which comes on later than 'Charleston Gray' or 'Crimson Sweet'. It has excellent red flesh and is 15 to 20 percent sweeter than other watermelons.

Seed currently is available to commercial growers from the Florida Foundation Seed Producers, Inc., Box 14006, University Station, Gainesville, Fla. 32604.

The specialist recommended trying a small planting this year to see how you like it. The melon has good shipping qualities and could fit well into a shipping program.

Another good performer at Georgetown last summer was 'Mirage', a crimson sweet class melon. 'Blue Belle' is a sugar baby class that looks good. It has about the same maturity as 'Sugar Baby' but produces slightly larger fruit.

Moving on to another cucurbit crop — cucumbers — Orzolek reported on several new slicers. 'Market More 76' has better disease resistant than its predecessor 'Market More 70'. It also comes on a little later.

'Pacer' and 'Southern Set' also look good. Though not a very heavy yielder, 'Southern Set' produces excellent fruit. The specialist also recommended 'Poinsett 76', a slicer that's a bit later than 'Market More 70'.

Reporting on results of cultural studies on curcurbit crops at the Delaware Substation, he said the biggest difference in yields came with the use of mulch. This improved fruit size as well as flavor and yield per acre. In most years, he said, a plastic mulch will pay.

Another cultural practice that paid off last year at Georgetown was narrower row spacing for watermelons. When they went from a 7-foot row to a 3.5-foot row they got much quicker vine running and row cover, with fewer weeds.

The closer spacing didn't boost yields an it did produce slightly smaller fruits, but the advantage in reduced herbicide use — especially on watermelons — appeared to outweigh these disadvantages.

The system gives excellent control of broadleaf weeds.

Noting some cultural problems related to last summer's wet weather, Orzolek also had some advice for people growing the 'Summet' variety of cantaloupe. With all the rain there was a problem of cracking and splitting with this lope, but he still feels it's worth growing.

Just be sure to grow it on well-drained soil, he said; or on ridges, if you're using plastic mulch.

Eastern figures CNI proposal could cost $10,000 per farm

BINGHAMTON, N.Y. — Dairy farmers supplying the New York-New Jersey market could lose $170 million a year, nearly $10,000 per producer, under a pricing scheme being studied by the Federal government. Its adoption could cost rural economies in this area alone more than a half billion dollars annually.

Businesses and local governments serving these communities would be seriously affected. The rural economies throughout the Northeast, where dairy farming is the predominant agricultural industry, would be seriously depressed.

These are among the comments by Joseph C. Mathis, of Manlius, New York, a nationally known dairy marketing economist, at a hearing of the U.S. House of Representatives' Subcommittee on Dairy and Poultry, in Binghamton, New York, on February 4, 1980.

Mathis is the Manager of Economics and Research for the 4000-member Eastern Milk Producers Cooperative Association, headquartered in Syracuse, New York

His warnings were aimed at a proposal being pressed on the U S Department of Agriculture by the Community Nutrition Institute of Washington, D C

The CNI is asking that reconstituted fluid milk products be exempt from government price regulations even though they compete directly with regulated dairy products in the marketplace Reconstituted dairy products are made by mixing powdered skim milk with water, and in some cases a form of fat, to produce fluid skim, low-fat or whole milk products.

Mathis explained that adoption of the CNI proposal would result in the intolerable competitive inequities among milk dealers which could cause the current price structure to collapse.

Such an event likely would necessitate the termination of the Federal order program that has maintained orderly marketing conditions in the dairy industry and has assured adequate supplies of fresh dairy products for consumers for the past 40 years.

As dairy farm resources shift away from the Northeast and Southeast, the dairy product needs of the major population centers along the Eastern seaboard would become dependent upon production areas in the Upper Midwest. The transportation of supplies over such long distances not only would waste precious energy, but consumers here likely would be left with products of lower nutrient value at higher prices.

Mathis congratulated the Congress for assuring dairy farmers of at least 80 percent of parity price supports for the next two years. He indicated that their action would provide milk producers with the financial security and economic incentive to produce adequate supplies of milk to meet current and future needs of consumers.

Even so, milk prices paid to farmers in this region are expected to increase only about 8 5 percent this year, compared to an anticipated inflation rate of about 12 percent in the costs of production

Turning to the need for strong cooperative associations, Mathis noted that agricultural cooperatives provide the only legal means through which individual family farmers can attain countervailing bargaining power against the overwhelming concentration of market power held by the buyers of their products.

Any recommendations which would seriously undermine the market power of cooperatives, as advocated by some, while doing nothing about market power elsewhere in the economy would place farmers at a serious competitive disadvantage and would lower their returns to labor and capital.

To date, Congress wisely has rejected such recommendations, noted Mathis.

Eastern Milk Producers Cooperative also is deeply concerned about the growing threat posed to both the dairy industry and consumers by the growth of fabricated imitations of dairy products and the unrestricted importation of casein which is finding its way into the nation's food supplies, he said.

Mathis noted proper labeling regulations must be instituted to protect consumers from outright fraud and to assure the economic viability of the nation's dairy industry.

Finally, he said in the event fuel rationing or allocation programs are instituted, the farm and food processing sectors must receive priority use if consumers are to continue to enjoy an adequate supply of food at affordable prices.

Dairy agriculture in the Northeast, as in the nation as a whole, is a paramount industry of vital importance to the public welfare.

In the 10 states that comprise this region, some 50,000 farmers produced 23.8 billion pounds of milk last year (about 20 percent of the nation's supply) having a cash receipt value of more than $2.5 billion. This added more than $7.7 billion to the rural economies of this region.

Farm cash receipts from dairy products represent about 42 percent of those for all agricultural products produced in the Northeast.

Census takers to seek farm, rural statistics

WASHINGTON, D.C. — Farmers and residents of rural America are being urged by the Census Bureau to be counted April 1 in the 20th Decennial Census of Population and Housing, and to urge their farm help to be counted too.

The results can affect farmers' pocketbooks and their representation in State legislatures and Congress.

More then 100 federal programs now guide their spending of an estimated $50 billion annually with census statistics. Funding for the extension service, for example, hinges upon a state's rural and farm population as determined by the census.

Local governments rely on census statistics to guide them in numerous programs. These include locating schools, providing transportation facilities and public utilities for their residents, pinpointing housing conditions that must be remedied, and solving many other problems.

Census population data are the basis for reapportioning seats in the U.S. House of Representatives. At the State level, changes in population affect the redistricting for the legislature and House of Representatives.

The census is expected to count approximately 222 million people and 86 million housing units. Data will be compiled for 3200 counties, and 20,000 incorporated villages, towns and cities, together with information on county subdivisions, census tracts, and 2.5 million city blocks.

Every household in the Nation will receive a census questionnaire in the mail on March 28. About 90 percent of the households will be asked to mail back their completed forms. The remaining 10 per cent, primarily in sparsely settled areas of the West, will be instructed to keep their forms until census takers pick them up.

Farm families having children in elementary or high school are receiving an early introduction to the census. Some 123,000 special school curriculum kits have been sent to more than 106,000 schools to help increase awareness of the census.

Each kit contains a "take-home" element so that students, by preparing lessons with parents or guardians, can share with them their knowledge of the census and its importance. One take-home lesson in each kit has been translated into Spanish.

One question always asked is this: Is it mandatory to answer the census questions. The answer is yes.

It has been required since 1790. Answering census questions has come to be viewed by most Americans as a civic duty, and most cooperative voluntarily, the Census Bureau reports.

Federal law guarantees the privacy of individuals census answers. Not even another government agency, including law enforcement and immigration authorities can see census answers.

Speak up for families

UNIVERSITY PARK — You can be part of The White House Conference on Families. How? By participating in a local Family Forum.

Family Forums are an important segment of The Pennsylvania Forum on Families, the statewide project in preparation for The White House Conference on Families in Baltimore on June 5, 6, and 7.

Anyone can sponsor a Family Forum – an individual, a neighborhood group, an organization. A 12-page Guidebook, available at no charge from your county Cooperative Extension Service office, tells you how to organize, publicize and conduct the forum or meeting.

Recommendations from scores of forums in churches, schools, community centers and neighborhoods across the Commonwealth will be an integral part of Pennsylvania's report to The White House Conference. Testimony from four regional hearings will also be included in the report.

Secretary of Public Welfare, Helen B. O'Bannon, state coordinator for The Pennsylvania Forum on Families, said a goal of both the national conference and of Pennsylvania's activities is to listen and involve families themselves.

Forums will give families the chance to talk about the difficulties they face and how they cope with problems, how government policies affect them and how family members cope with inflation, the high cost of health care and other issues.

James E. Van Horn, Penn State Extension family sociologist, chairman of the statewide planning committee for The Pennsylvania Forum on Families, said forums will give families the chance to offer their ideas on how to change government and private sector practices for the better.

The four regional hearings are also open to the public. Hearing locations are: February 19, Sterling Hotel, Market and River Streets, Wilkes-Barre; February 21, 402 Keller Building, Penn State University, University Park; February 26, Creese Student Center, 32nd and Chestnut Streets, Philadelphia; February 28, YWCA, Fourth Avenue and Wood Street, Pittsburgh. Information on the hearings is available from 204 Weaver Building, The Pennsylvania State University, University Park, PA 16802 (814) 863-2927, or from your local cooperative extension service.

Unami 4-H holds covered dish

The Unami 4-H held a covered dish supper at the club's February meeting at the Bedminster Elementary School. In January, 45 club members and their families attended the Ice Follies.

In appreciation use of Plumsteadville Grange, the club presented a play in November called "The Days of the Radio." October's Halloween Party was held at Matthew Anderson's barn on the 27th.

President's challenge to FFA to receive boost

CHICAGO, Ill. — The FFA's energy conservation program, THE PRESIDENT'S CHALLENGE, will recieve a solid boost through the sponsorship of the Estech General Chemicals Corporation, FFA officials have announced.

Estech's involvement is expected to aid member attention focused on the FFA's acceptance of a challenge from U.S. President Jimmy Carter to provide leadership to assist in solving the energy problem. FFA chapters and members across America are currently developing and conducting a wide range of activities which will bring a better understanding of America's energy situation, an increased awareness of energy conservation and an understanding of food and energy relationships. Carter issued the challenge to the FFA when he hosted top FFA leaders in the White House Rose Garden in July of 1979.

"We are quite pleased to provide additional incentive for such a fine organization to tackle an extremely difficult problem," said Edward Vrablik, President of Estech General Chemicals Corporation.

Estech will provide a $400 grant of the four regional winners that is to be used by the FFA chapter to improve or expand local FFA projects in: 1) energy; 2) supervised occupational experience programs, or 3) leadership activities. In addition, Estech General will provide plaques and partial travel stipends for the four regional winning chapters.

Only one FFA chapter of over 8,000 in the nation will recieve the President's Challenge Award, but through Estech's sponsorship, all four of the regional winners will now be recognized with an award.

Presentation of the President's Challenge Award is currently planned for the week of July 28 - August 1, 1980 in the Rose Garden of the White House. This falls during the Washington State President's Conference, a week of meetings for the State FFA Association Presidents that is devoted to leadership training and development.

Delmarva to hold safety seminar

DELMAR, Md. — The Third Annual Delmarva Safety Seminar will be held on Tuesday, February 26, 1980, at the Del-Mar-Va Conventional Hall, Route 13, Delmar, Maryland.

It is sponsored by the Delaware Extension Service, in cooperation with the Delmarva Safety Association, Delmarva Poultry Industry, and Maryland Extension Service.

The program this year emphasizes occupational safety and health in the workplace.

Last year 5.5 million workers were injured on the job, resulting in an estimated $23 billion in lost wages, medical expenses, insurance claims, and productivity delays.

In addition to the task of accident prevention, business and industry today face the infinitely more complex and subtle challenge of maintaining occupational health. The toll in work-related diseases indicates there are many serious hazards facing workers, so speakers will be on hand to address such health-related topics such as noise, environmental monitoring, respiratory protection, and medical screening.

For additional information or to obtain registration forms, contact Ronald C. Jester, University of Delaware Substation, R2, Box 48, Georgetown, DE 19947, or call 302/856-5250.

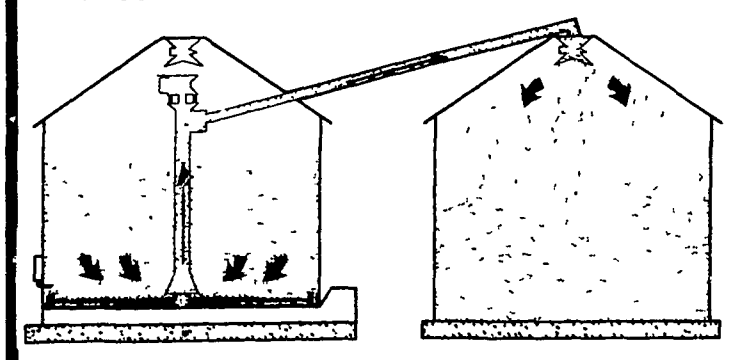
SEE NEXT WEEK'S AD FOR FULL DETAILS ON OUR FARM FUEL SYSTEMS IN OPERATION AT THE FARM MACHINERY EXPO, FARM SHOW BUILDING, MAKING METHANE AND ETHANOL.

GSI GRAIN BINS

MARTIN GRAIN DRYING SYSTEMS

Compare their unique features and advantages. Preserves grain quality, less shrinkage & stress cracks. Conserves energy, lower operating cost, from 3¢/bu. for 10 points. Both systems dry 35% moisture corn, requires no wet holding tank or babysitting. Both systems include a G.S.I. Drying Bin, in & out ladders, roof ladder, Cor-lok floor, steel floor supports, transition, fan & heater, ventilator cleaner, motorized spreader, unloading auger system with total enclosed motor, and freight to our warehouse.

MARTIN FLO-MOOR SYSTEM



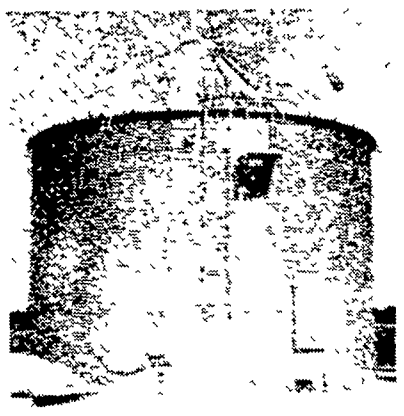
2 STAGE CONT. or RECIRCULATING

$6931 Includes Martin Electronic Moisture Control With Motor Starters.

- Drying capacity up to 12,600 bu./day
- 15 to 36 ft. diameter bins.
- Operating temperature adjustable 90° to 160°
- Add wet grain as fast as you harvest. Large storage capacity for fast unloading.
- Twin tapered sweep augers unload faster
- Extra heavy gear box assures trouble free operation
- Automatic grain level shut-off
- Grain Cleaner removes trash for better drying

MARTIN LOW-TEMP SYSTEM

Batch With Low Temp. Control



$3825

Stirring Equip. Option

- Drying Cap. Up to 6400 Bu. Per Day.
- 15 to 48 ft. diameter bins
- The only system with gas heat (up to 30°) backup to prevent spoilage.
- The Martin Low-Temp Control monitors and automatically controls the temperature and the humidity. The thermometer, hygrometer and monometer display operating conditions, thus eliminates all guesswork in the easy operating management.
- Built-in safety controls assure trouble free operation.
- It operates automatically around the clock in sunshine or rain, heat or cold, without any babysitting or readjustments.

4-H Awards given to Dean, Congresswoman

HIGHTSTOWN, N.J. — Grant S. Walton, Dean of Cook College and Director of the New Jersey Agricultural Experiment Station, was awarded the 4-H "Educator of the Year" plaque at the annual meeting of the New Jersey Association of 4-H Agents held at the Old Yorke Inn, Hightstown. The award was presented by Erika Fields, Passiac County 4-H agent and president of the Association.

Dr. Walton was appointed Dean of Cook College and Director of the Experiment Station in 1976. He earned his B.S. in wildlife conservation and management and his masters and doctorate in soils, all from Rutgers University. Before joining the Rutgers faculty in 1965, he was the Executive Director of the New Jersey Soil Conservation Committee for six years. He was the Conservation Director of the Stony Brook Millstone Water Shed Association from 1957-59. He served as first chairman of Cook College's Department of Environmental Resources established in 1969. He took a two-year leave of absence in 1972 to direct the activities of the Division of Environmental Quality at the State Department of Environmental Protection in Trenton. Dr. Walton has served on numerous legislative advisory committees and belongs to a number of professional organizations related to his particular interest in arctic soils. He has been a member of at least a dozen arctic expeditions and has studied soil structure in Canada, Greenland, Alaska, and Siberia.

Dean Walton's interest in and support of 4-H have extended beyond his professional demands. He and his wife have served as 4-H leaders in Middlesex County and his children were active in the program as 4-H members. They now live in the Sandy Ridge area of Delaware Township.

The 4-H Association also recognized Congresswoman Millicent Fenwick, Congressional 5th District, as a "Friend of 4-H" for her support of the New Jersey 4-H Youth Development Program. Her award was presented by Barbara O'Neill, Somerset County 4-H Agent and vice-president of the association.

Congresswoman Fenwick was helpful in the realization of the "4-H is Tops" sign on the ConRail Company railroad bridge on State highway 202 in Bridgewater Township. She resides in Bernardsville.

USDA to gather grain reserve comment

WASHINGTON, D.C. — The public is being asked to advise the U.S. Secretary of Agriculture on whether certain changes or modifications should be made in the operation of the farmer-owned grain reserve program.

Proposed revisions to the grain reserve program are intended to make it more adaptable to changing conditions. Comments are being sought on the following issues:

Are differentials between release and call prices wide enough, or should be spread be increased?

Should the release level, the call level, or both release and call levels, be increased?

Should release and call levels be adjusted through adjustments in the percentage of loan rates or through adjustments in the loan rates themselves?

Would it be prudent to encourage more orderly liquidation of loans (and hence more orderly marketing of reserve grain) through the introduction of a mid-level trigger point?

Should only the five-day adjusted average market prices as published by the Agriculture Marketing Service be used for release and call determinations?

How long following release of grain reserve stocks should storage earnings continue?

Should current reserve participants have the option to convert new agreements for another three-year period if and when program provisions are modified?

Anyone concerned with growing, marketing, processing, or using wheat and feed grains or their products, or having an interest in the above issues, is encouraged to comment.

Send your written comments to: Director, Price Support and Loan Division, USDA-ASCS, Room 3741, Washington, D.C. 20013.

To be assured of consideration, comments must be received no later than March 4, 1980.

CUT FUEL COSTS!!

See the newest in kerosene heaters. Safe, no open flame. Odorless - portable. Can be used in home, garage or workshop. Burns 15 to 20 hours on one gallon of kerosene. 6 models to choose from. From 8,000 to 19,000 BTU

Perry Saddle Up Club to meet

NEW BLOOMFIELD - The Perry County 4H Saddle Up Club will hold it's first meeting on Monday, February 18 at 7:30 P.M. in the New Bloomfield Courthouse conference room.

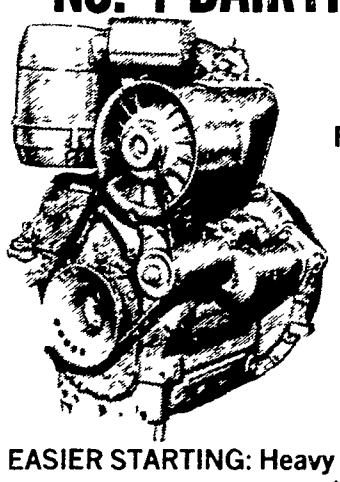
Leaders for the club are: Cathy and Joe Zahn, Deb Jury Carrie Sundy, Sondra Dechenes, Carl Fuller and Phyllis Stuber.

Officers are: Tammy Leiter, President; Lori Miller, Vice President; Betsy Zahn, Secretary; Natalie Stuber, Treasurer; Teresa Miller, Karen Groff and Tammy Fisher, News Reporters; Jodie Zahn, Brad Stuber and Steve Fuller, Social Chairman and Committee; Angie Deschenes, Bulletin Board.

This years activities will include trailrides, clinics, trips, horse shows, etc.

New members between the ages of 8 and 19 are invited to attend. There is also a Tiny Trotter's Division, ages 4 to 8. Owning a horse or pony is not a requirement. Report submitted by Teresa Miller.

NO. 1 DAIRYING DIESEL



Since 1968— FZL-912 diesels have earned the reputation as the most reliable diesel. Don't settle for less.

2 Cyl F2L-912 (New Style)

EASIER STARTING: Heavy flywheel provides easy starting. No electric heater plugs.

QUIETER: Runs quieter than most water cooled diesels. Very quiet exhaust.

F2L-912 SPECS: 22 Hp @ 1500 RPM
27 Hp @ 1800 RPM
34 Hp @ 2300 RPM

It has direct injection, lube oil cooling, and oil cooled pistons. This engine has proven to survive the extreme heat of a heavy load in a small engine house better than any other engine.

PLUS - FAMOUS DEUTZ FUEL ECONOMY

How to use prostaglandin in estrus synchronization

UNIVERSITY PARK — Prostaglandin (Lutalyse) is a drug that has recently been approved by the Food and Drug Administration for use in beef cattle and dairy heifers.

Through the use of this drug, estrus and subsequent release of the egg from the ovary (ovulation) can be controlled or synchronized.

In the normally cycling heifer a corpus luteum develops on the ovary after the egg has been ovulated. Heifers will not express estrus or ovulate as long as they have an active CL present on the ovary.

The CL remains active until approximately day 18 of the 21-day cycle.

If prostaglandin is injected between day 5 and 18 of the cycle it will cause degeneration of the CL.

On the average, animals will come into heat about three days after the injection.

Since all animals do not have an active CL on the day of injection, a second injection 11 days following the first injection is required to synchronize all cycling animals. Such a synchronized group of heifers can be artifically inseminated at a predetermined time or as heifers express heat following treatment.

Research has indicated that higher conception rates are achieved in animals which express heat following prostaglandin treatment than those which fail to exhibit heat.

This synchronization program requires good management before it can be used successfully.

Prostaglandin treatment is not a substitute for good management. Heifers must be cycling before synchronization will work. This means heifers must be in good condition and on a good level of nutrition.

It is advisable to check all heifers by rectal palpation to determine if indeed they are cycling.

Adequate facilities should exist to insure safe and efficient handling and insemination of the heifers.

If many heifers are to be inseminated at one time, additional qualified technicians should be used. High quality semen and good semen handling techniques are required.

Prostaglandin must be administered by a veterinarian. The drug is not approved for use in lactating dairy cows and if it is injected into pregnant animals it could induce abortion.

Conception rates will generally not be improved through the use of prostaglandin.

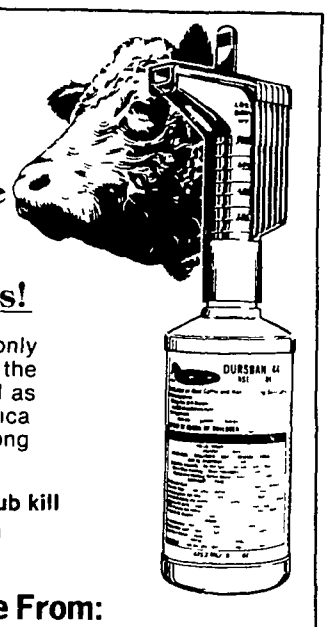
Estrus synchronization can be a profitable aid to good herd managers. Through controlled breeding, heifers can be bred artificially to genetically superior sires.

There is a reduction in the time for heat detection.

Finally, heifers can be bred to calve routinely at 22 to 26 months of age.

To avoid disappointment from using prostaglandin, it is essential that herd managers plan in advance and consult with their veterinarian and AI personnel.

NEW DURSBAN* 44 INSECTICIDE



Season-Long Lice Control With ONE Application — Even Kills Eggs!

Franklin DURSBAN 44 is the only cattle insecticide that kills the louse egg and nymph as well as the adult. Just a single application controls lice all season long.

Sugar duty reduced to minimum level

WASHINGTON, D.C. — President Carter has reduced the import duty on raw sugar by 2.1875 cents per pound—96 degree basis raw sugar, the standard basis for sugar trading--to the statutory minimum of 0.625 cents per pound effective last Friday.

Duties on other sugars, syrups and molasses are at comparable levels after adjusting for quality.

According to Howard Hjort, director of economics, policy analysis and budget for the U.S. Department of Agriculture, domestic spot raw sugar prices have been in excess of 19 cents per pound since January 16.

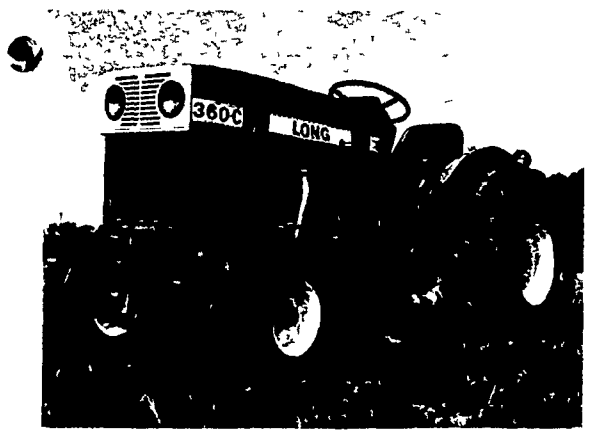
World sugar stocks are being reduced this year for the first time in seven years. The outlook for the rest of 1980 and 1981 is for continuing strong world sugar prices, and for strong domestic prices, Hjort said.

Hjort said the domestic spot sugar price on Jan. 31 was 23.01 cents per pound. "If the full amount of the reduction in duty were passed on to consumers, the U.S. domestic price would be 20.8 cents, well above the U.S. domestic market price objective of 15.8 cents per pound raw value," he said.

This reduction implies a major savings for consumers of more than 2 cents per pound, raw value and more than $400 million on an annual basis, according to Hjort.

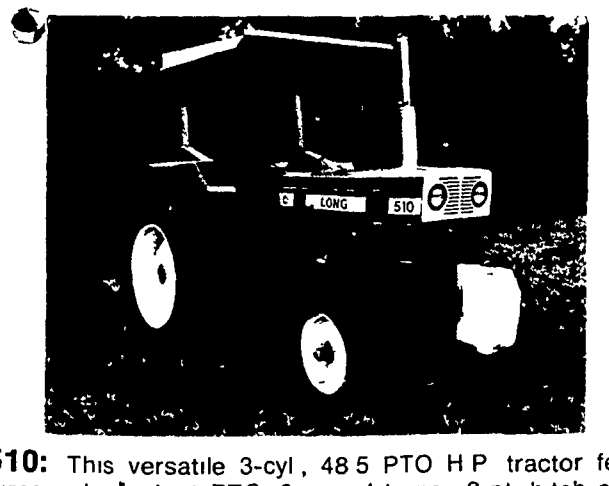
8 GOOD REASONS TO BUY 8 GREAT TRACTORS

- Quality built tractors, priced up to 25% below competition.
- Fuel efficient — High performance diesel engines.
- Precision engineered for efficiency, durability and performance.
- More horsepower and built-in weight per dollar.
- Heavy-duty 2, 3 & 4 cylinder diesel engines designed to meet your farming needs at the most affordable price.
- 4-Wheel drive tractors priced below competitive 2-wheel drive models.
- Outstanding standard equipment package plus options to meet your individual needs.
- Over 600 convenient dealer locations to service you.

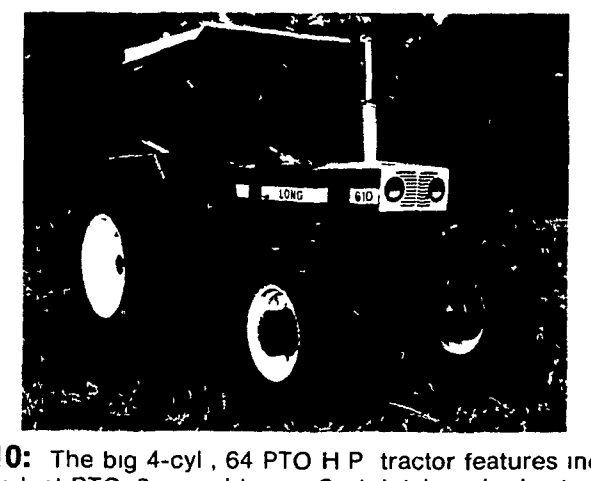


360-C: This compact version of the 360, 3-cyl., 35 PTO H.P. tractor has the same standard equipment, including hydrostatic steering*. Perfect tractor for small farm chores and turf work. Turf or general purpose farm tires. Wt. 3,630 lbs. (approx.) Price with 5.00 x 15/12.4 x 24 GPF Tires.
LIST PRICE**: 2-WD — $ 7,204.00

460: A 41.9 PTO H.P., 3-cyl., tractor. Standard equipment includes Hydrostatic steering*, independent PTO, 8-speed trans., 3-pt. hitch and adjustment controls, differential lock and more. Wt. 3,850 lbs. (approx.). 2-WD or 4-WD. Prices with 6.00 x 16/14.9 x 28 (2-WD) or 7.50 x 20/13.6 x 28 (4-WD) GPF Tires.
LIST PRICE**: 2-WD — $ 8,168.00
4-WD — $10,165.00



510: This versatile 3-cyl., 48.5 PTO H.P. tractor features independent PTO, 8-speed trans., 3-pt. hitch and adjustment controls, differential lock, hydrostatic steering*, and more. Wt. 3,900 lbs. (approx.) 2-WD or 4-WD. Prices with 6.00 x 16/14.9 x 28 (2-WD) or 8.3 x 24/16.9 x 28 (4-WD) GPF Tires.
LIST PRICE** 2-WD — $ 8,743.00
4-WD — $11,341.00



610: The big 4-cyl., 64 PTO H.P. tractor features independent PTO, 8-speed trans., 3-pt. hitch and adjustment controls, differential lock, hydrostatic steering*, and more. Wt. 4,560 lbs. (approx.) 2-WD or 4-WD. Prices with 7.50 x 16/16.9 x 28 (2-WD) or 10.5 x 20/16.9 x 28 (4-WD) GPF Tires.
LIST PRICE**: 2-WD — $10,279.00
4-WD — $12,999.00

USDA calls for comments on conservation

HARRISBURG — Citizens will have an opportunity to comment on the future of the Nation's soil and water conservation programs during a 60-day public review period, the U.S. Department of Agriculture has announced.

Carl L. Kaufman, State Executive Director of the Agriculture Stabilization and Conservation Service said the proposals for a national soil and water conservation program were developed by a coordinating committee made up of members from nine USDA agencies, plus the Office of Management and Budget, and the Council on Environmental Quality.

The process included consideration of public input from 9,000 public meetings held nationwide in 1978.

The Soil and Water Resources Conservation Act was enacted in 1977. The Act called for the U.S. Department of Agriculture to appraise the condition of the nation's renewable natural resources, and to propose alternative conservation programs to guide the nation's future conservation activities.

Basic information about the RCA process and proposals may be seen in four draft documents available for public review in the county ASCS Offices.

The first document, Draft Appraisal Part I, describes the status and condition of U.S. natural resources and provides information on: quantity and quality; resource legislation and regulations; and major uses of nonfederal land.

The Draft Appraisal Part II, identifies and analyzes national resource conservation problems for: reducing erosion and preserving prime farmlands; improving water quality; conservation water; improving fish and wildlife habitat, including the preservation of wetlands; reducing upstream flood damages; conserving energy; and solving related resource problems.

It also projects demands on soil and water resources to the year 2030 and suggests levels of management that could be used to preserve these resources. Further, it summarizes trends in rural land ownership and describes the contribution of state and local programs to soil and water conservation.

The third document, Program Report and Environmental Impact Statement, presents the goals for resource conservation over the next 50 years, and details activities needed to meet those goals.

Seven alternative soil and water conservation programs to carry out these activities are also discussed. They are:

Redirection of Present Programs - USDA would continue existing programs, but the allocation of funds and personnel would be redirected to better solve certain national resource problems. Cooperation would continue to be mostly voluntary.

Cross Compliance - Producers would be required to apply effective conservation measures to qualify for benefits under other USDA programs, including commodity price supports, low interest loans, cost sharing, and crop insurance.

Regional Resource Project Approach - This strategy would direct USDA programs toward the more urgent and chronic regional resource problems. Federal participation would be available only for programs that contribute to meeting national conservation objectives.

State Leadership - States would assume leadership for planning and carrying out conservation programs. State and local governments would develop conservation programs for USDA approval, provide technical assistance to producers, and fund those activities that benefit mostly state and local people. USDA would fund activities that have national benefits but are beyond the interest or financial resources of the producer or state and local governments.

Regulatory Emphasis - This strategy would emphasize the use of backup regulatory authorities at the local, state, and national level to carry out an effective national soil and water conservation program. This approach would be coupled with a strong cost share and technical assistance program and low interest loans that would offer incentives for resource management.

Conservation Performance Bonus - This strategy provides incentives to producers who voluntarily apply and maintain conservation measures that meet USDA standards. It offers incentives to obtain benefits under federal programs but has no required cross compliance. Priority would be given to resource areas where present conditions pose the greatest threat to future food and fiber production.

Natural Resource Contracts - USDA would offer to purchase erosion reduction, irrigation water reductions, and other outputs of conservation farm producers. The public would, in effect, buy specific benefits from those who run, operate, or control private natural resources.

A fourth RCA document or Summary is a condensed version of the information in Draft Appraisal Parts I and II and in the Program Report and Environmental Impact Statement document.

During the public review period, regional, state, and local meetings will be held to inform the public on the contents of the documents. The public is urged to provide comments on all parts of the RCA process. Citizens are invited to send written comments to the RCA Response Analysis Center, P.O. Box 888, Athens, Georgia 30603.

The RCA process is an effort to look ahead to the future, to project resource demand over the next 50 years, and, based on this information, to select a strategy or combination of strategies that will be acceptable to producers and will also meet national objectives.

"Many questions need to be answered, such as how much are we willing to invest in conservation to insure a continued supply of food, fiber, clear water, and wildlife," said Kaufman. "At what level of government should a national conservation program be developed and carried out? Who will pay for these conservation efforts?"

Kaufman added citizen input will play an important role in deciding what strategies will be used to develop the national conservation program, to be transmitted by the President to Congress in 1980, and again in 1985.

Anyone interested in reviewing the documents or in finding out more information about upcoming RCA meetings should contact their local Soil Conservation Service office of the ASCS staff.

Booklet lists services for Lancaster County folk

LANCASTER — Ever have a question about where to get specific kind of help, but didn't know who to ask? Well, help is on the way to Lancaster County residents in the form of a new "Where to Call When You Need Help Guide."

The new booklet is being distributed currently by the Lancaster County Information Center, a new agency devoted to helping county residents get the kind of help and information they need. It is available free to a number of area locations and is printed in English, Spanish and Vietnamese.

"There are a lot of services available to people in Lancaster County, but often our friends and neighbors do not know who to contact when they need some kind of specific help or information," says Jean Wedge, director of LINC. The new guide will answer most of the commonly asked questions directed to the Information Center.

The list of agencies and organizations providing services runs from abused women information to how to get workmen's compensation assistance. In between there are numbers to call to get a duplicate birth certificate; drug problems assistance; housing information; help in handling neighborhood problems; pollution information; how to offer your spare time as a volunteer and more than a hundred other categories.

"The guide doesn't answer your questions, but it does tell you who you can call to get answers on questions such as these," says Wedge.

The guide was compiled from careful study of the thousands of questions directed to LINC during the past few years. It lists the agencies where residents can call or go to directly for information or help. Where the guide does not deal with a specific problem, residents can call LINC on its 24-hour hotline number and get the answer to their questions.

Wedge says publication of the guide was made possible through use of 1978 Community Development funds from the U.S. Department of Housing and Urban Development, sponsored by Lancaster County Commissioners.

FARM CREDIT HELPS GROWING FARM FAMILIES

The needs of your family are never-ending. Equipment. Home appliances, feed and seed and fertilizer. Doctor bills, College educations. Trucks and tractors. Remodeling the house.

The people at your Farm Credit Associations understand farm families and their special needs. After all they've been working with families like yours for nearly 50 years. They work with you to help you reach your goals. And it's good to know that you believe in constructive credit . . . the kind that helps you get further ahead instead of deeper in debt.

So the two of you don't have to go it alone. Not when there's a Farm Credit man who's a real professional when it comes to helping farm families like yours.

Strengthened domestic programs should offset grain embargo

WASHINGTON, D.C. — Actions taken by the U.S. Department of Agriculture to minimize the effect of the suspension of agricultural sales to the Soviet Union along with new sales to other countries, have restored grain prices, which dipped sharply immediately following the suspension announcement, according to USDA economists.

Summarizing the agricultural outlook, economists of USDA's Economics, Statistics, and Cooperative Service said, however, that repercussions are still being felt throughout the transportation, storage and shipping industries as grain supplies are being diverted to alternate market and/or storage.

The longer-range outlook is still unclear.

Market conditions in the second half of 1980 will depend not only on world grain production but on Soviet action as well. Later this winter, USDA will announce whether a paid diversion program will be offered for 1980 crops.

The recession forecast for the last half of 1979 did not materialize because of continued strong consumer spending. It is now expected later this year.

Output by the automobile and residential construction industries has slumped recently, accompanied by a rise in unemployment. With real GNP expected to decline and unemployment to increase in the first half of this year, the demand pressure on food prices is likely to weaken.

Although economic activity in the rest of the world is expected to ease, growth is projected to be positive for most all other countries. This plus continued good global demand for feedstuffs points to firm markets for U.S. agricultural products despite the suspension.

While the aggregate domestic demand for food probably will ease in 1980, food prices will continue to rise in response to increased processing and marketing costs. Price increases for the major components of the marketing bill--labor, packaging, and transportation—are likely to range from 9 to 17 percent.

The farm value of domestically produced food is forecast to rise a modest 3 percent, significantly less than the double digit rates of increases in 1978 and 1979. Thus retail price increases are projected to range from 7 to 11 percent, with 8 percent the most likely based on current conditions.

xxx

A Public Auction of farm equipment was held February 9 by Aaron Z. Shirk, R2, Ephrata. The farm was located between Ephrata and Lancaster.

The following prices were received: J.D. 4020 D tractor $9500, J.D. 2020 tractor w/48 loader $4000, M.F. grinder-mixer $2075, J.D. forage wagon $975, N.H. haybine $1125, century crop sprayer $775 and ear corn $76 per ton.

Auction conducted by John E. & Paul E. Martin.

xxx

A Public Sale of farm machinery and straw was held February 9 by Victor Fite, along Peach Bottom Rd., 20 miles south of Lancaster.

Some items sold were: J.D. 3020 Tractor w/J.D. 148 Loader $13,065, Brillion cultimulcher $2250, N.H. 276 baler $5050, J.D. 125 3-bottom plow $700, 10 foot spring harrow $450, saw buck $64, home grown clover seed $75 a bushel, corn $57 to $59 per ton and Straw $57 per ton.

J. Everett Kreider and Steve Petersheim were the auctioneers.

xxx

Four Months have passed since we lost our barn by fire. These were difficult months for both of us, but we are eternally thankful we live in a community where people show a concern for one another, and we were the recipient of many kind deeds.

NOTICE OF INTENT TO SELL REAL ESTATE

The Administratrix of the Estate of George A. Tushim, Jr., wishes to receive offers to purchase the farm of the above-named decedent located in Bald Eagle Township, Clinton County, Pennsylvania.

The farm consists of 76 acres, more or less, and has erected thereon a 2-story, 4-bedroom frame house with a new woodburning stone fireplace in living room, along with new carpeting throughout, new asphalt roof, new furnace, new 200-amp electrical service, bank barn and other miscellaneous outbuildings; it is the same property purchased by George A. Tushim, Jr., from Edward H. Gotschall, et ux, by deed dated September 11, 1973, as recorded in Clinton County Deed Book 242, page 842, and has been designated as Bald Eagle Township Tax Parcel No. 6-1-57. More information about the property being offered for sale can be obtained from Mr. Russell Roan, Mackeyville, Pa. 17750, who can be contacted by phone between 5:00 - 7:00 p.m. at (717) 726-6351 or (717) 726-3706.

An offer must be made on a form which is available at the State College and Lock Haven offices of McQuaide, Blasko, Schwartz, Fleming & Faulkner, Inc., legal counsel for the Estate. The amount of an offer must be equal to or in excess of $119,000.00 and must be received in either of the aforementioned law offices on the approved form no later than February 21, 1980, at 5:00 P.M. Settlement will occur within thirty (30) days of the acceptance of an offer by the Administratrix, who, however, reserves the right, in her discretion, to reject any and all offers received.

BIG SALE OF 150 QUALITY COWS

THURSDAY, FEBRUARY 21
AT 12 NOON
MELVIN KOLB, INC.

Location: At my Maryland Farm located ½ mile NW at Woodsboro on Route 550, Frederick County, Maryland.

This Sale will consist of about 75 head of Purebreds selected by us from the best herds we know of in New York, PA, Wisconsin, Maryland, Maine and New Hampshire. We really tried to select the very finest of the best breeding and type we could buy. About 30 of them will be extra top first calf heifers, close or just fresh. About 45 head of the Purebreds will be 3 to 5 years old. They are from some of the most popular sires in the Holstein breed.

Please come to this Sale and see for yourself one fine selection. 75 head of fresh grade cows and first calf heifers. Many of them milking over 80 lbs. a day. There will be several Purebred calves sold also. If you need good cows, come to where they are.

Free transportation for Lanc. Co. Amish. Please call Feb. 20th before noon time and you can arrange to be picked up. The numbers are: 569-2106 or 569-6800.

Thank You,
MEL KOLB

Terms: Cash on day of Sale. Not responsible for accidents.

PURINA BIO-4 POULTRY PROGRAM

HELPS YOU FIGHT TODAY'S HIGH COST OF FEED

WHAT IS BIO-4™

It took Purina Poultry Researchers 7 years to develop BIO-4™. During these 7 years they studied laying hens nutrient requirements and what nutrients are necessary to produce an egg based on the hens feed consumption. By knowing the hens nutritional needs, and by precision feed formulation, BIO-4™ insures that hens receive necessary nutrients without overfeeding costly feed ingredients.

SAVES FEED $ $ $

FEED INTAKE lbs./100 HENS/DAY	BIO-4™ CHOW TO FEED
UNDER 20.0	BIO - 128
20.0 TO 21.6	BIO - 121
21.7 TO 23.3	BIO - 114
23.4 TO 25.0	BIO - 107
OVER 25.0	BIO - 100

Starting With B-100, Each BIO CHOW Contains 7% More Fortification

MORE PROFIT $ $ $

Better Rations + Better Feeding Program = Better Performance

Feed comparison tests have shown that BIO-4™ can lower feed costs ½ cent per dozen eggs and maintain top production, egg size, and shell quality. That's $110.00 saved per 1000 hens/per year.

BETTER YOURSELF WITH BIO-4™ PERFORMANCE EDGE

MAIL TO: PURINA Box 366S, c-o Lancaster Farming Lititz, PA 17543
